Dictionary Catalog of the Department Library

FDA Compliance Program Guidance Manual, Section IV (Veterinary Medicine)

In 1894–1895, after suffering defeat against Japan in a war primarily fought over the control of Korea, the Qing government initiated fundamental military reforms and established “New Armies” modeled after the German and Japanese military. Besides reorganizing the structure of the army and improving military training, the goal was to overcome the alleged physical weakness and lack of martial spirit attributed to Chinese soldiers in particular and to Chinese men in general. Intellectuals, government officials, and military circles criticized the pacifist and civil orientation of Chinese culture, which had resulted in a negative attitude towards its armed forces and martial values throughout society and a lack of interest in martial deeds, glory on the battlefield, and military achievements among men. The book examines the cultivation of new soldiers, officers, and civilians through new techniques intended to discipline their bodies and reconfigure their identities as military men and citizens. The book shows how the establishment of German-style “New Armies” in China between 1895 and 1916 led to the re-creation of a militarized version of masculinity that stressed physical strength, discipline, professionalism, martial spirit, and “Western” military appearance and conduct. Although the military reforms did not prevent the downfall of the Qing Dynasty or provide stable military clout to subsequent regimes, they left a lasting legacy by reconfiguring Chinese military culture and re-creating military masculinity and the image of men in China.

National Union Catalog

Symptoms of disease in plants; Non-parasitic diseases; Diseases due to deficiencies of food materials in the soil; Diseases due to excesses of soluble salts in the soil; Diseases due to unfavorable water relations; Diseases due to improper air relations; Diseases due to high temperatures; Diseases due to low temperatures; Diseases due to unfavorable light light relations; Diseases due to manufacturing or industrial processes; Diseases due to control practices; Virus and related diseases; Parasitic diseases; Bacterial diseases of plants; Diseases due to slime molds; The conditions of a fungus in or on the substratum; Diseases due to downy mildews

and allies; Diseases due to pondscum parasites; Diseases due to black molds and allies; Diseases due to leaf curls and related fungi; Diseases due to cup fungi and allies; Diseases due to powdery mildews and allies; Diseases due to sphere fungi and allies; Diseases due to imperfect fungi; Diseases due to smut fungi; Diseases due to rust fungi; Diseases due to palisade fungi and allies; Parasitic seed plants and the troubles they cause; Nematodes and the diseases they cause.

Bergey's Manual® of Systematic Bacteriology

A revisionist portrait of Mexican American life in nineteenth-century Texas, *The Tejano Community* combines extensive research, penetrating insight, and critical analysis to support De León's contention that Tejanos were active agents in establishing communities and a bicultural heritage in Texas because of the resilience of their social institutions and a commitment to hard work. In this pioneering study, De León examines politics, urban and rural work patterns, religion, folklore, culture, and community. Overturning earlier views, he shows that the Tejanos were energetic, enterprising, success-oriented, as well as interested in

and active participants in politics. De León's work has initiated a reevaluation of the Tejano experience in Texas. First published by the University of New Mexico Press in 1982, *The Tejano Community* is now considered a minor classic and remains a core study of Tejano life that continues to stimulate scholarship throughout the field of ethnic studies.
