Walt McCall follows up his successful Classic American Ambulances 1900-1979 Photo Archive with a new and expanded title that fills in a heretofore missing chapter in American emergency vehicle history. This book chronicles in words and photos the evolution of the emergency ambulance in America over the past 100 years. From the slow jouncing horse-drawn vehicles in use at the turn of the last century to the fleet electronics-laden advanced life support units on the streets and highways of today - you'll find it all here. A fascinating story that is long overdue. The book is divided into chapters illustrating ambulances by decade. Each chapter begins with 2-4 pages of text describing major innovations and improvements introduced during the decade.

“Wheel books” were once found in the uniform pockets of virtually all junior officers and many senior petty officers. Each small notebook was unique to the Sailor carrying it, but all had in common a collection of data and wisdom that the individual deemed useful in the effective execution of his or her duties. Often used as a substitute for experience among

neophytes and as a portable library of reference information for more experienced personnel, those weathered pages contained everything from the time of the next tide, to leadership hints from a respected chief petty officer, to the color coding of the phone-and-distance line used in underway replenishments. In that same tradition, the Naval Institute has created and aptly named the Wheel Book series, portable libraries culled from USNI's vast array of information that has accumulated for more than a century. Articles from the Institute's flagship publication Proceedings are combined with selections from USNI's oral history program and from Naval Institute Press books to create unique guides on a wide array of relevant professional subjects. Just as the "wheel books" of yesterday served the fleet well, the Naval Institute Wheel Books of today provide supplemental information, pragmatic advice, and cogent analysis on topics important to modern naval professionals. The pinnacle of leadership in a military organization is command. Article 0801 of Navy Regulations defines both the authority and the responsibility of command as "absolute." This Naval Institute Wheel Book provides practical guidance and food for thought that actual and would-be commanders can use to carry out that absolute authority while being absolutely responsible. Included in this specially-selected collection is the sage advice of those who have commanded as well as the expectations of those who are commanded. Aspirants as well as practitioners will do well to exploit this selected survey of what Fleet Admiral Chester Nimitz described as the "one purpose" for entering the Navy.

A saga of the US Navy from the Barbary War of 1803 through the War of 1812. In 1803, a young man joins the crew of what will become the most famous frigate of the early US Navy - USS Constitution. From the sands of North Africa during the first Barbary War, across the aquamarine waters of the Caribbean, we follow the exploits of a young American seaman, Alain de Noux. At the outbreak of the War of 1812, Captain de Noux takes the ship he personally designed to sea to fight the mightiest navy in the world - Britain's Royal Navy. USS Relentless is the newest, largest, fastest frigate in the world, her hull coated in resin that allows her to fly across the waves, her radically-designed sails and special chute-sail that acts as a spinnaker pulls the big frigate along at nearly eighteen knots. Armed with weapons far in advance of its time - steel cannons with rifled barrels that propel shells farther than any cannon on any ship, along with special binoculars that aid lookouts to see at night, USS Relentless is a most lethal ship. The ship also carries high caliber shells that explode on contact and special carcass rounds filled with white phosphorous, consuming any ship it strikes in flames. USS Relentless challenges all ships, including the huge British ships-of-the-line, contemporary battleships. Terrorizing the Atlantic for months, Relentless is sent on a more important mission, a mission with no return ticket. She will fly the American flag into combat for the first time across the Indian Ocean, attacking the fat merchant ships of Britain's lucrative East India Company. America does not have the means to invade Britain, but USS Relentless can disrupt her most profitable trade routes. Alain finds success in war and finally meets the woman that will change his world, if only for a short time. In his heart, he knows he will die a young man. It is a race. How many ships can the great raider destroy or capture before the Royal Navy's fleet can destroy her? Along the shoals of the Laccadive Islands, In what the world will call The Battle of the Arabian Sea, USS Relentless must fight an entire fleet in order for Alain to get back to the love of his life.

Rantoul and the former Chanute Air Force Base are inseparably intertwined as primary players in a single historical narrative. Rantoul was first founded as an agriculturally based community in 1848 near an area known as Mink Grove. The settlement boomed with the coming of the Illinois Central Railroad in 1854; a railroad championed by the town's namesake, Robert Rantoul Jr. Disaster followed in 1899 and again in 1901 with devastating fires. Then, in 1917, a U.S. Army flying field was built on the outskirts of Rantoul. Named after the aviation pioneer Octave Chanute, Chanute Field, later Chanute Air Force Base, became a premier technical training facility. A mutually beneficial relationship quickly developed between these civilian and military establishments that would last for over 75 years. Chanute Air Force Base closed in 1993, ushering in yet another new era for the village of Rantoul.

Lisa was a public relations director and event planner in D.C. A Christian-in-name-only, Lisa dated freely in spite of her insecurities. An Atheist. A Catholic. A Quaker. A Preacher. A Jew. Some gave her the answers she yearned for, while others left her with more questions. As Lisa's star rose in the political movement, her quest to find her Mr. Righteous led her down a path of religious confusion and discovery. Lisa navigates her journey with humor and humility. Will she find her soul mate or save her soul? Is it too much to ask for both? "Lisa De Pasquale is one of the best conservative writers out there, but this book isn't about politics. It's a fascinating and extremely personal account of her dating life, her massive insecurities and her mostly ineffective search for God - until one man accidentally reveals the truth to her. I won't tell you how, or I'd ruin the ending. This is a true Christian story, disguised as racy 'Chick Lit.'" - Ann Coulter, New York Times Bestselling Author and Columnist "With an entirely fresh perspective and a voice that's humorous, hopeful, and, at times, absolutely heartbreaking, Lisa De Pasquale's quest to find Him is a must-read. I loved Finding Mr. Righteous, agonizing over the rough patches along with De Pasquale and cheering her on throughout, and I can't recommend this book highly enough!" - Jen Lancaster, New York Times Bestselling Author of the Tao of Martha and Here I Go Again "Finding Mr. Righteous is a true page-turner that will touch many lives. That's because it's a very sharply told, sometimes hilarious, sometimes sordid, but always bravely honest account of one woman's search -- in all the wrong places -- for connection, meaning, peace, and true love. By refusing to sugar-coat the sorrows and humiliations of her wanderings, her journey's end is all the more wonderful, powerful, moving, and sweet." - Eric Metaxas, New York Times Bestselling author of Bonhoeffer: Pastor, Martyr, Prophet,

You see, people forever say history is written by the victors. It's not. It's written by those who can shape the simplest narrative. David is a man struggling to hold together his marriage when the small town he lives in is rocked by the sudden, untimely death of a local girl. As details are uncovered, rumours and talk take hold of the town, and start to force David to revisit old memories. Set in 1960s Ireland, *Before Monsters Were Made* tells the story of how a few small words can have a very big impact. When suspicion and old stories start to spread like a virus, how well do we know the people we trust the most? Can we ever know what goes on inside other people's lives? And do we really want to? *Before Monsters Were Made* is an unnerving and moving thriller about loyalty, lies and love.

A trace element (TE) is a chemical element presented below ~ 0.1 wt. % and required in minute quantities to maintain proper physical functioning. TE analysis in clinical samples (plasma, urine, cerebro-spinal fluid, full-term placenta, hair, nails, buccal mucosa, semen, biopsy specimens) has received increasing attention. Based on 62 sources, current effort presents comparative knowledge about the attempts to accurately trace TE in clinical samples through Vis/NIR, PIXE, TXRF, GFAAS, ICP-MS. It informs the need for further research adjustments to reveal the reciprocal states of certain TE (Cu/Zn, Ca/Mg, Fe/ Pb) in correlation with their real-time counts in both maternal and neonatal umbilical cord plasma, and in

relation to augmented oxidative stress. This would help to achieve consistency in interpreting obstetrical complications (preeclampsia, prematurity, or gestational diabetes). Generated hypotheses should target plausible mechanisms behind TE alterations and their stage-sensitive measures in gynecological cancer. New prospects are discussed in management and prognosis of endometriosis and premature ovarian failure (POF).

The Things We Don't Forget

I am pleased to present a work which marks a milestone in the history of public works and, more precisely, in that of permanent structures—a comprehensive dictionary of Civil Engineering terms. Since the beginning of time, Man has always tried to find a means to clear the obstacles which nature erected to displace him. With the first tree trunk thrown across a river, man sought to improve the crossing structure. After the invention of the wheel, and to satisfy his thirst for conquest (Roman ways), and comfort (aqueducts), man built bridges that became a preremptory necessity to move quickly. Thus, Man started to build wooden and masonry works. With the passing centuries, the builders became masters in the art of building masonry works. Then came the Industrial Revolution and the advent of the steel (1864), which was closely followed by the invention of the reinforced concrete (1855). The need for railways and improving the road network inspired great works of crossing such as viaducts and tunnels. The boom of the railway network and the development of the car required the construction of an increasing number of new structures. This phenomenon continues today with hundreds of structures built each year throughout the world.
