U.S. Government Printing Office Style Manual: An Official Guide to the Form and Style of Federal Government Printing, 2008 (Paper)

Langston Holiday lives with his no-nonsense mother in the gritty public housing projects of Poindexter Village, better known as "The Vil," after his father abandons them. Without any assistance, his mother is determined to make a man out of Langston—and she's doing a pretty good job. By the end of his senior year, Langston is one of the best high-school basketball players in the nation. That's when he makes the biggest decision of his life: to forgo college and enter the professional ranks. When word hits the streets about Langston's success, his newfound wealth stirs up plenty of envy in the projects, sparking a wave of unthinkable drama and crime. He's being relentlessly pursued by Toy Daniels, a has-been athlete who's determined to sign Langston to his newly formed sports agency. Langston's best friend, Jalen, becomes involved in shady dealings with people who are known for nothing but trouble, and his girlfriend, Tori, is quickly becoming fed up with Langston's wandering ways. Suddenly, Langston doesn't know who he can trust. This gripping novel from bestselling author Franklin White realistically depicts the pitfalls of basketball stardom, when large amounts of money fall into the hands of people who've never known anything but poverty and struggle.

Facial recognition software has improved by leaps and bounds over the past few decades, with error rates decreasing significantly within the past ten years. Though this is true, conditions such as poor lighting, obstructions, and profile-only angles have continued to persist in preventing wholly accurate readings. Face Recognition in Adverse Conditions examines how the field of facial recognition takes these adverse conditions into account when designing more effective applications by discussing facial recognition under real world PIE variations, current applications, and the future of the field of facial recognition research. The work is intended for academics, engineers, and researchers specializing in the field of facial recognition.

Envisioning Black Colleges

In this important, controversial, and at times troubling book, Sandra Whitworth looks behind the rhetoric to investigate from a feminist perspective some of the realities of military intervention under the UN flag. Whitworth contends that there is a fundamental contradiction between portrayals of peacekeeping as altruistic and benign and the militarized masculinity that underpins the group identity of soldiers. Examining evidence from Cambodia and Somalia, she argues that sexual and other crimes can be seen as expressions of a violent hypermasculinity that is congruent with militarized identities, but entirely incongruent with missions aimed at maintaining peace. She also asserts that recent efforts within the UN to address gender issues in peacekeeping operations have failed because they fail to challenge traditional understandings of militaries, conflict, and women. This unsettling critique of UN operations, which also investigates the interplay between gender and racial stereotyping in peacekeeping, has the power to change conventional perceptions, with considerable policy implications.

Face Recognition in Adverse Conditions

At the end of 1912 Jacques Schneider announced his intention of presenting an annual trophy for an international seaplane contest. There were only twelve Schneider contests but they were major international events with the major rivals being Britain and Italy, followed by France and the US. Biplane seaplanes and flying-boats predominated the early contests and some very advanced twin-float biplanes were among the winners as late as 1925. However, it was the monoplane which was to become the symbol of Schneider Trophy, with Supermarine and Macchi designs reaching the peak of racing seaplane performance. The final winning combination of Supermarine airframe and Rolls-Royce engine was to make a vital contribution to Britain's defence in 1940 in the form of the Rolls-Royce powered Hurricane and Spitfire. This book records the contests and, in considerable detail, the design, development and achievements of the participating aircraft; those which failed to take part; and the projects, some of which embodied very advanced ideas even if they were proved to be unrealistic.

A compilation of the recorded life, times, and influence of a Roman legend, Cincinnatus and the Citizen-Servant Ideal captures the essence of human virtue as it was embodied in the Roman Republic's earliest days. Describing Cincinnatus's recorded life and times, Hillyard traces the legend's major interpretations from its origin amidst early Roman culture through contemporary times. In its impact on some of the world's leading thinkers and leaders, such as Livy, George Washington, Henry Knox, Harry Truman, and others, the Cincinnatus legend is described in the many interesting forms it has taken over two millennia. Carried throughout the narrative is the timeless nature of the Cincinnatus ideal—the central issues of the role of citizen and leader in society.

The plans for this book began several years ago as I personally sought quality resources for my work with grieving families.

With such an abundance of homelectical materials in general, I was concerned that there seemed to be very little to offer guidance for the funeral setting. The goal of this book is to provide resource material for a setting that has so much potential for ministry. - From the Preface.

Restorative justice is often touted as the humane and politically progressive alternative to the rigid philosophy of retributive punishment that underpins many of the world's judicial systems. Emotionally seductive, its rhetoric appeals to a desire for a "right-relation" among individuals and communities, and offers us a vision of justice that allows for the mutual healing of victim and offender, and with it, a sense of communal repair. In *Compulsory Compassion*, Annalise Acorn, a one-time advocate for restorative justice, deconstructs the rhetoric of the restorative movement. Drawing from diverse legal, literary, philosophical, and autobiographical sources, she questions the fundamental assumptions behind that rhetoric: that we can trust wrongdoers' performances of contrition; that healing lies in a respectful, face-to-face encounter between victim and offender; and that the restorative idea of right-relation holds the key to a reconciliation of justice and accountability on the one hand, with love and compassion on the other.

Concepts are critical for the development and marketing of products and services. They constitute the blueprint for these products and services, albeit at the level of consumers rather than at the technical level. A good product concept can help make the product a success by guiding developers and advertising in the right direction. Yet, there is a dearth of both practical and scientific information about how to create and evaluate concepts. There has been little or no focus on establishing knowledge bases for concepts. Concept development is too often relegated to the so-called "fuzzy front end." *Concept Research in Food Product Design and Development* remedies this inattention to product concepts by providing a unique treatment of concepts for the business professional as well as for research scientists. The book begins with simple principles of concepts, moves forward to methods for testing concepts, and then on to more substantive areas such as establishing validity, testing internationally and with children, creating databases, and selling in new methods for concept testing. The book combines a "how to" business book with a detailed treatment of the different facets of concept research. As such, the book represents a unique contribution to business applications in food, and consumer research methods. The book is positioned specifically for foods, to maintain a focus on a coherent set of topics. *Concept Research in Food Product Design and Development* appeals to a wide variety of audiences: R&D, marketing, sensory analysts, and universities alike. Corporate R&D professionals will learn how to create strong concepts. Marketers will recognize how concepts are at the heart of their business. Sensory analysts will find the book a natural extension of their interest in product features.

University students will understand how concept research is a critical part of the “consumer-connection.” Concept Research in Food Product Design and Development is the definitive, innovative text in describing how to create, analyze, and capitalize upon new product concepts.

Quartet for the End of Time: A Novel

A “cinematic . . . page-turner and a compassionate analysis of faith, memory, responsibility, and consequence.”—Molly Antopol, Fiction Writers Review Inspired by and structured around the chamber piece of the same title by the French composer Olivier Messiaen, *Quartet for the End of Time* is a mesmerizing story of four lives irrevocably linked in a single act of betrayal. The novel takes us on an unforgettable journey beginning during the 1930s Bonus Army riots, when World War I veteran Arthur Sinclair is falsely accused of conspiracy and then disappears. His absence will haunt his son, Douglas, as well as Alden and Sutton Kelly, the children of a powerful U.S. congressman, as they experience—each in different ways—the dynamic political social changes that took place leading up to and during World War II. From the New Deal projects through which Douglas, newly fatherless, makes his living to Sutton’s work as a journalist, to Alden’s life as a code breaker and a spy, each character is haunted by the past and is searching for love, hope, and redemption in a world torn apart by chaos and war. Through the lives of these characters, as well as those of their lovers, friends, and enemies, the novel transports us from the Siberian Expedition of World War I to the underground world of a Soviet spy in the 1920s and 1930s, to the occultist circle of P. D. Ouspensky and London during the Blitz, to the German prison camp where Messiaen originally composed and performed his famous *Quartet for the End of Time*. At every turn, this rich and ambitious novel tells some of the less well-known stories of twentieth-century history with epic scope and astonishing power, revealing at every turn the ways in which history and memory tend to follow us, and in which absence has a palpable presence.

Using our favourite Springfield family as a case study, *Watching with The Simpsons* examines the textual and social role of parody in offering critical commentary on other television programs and genres. Jonathan Gray brings together textual theory, discussions of television and the public sphere, and ideas of parody and comedy. Including primary audience research, it focuses on how *The Simpsons* has been able to talk back to three of television's key genres - the sitcom, adverts and the news - and on how it holds the potential to short-circuit these genre's meanings, power, and effects by provoking reinterpretations and offering more media literate recontextualizations. Examining television and media studies theory, the text of *The Simpsons*, and the show's audience, Gray attempts to fully situate the show's parody and humour within the lived realities of its audiences. In doing so, he further explores the possibilities for popular entertainment television to discuss issues of political and social importance. A must read for any student of media studies.

Etched into America's consciousness is the United Negro College Fund's phrase "A mind is a terrible thing to waste." This book tells the multifaceted story of the organization's efforts on behalf of black colleges against the backdrop of the cold war and the civil rights movement. Founded during the post-World War II period as a successor to white philanthropic efforts, the UNCF nevertheless retained vestiges of outside control. In its early years, the organization was restrained in its critique of segregation and reluctant to lodge a challenge against institutional and cultural racism. Through cogent analysis of written and oral histories, archival documents, and the group's outreach and advertising campaigns, historian Marybeth Gasman examines the UNCF's struggle to create an identity apart from white benefactors and to evolve into a vehicle for black empowerment. The first history of the UNCF, *Envisioning Black Colleges* draws attention to the significance of black colleges in higher education and the role they played in Americans' struggle for equality. -- Philo A. Hutcheson

Many people have experienced psi, whether as a sense of having been in a place before (deja vu), hearing a voice in their head that gave them guidance, or following their intuition. For some, these events can be attributed to coincidence, but for psychics, such episodes occur more frequently and intensely, often manifesting in dreams, trances, signs, or sensations. ESP, Psychokinesis, and Psychics explores the people who profess to have such talents and surveys the different ways of reading psychic signs. It examines the skeptics and organizations who investigate supernatural phenomena and expose

possible fraud and looks at how the media portray psychic phenomena in everything from Harry Potter gazing into the Pensieve to TV shows like Ghost Whisperer and Medium to psychic crimefighters. Finally, readers are given the information they need to test and develop their own psychic abilities. Chapters include: Psychics - Who Are They and What Do They Do? Psychic Abilities, or How Do They Do That? Testing, Testing, or Does Psi Really Exist? Becoming a Psychic; and, Talking - and Listening - to the Animals.
