Basic Life Support Instructor Manual

This New American Red Cross CPR/AED for the Professional Rescuer Participant's Manual and course reflect changes based on the 2005 Consensus on Science for CPR and Emergency Cardiovascular Care (ECC) and the Guidelines 2005 for First Aid. Changes to this program and manual include simplifications to many of the CPR skill sequences, which helps improve retention. There have also been changes to help improve the quality of CPR. The integration of CPR skills into the operation of AEDs had changed to help improve survival from sudden cardiac arrest. Professional rescuers are now trained to use AEDs on adults and children. Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED. Additional training can be added to this course including bloodborne pathogens training and emergency oxygen administration. While the skills and knowledge that professional rescuers use are increasing, this training will help you meet your most important responsibility as a professional rescuer- the responsibility to save lives.

The chilling, unputdownable new novel from Dean Koontz, the master of suspense. A mother, a boy, and a desperate battle against the night. Woody Bookman hasn't spoken a word in his eleven years of life. Not when his father died in a freak

accident. Not when his mother Megan tells him she loves him. For Megan, keeping her boy safe and happy is what matters. But Woody believes a monstrous evil is behind his father's death and now threatens him and his mother. And he's not alone in his thoughts. An ally unknown to him is listening. Woody's fearful suspicions are taking shape. A malicious man driven by evil has set a depraved plan into motion. And he's coming after Woody and his mother. The reasons are primal. His powers are growing. And he's not alone. Praise for Devoted: 'Readers who were wondering how Koontz could possibly follow up his remarkable Jane Hawk series can breathe a sigh of relief. His new novel finds him still at the top of his game Scary, sickening (in that good way), and touching, this is a novel that will delight both the author's legion of fans and those who finally decide it's time to find out what this guy Koontz is all about.' The Zombie Notes Study Charts were some of the first study aids we developed to help our students learn a large amount of information very quickly. We know that this format works very well because hundreds of thousands of healthcare professionals and students, in hospitals and colleges all over the world, have used this handy, no-nonsense chart to help them successfully pass the ACLS certification exams.
