life and times of W.E.B. Du Bois • Takes an interdisciplinary approach to his life and works • Traces his radicalization over time • Pays particular attention to the effects of the Cold War and anticommunism on his philosophy • Provides key primary documents with explanations of their significance

Culture Centers in Higher Education

This survey of methodology provides a framework for understanding Africana Studies. Correlating this book to research and writing in Africana Studies, helps to extend the perplexity, paradox, and parley of social science and humanistic research. This book attempts to answer, what is Africana Studies with reference to an interdisciplinary body of knowledge? Africana Studies is the global Pan-Africanist study of African phenomena interpreted from an Afrocentric perspective. Among those scholars who contribute to this interdisciplinary body of knowledge, perspective signals the commonality in the school of thought. This book offers general definitions and descriptions of the qualitative and quantitative research.

A manifesto from one of America's most influential activists which disrupts political, economic, and social norms by reimagining the Black Radical Tradition.

Drawing on Black intellectual and grassroots organizing traditions, including the Haitian Revolution, the US civil rights movement, and LGBTQ rights and feminist movements, Unapologetic challenges all of us engaged in the social justice struggle to make the movement for Black liberation more radical, more queer, and more feminist. This book provides a vision for how social justice movements can become sharper and more effective through principled struggle, healing justice, and leadership development. It also offers a flexible model of what deeply effective organizing can be, anchored in the Chicago model of activism, which features long-term commitment, cultural sensitivity, creative strategizing, and multiple cross-group alliances. And Unapologetic provides a clear framework for activists committed to building transformative power, encouraging young people to see themselves as visionaries and leaders.

Routledge Handbook of Pan-Africanism

Since the publication of the first edition in 1977, Africa has established itself as a leading resource for teaching, business, and scholarship. This fourth edition has been completely revised and focuses on the dynamism and diversity of contemporary Africa. The volume emphasizes contemporary culture-civil and social issues, art, religion, and the political scene—and provides an overview of significant themes that bear on Africa's place in the world. Historically grounded, Africa provides a comprehensive view of the ways that African women and men have constructed their lives and engaged in collective

activities at the local, national, and global levels.

"Martha Biondi's superb book is a pioneering treatment of the integral role of courageous black students in the turbulent 60s. In our age of the Occupy Movement, we badly need this wonderful work!" --Cornel West, author of "Race Matters" ""The Black Revolution on Campus" is a passionate and powerful piece of scholarship about a dramatic moment in the evolution of American universities: the period in the 1960s and 1970s when the Black Power Movement clashed with the liberal sensibilities of Western cultural empire building. Biondi carefully demonstrates why this era of intellectual insurgency, led by Black students and their white allies, was significant. It allowed those whose stories had been left out of the curriculum to begin to speak truth to

power. But it also made space for other movements (such as feminism and gay rights) to become important parts of the contemporary academic curriculum. Biondi invites the reader to do more than bear witness to an important scholarly debate about the role of black studies on college campuses in the 1960s and 1970s. Her probing analysis illuminates enduring yet evolving truths about our larger culture and its myths of American life." --Lani Guinier, Bennett Boskey Professor of Law, Harvard Law School

"The Black Revolution on Campus is the first comprehensive account detailing the struggles for black studies within institutions of higher education in the United States. It suggests the enduring salience, and at times bitter consequences, of black struggles for inclusion, representation, and autonomy on college campuses and within university curricula. I know of no other work of its kind, and certainly no work as definitive." --Nikhil Pal Singh, author of "Black is a Country: Race and the Unfinished Struggle for Democracy"

"Martha Biondi's "The Black Revolution on Campus" is a judicious and empathetic history of the Black student movement. Reading the book reminds us of the forgotten stories and remarkable individuals who forged the organizations that moved history along. It makes us recognize how much the good side of the contemporary American academy is indebted to the courage and commitment of the people who put themselves on the line to bring justice into institutions that are often smug about their values and their own history. The promise of the Black Revolution is unfinished. Biondi's book is a reminder of those tasks that remain." --Vijay Prashad, author of "Uncle Swami: South Asians in America Today"

A Companion to African-American Studies

The twin acts of singing and fighting for freedom have been inseparable in African American history. *May We Forever Stand* tells an essential part of that story. With lyrics penned by James Weldon Johnson and music composed by his brother Rosamond, "Lift Every Voice and Sing" was embraced almost immediately as an anthem that captured the story and the aspirations of black Americans. Since the song's creation, it has been adopted by the NAACP and performed by countless artists in times of both crisis and celebration, cementing its place in African American life up through the present day. In this rich, poignant, and readable work, Imani Perry tells the story of the Black National Anthem as it traveled from South to North, from civil rights to black power, and from countless family reunions to Carnegie Hall and the Oval Office. Drawing on a wide array of sources, Perry uses "Lift Every Voice and Sing" as a window on the powerful ways African Americans have used music and culture to organize, mourn, challenge, and celebrate for more than a century.

Who Speaks for the Negro?

Offers a new conceptual framework rooted in mythological analysis to ground the field of *Africana* cultural memory studies. *Black Cultural Mythology* retrieves the concept of "mythology" from its Black Arts Movement origins and broadens its scope to illuminate the relationship between legacies of heroic survival, cultural memory, and creative production in the African diaspora. Christel N. Temple comprehensively surveys more than two hundred years of figures, moments, ideas, and canonical works by such visionaries as Maria Stewart, Richard Wright, Colson Whitehead, and Edwidge Danticat to map an expansive yet broadly overlooked intellectual tradition of Black cultural mythology and to provide a new conceptual framework for analyzing this tradition. In so doing, she at once reorients and stabilizes the emergent field of *Africana* cultural memory studies, while also staging a much broader intervention by challenging scholars across disciplines—from literary and cultural studies, history, sociology, and beyond—to embrace a more organic

vocabulary to articulate the vitality of the inheritance of survival. Christel N. Temple is Associate Professor of Africana Studies at the University of Pittsburgh. Allison Davis (1902–83), a preeminent black scholar and social science pioneer, is perhaps best known for his groundbreaking investigations into inequality, *Jim Crow America*, and the cultural biases of intelligence testing. Davis, one of America's first black anthropologists and the first tenured African American professor at a predominantly white university, produced work that had tangible and lasting effects on public policy, including contributions to *Brown v. Board of Education*, the federal Head Start program, and school testing practices. Yet Davis remains largely absent from the historical record. For someone who generated such an extensive body of work this marginalization is particularly surprising. But it is also revelatory. In *The Lost Black Scholar*, David A. Varel tells Davis's compelling story, showing how a combination of institutional racism, disciplinary eclecticism, and iconoclastic thinking effectively sidelined him as an intellectual. A close look at Davis's career sheds light not only on the racial

politics of the academy but also the costs of being an innovator outside of the mainstream. Equally important, Varel argues that Davis exemplifies how black scholars led the way in advancing American social thought. Even though he was rarely acknowledged for it, Davis refuted scientific racism and laid bare the environmental roots of human difference more deftly than most of his white peers, by pushing social science in bold new directions. Varel shows how Davis effectively helped to lay the groundwork for the civil rights movement.

Africana Studies

The new edition of *Africana Studies: A Survey of Africa and the African Diaspora* is an update of the second edition (1998) and incorporates new chapters that include expanded coverage of issues on women, health, terrorism, the African Union, and many others, as well as the most recent theories and methods in Africana studies. To date, *Africana Studies* remains the most comprehensive and most suitable text for both teachers and students interested in Africa and the Diaspora in the US, the Caribbean, Afro-Latin-America, and elsewhere. The book is divided into five parts: the state of the art of Africana studies; the evolution of the history of black people; analysis of the contributions of the black world; the present and future status of these peoples; and the societies and values of black people. The book also includes a chronology of significant events in the history of peoples of African descent and a number of maps.

In July 1919, an explosive race riot forever changed Chicago. For years, black southerners had been leaving the South as part of the Great Migration. Their arrival in Chicago drew the ire and scorn of many local whites, including members of the city's political leadership and police department, who generally sympathized with white Chicagoans and viewed black migrants as a problem population. During Chicago's Red Summer riot, patterns of extraordinary brutality, negligence, and discriminatory policing emerged to shocking effect. Those patterns shifted in subsequent decades, but the overall realities of a racially discriminatory police system persisted. In this history of Chicago from 1919 to the rise and fall of Black Power in the 1960s and 1970s, Simon Balto narrates the evolution of racially repressive policing in black neighborhoods as well as how black citizen-activists challenged that repression. Balto demonstrates that punitive practices by and inadequate protection from the police were central to black Chicagoans' lives long before the late-century "wars" on crime and drugs. By exploring the deeper origins of this toxic system, Balto reveals how modern mass incarceration, built upon racialized police practices, emerged as a fully formed machine of profoundly antiblack subjugation.

Are cultural centers ethnic enclaves of segregation, or safe havens that provide minority students with social support that promotes persistence and retention?

Though Black cultural centers boast a 40-year history, there is much misinformation about them and the ethnic counterparts to which they gave rise.

Moreover, little is known about their historical roots, current status, and future prospects. The literature has largely ignored the various culture center models, and the role that such centers play in the experiences of college students. This book fills a significant void in the research on ethnic minority cultural centers, offers the historic background to their establishment and development, considers the circumstances that led to their creation, examines the roles they play on campus, explores their impact on retention and campus climate, and provides guidelines for their management in the light of current issues and future directions. In the first part of this volume, the contributors provide perspectives on culture centers from the point of view of various racial/ethnic identity groups, Latina/o, Asian, American Indian, and African American. Part II offers theoretical perspectives that frame the role of culture centers from the point of view of critical race theory, student development theory, and a social justice framework. Part III focuses specifically on administrative and practice-oriented themes, addressing such issues as the relative merits of full- and part-time staff, of race/ethnic specific as opposed to multicultural centers, relations with the outside community, and integration with academic and student affairs to support the mission of the institution. For administrators and student affairs educators who are unfamiliar with these facilities, and

Download Ebook Africana Studies Survey African Diaspora lesltd

want to support an increasingly diverse student body, this book situates such centers within the overall strategy of improving campus climate, and makes the case for sustaining them. Where none as yet exist, this book offers a rationale and blueprint for creating such centers. For leaders of culture centers this book constitutes a valuable tool for assessing their viability, improving their performance, and ensuring their future relevance – all considerations of increased importance when budgets and resources are strained. This book also provides a foundation for researchers interested in further investigating the role of these centers in higher education.

Evidence of Being opens on a grim scene: Washington DC's gay black community in the 1980s, ravaged by AIDS, the crack epidemic, and a series of unsolved murders, seemingly abandoned by the government and mainstream culture. Yet in this darkest of moments, a new vision of community and hope managed to emerge. Darius Bost's account of the media, poetry, and performance of this time and place reveals a stunning confluence of activism and the arts. In Washington and New York during the 1980s and '90s, gay black men banded together, using creative expression as a tool to challenge the widespread views that marked them as unworthy of grief. They created art that enriched and reimagined their lives in the face of pain and neglect, while at the same time forging a path toward bold new modes of existence. At once a corrective to the predominantly

white male accounts of the AIDS crisis and an openhearted depiction of the possibilities of black gay life, Evidence of Being above all insists on the primacy of community over loneliness, and hope over despair.

W.E.B. Du Bois: A Life in American History

Linguists estimate that there are currently nearly 2,000 languages in Africa, a staggering figure that is belied by the relatively few national languages. While African national politics, economics, and law are all conducted primarily in the colonial languages, the cultural life of the majority of citizens is conducted in a bewildering Babel of local and regional dialects, making language itself the center of debates over multiculturalism, gender studies, and social theory. In *The Power of Babel*, the noted Africanist scholar Ali Mazrui and linguist Alamin Mazrui explore this vast territory of African language. *The Power of Babel* is one of the first comprehensive studies of the complex linguistic constellations of Africa. It draws on Ali Mazrui's earlier work in its examination of the "triple heritage" of African culture, in which indigenous, Islamic, and Western traditions compete for influence. In bringing the idea of the triple heritage to language, the Mazruis unravel issues of power, culture, and modernity as they are embedded in African linguistic life. The first section of the book takes a global perspective, exploring such issues as the Eurocentrism of much linguistic scholarship on Africa; part two takes an African perspective on a variety of issues from the linguistically disadvantaged position

of women in Africa to the relation of language policy and democratic development; the third section presents a set of regional studies, centering on the Swahili language's exemplification of the triple heritage. *The Power of Babel* unites empirical information with theories of nationalism and pluralism—among others—to offer the richest contextual account of African languages to date.

Jezebel Unhinged

In this book, Traci Parker examines the movement to racially integrate white-collar work and consumption in American department stores, and broadens our understanding of historical transformations in African American class and labor formation. Built on the goals, organization, and momentum of earlier struggles for justice, the department store movement channeled the power of store workers and consumers to promote black freedom in the mid-twentieth century. Sponsoring lunch counter sit-ins and protests in the 1950s and 1960s, and challenging discrimination in the courts in the 1970s, this movement ended in the early 1980s with the conclusion of the *Sears, Roebuck, and Co.* affirmative action cases and the transformation and consolidation of American department stores. In documenting the experiences of African American workers and consumers during this era, Parker highlights the department store as a key site for the inception of a modern black middle class, and demonstrates the ways that both work and consumption were battlegrounds for civil rights.

African American Consciousness focuses on ideas of culture, race, and class within the interdisciplinary matrix of Africana Studies. Even more important, it uses a methodology that emphasizes interpretation and the necessity of interdisciplinary research and writing in a global society. Worldview, culture, analytic thinking, and historiography can all be used as tools of analysis, and in the process of discovery, use pedagogy, and survey research of Africana history. Advancing the idea of Africana Studies, mixed methodology, and triangulation, the contributors provide alternative approaches toward examining this phenomena, with regard to place, space, and time. The essays in this volume include Reynaldo Anderson, "Black History dot.com" Greg Carr, "Black Consciousness, Pan-Africanism and the African World History Project" Karanja Carroll, "A Genealogical Review of the Worldview Concept and Framework in Africana Studies" Denise Martin, "Reflections on African Celestial Culture" Serie McDougal "Teaching Black Males" Demetrius Pearson, "Cowboys of Color" Pamela Reed, "Heirs to Disparity" and Andrew Smallwood, "Malcolm X's Leadership and Legacy." The researchers in this volume investigate, explore, and review patterns of functional, normative, and expressive behavior. The past and present of Africana culture is represented, showing how reflexivity can be an adjustable concept to organize, process, and interpret data. Moreover, humanism and social science demonstrate how researchers establish, extract, and identify the limitations and alternative

Handbook of Black Studies

"This book is unprecedented in the field in its approach and content. . . . A must for the serious student in African American studies."--Delores P. Aldridge, Emory University

The emergence of African American studies in the 1970s filled a critical gap in higher education. Now a prominent scholar who has helped to define the contours of that field integrates personal reflection with an analysis of its development to recount the political, cultural, and intellectual issues that helped shape the discipline. A participant in the Black Student Movement in its early years, Perry A. Hall provides an insider's look at the struggle to persuade academia to accept the mission of Black Studies and the struggle inside the movement to define its objectives. He examines how the discipline evolved within the context of the wider social revolution changing the face of America, showing how the presence of blacks on campuses brought about the need for new perspectives in college curricula. And because African American Studies today represents a variety of approaches, he examines how they evolved and how they interact both within the field and with other areas of knowledge. Hall critiques the popular "Afrocentric" approach in African American Studies, arguing that it is not synonymous with the discipline overall. He develops an alternative "transformationist" paradigm that builds on the idea of double-consciousness

Download Ebook Africana Studies Survey African Diaspora lesltd

advanced by W. E. B. Du Bois and shows how it can be used to sort out conceptions of black identity that have emerged from sociology and psychology. He explores the importance of vernacular culture--especially popular music--in creating unique frames of reference for African Americans and also applies his paradigm to education and public policy analysis. An important intellectual autobiography, Hall's work shows how insights gleaned over thirty years can be applied in the vineyards of academia today. Its message speaks clearly to scholars of his own generation and today's, and shows how African American Studies can continue to be relevant in the next century. The Author: Perry A. Hall is associate professor of African and Afro-American Studies at the University of North Carolina-Chapel Hill and a former member of the executive board of the National Council for Black Studies. His articles have appeared in *Western Journal of Black Studies*, *Word: A Black Culture Journal*, *Journal of Negro Education*, and the *Black Studies Handbook*.

The Call of Bilal

The author has written this book entitled 'Afrocentricity' especially for those Africans still in a confused state in order to show them the way to peace. Further he indicates that the book has created its own supporters and detractors and has also been at the core of intense debates about the de-colonizing of the African mind, the dismantling of America, and the destabilizing of the Eurocentric hegemony. This book is not meant to be unread, un-remarked upon,

or unheard. Afrocentrists have multiplied in the theaters, universities, unions, political organizations, schools, and corporations. The challenge to the white racial hierarchy has been intense and severe; there can be no hiding from the agency of awakened Africans. In the next few decades it is anticipated that a mighty revolution of values, symbols, and actions might bring about a more equitable society. This revolution for justice and liberty shall be led by the aroused black nation committed to a world of peace.

We Live for the We

Theologizing in Black is a creative and rigorous comparative study on black theological musings and liberative intellectual contemplations engaging the theological ethics and anthropology of both continental African theologians (Tanzania, Kenya, Democratic Republic of the Congo) and black theologians in the African Diaspora (Haiti, Trinidad, Jamaica, Antigua and Barbuda, United States). Using the pluralist approach to religion promoted by the philosopher of religion and theologian John Hick, the book is also an attempt to bridge an important gap in the comparative study of religion, Africana Studies, and Liberation theology, both in Africa and its diaspora. The book provides an analytical framework and intellectual critique of white Christian theologians who deliberately disengage with and exclude black and Africana theologians in their theological writings and conversations. From this vantage point, Africana critical theology is said to be a theology of contestation as it seeks to deconstruct white

supremacy in the theological enterprise. This book not only articulates a rhetoric of protest about the misrepresentation and underrepresentation of the humanity of African and black people in white theological imagination; it also enunciates a positive image of black humanity and congruently promulgates a constructive representation of blackness. The paramount goal of Africana theological anthropology and ethics is the preservation of life and promotion of human dignity and the sheer acknowledgement that the African people and people of African descent are bearers of the image of God.

It contains a collection of the most widely used theories and paradigms designed for exploring, explaining, and advancing Africana communities through science. The relevance, strengths, and weaknesses of every major method of data collection are explained as they relate to the lived experiences of the Black world. It stands alone as the only textbook that details empirical methods in the service of the collective advancement of Africana peoples.

When you think of a map of the United States, what do you see? Now think of the Seattle that begot Jimi Hendrix. The Dallas that shaped Erykah Badu. The Holly Springs, Mississippi, that compelled Ida B. Wells to activism against lynching. The Birmingham where Martin Luther King, Jr., penned his most famous missive. Now how do you see the United States? *Chocolate Cities* offers a new cartography of the United States—a “Black Map” that more accurately reflects the lived experiences and the future of Black life in America. Drawing on cultural sources such as film, music, fiction, and plays, and on traditional resources like Census data, oral histories, ethnographies, and health and wealth data, the book offers a new perspective for analyzing, mapping, and understanding the ebbs and flows of the Black American experience—all in the cities, towns,

neighborhoods, and communities that Black Americans have created and defended. Black maps are consequentially different from our current geographical understanding of race and place in America. And as the United States moves toward a majority minority society, *Chocolate Cities* provides a broad and necessary assessment of how racial and ethnic minorities make and change America's social, economic, and political landscape.

Africa, Fourth Edition

This is an ambitious and brilliant book by one of Africa's leading diaspora intellectuals. A combination of a researcher's field notes, a travelogue and personal memoir, it is unusual in African writing. It is the first book by an African scholar to take us on such an amazing analytical and narrative journey in search of African diasporas around the world from Latin America to the Caribbean, Europe and Asia. It is filled with analytical insights, captivating stories, and intriguing observations on the complex histories and experiences of African diasporas, their triumphs and tragedies, perils and possibilities, and their enduring struggles for belonging, for their humanity. Its inimitable passions are leavened by engaging humor, its scholarly analyses by a novelist's eye for local context and color. The author seeks to address the perplexing question of what it means to be a person of African descent living outside of the African continent. He offers the reader fascinating and richly textured portraits and surveys of the diversity of diasporic lives as well as the abiding connections of

the diaspora condition. What makes this book particularly gripping are the multilayered narratives, the braided stories and explorations of African diasporic lives across many contexts and places as well as the author's own life during the period of his travels from 2006 to 2009. Also skillfully interwoven are the author's daily encounters and observations, information and reflections from interviewees from all walks of life, and the larger structural contexts of diaspora struggles for enfranchisement and empowerment. For all the gruesome exclusions, vulnerabilities, and marginalities African diasporas have suffered in their various abodes, this is a remarkable tale of diasporic agency, a celebration of their lasting contributions to the construction of the modern world in all its manifestations. This book is part of the African World Series, edited by Toyin Falola, Frances Higginbotham Nalle Centennial Professor in History, University of Texas at Austin.

One of Essence's "10 Books We're Dying To Toss Into Our Summer Totes" From sneakers to leather jackets, a bold, witty, and deeply personal dive into Black America's closet In this highly engaging book, fashionista and pop culture expert Tanisha C. Ford investigates Afros and dashikis, go-go boots and hotpants of the sixties, hip hop's baggy jeans and bamboo earrings, and the #BlackLivesMatter-inspired hoodies of today. The history of these garments is deeply intertwined with Ford's story as a black girl coming of age in a Midwestern rust belt city. She experimented with the Jheri curl; discovered how wearing the wrong color tennis shoes at the roller rink during the drug and gang wars of the 1980s could get you beaten; and rocked oversized, brightly colored jeans and Timberlands at an elite boarding school where the white upper crust wore conservative wool shift dresses. *Dressed in Dreams* is a story of desire, access, conformity, and black innovation that explains

Ford talks about the pain of seeing black style appropriated by the mainstream fashion industry and fashion's power, especially in middle America. In this richly evocative narrative, she shares her lifelong fashion revolution—from figuring out her own personal style to discovering what makes Midwestern fashion a real thing too.

In *Jezebel Unhinged* Tamara Lomax traces the use of the jezebel trope in the black church and in black popular culture, showing how it is pivotal to reinforcing men's cultural and institutional power to discipline and define black girlhood and womanhood. Drawing on writing by medieval thinkers and travelers, Enlightenment theories of race, the commodification of women's bodies under slavery, and the work of Tyler Perry and Bishop T. D. Jakes, Lomax shows how black women are written into religious and cultural history as sites of sexual deviation. She identifies a contemporary black church culture where figures such as Jakes use the jezebel stereotype to suggest a divine approval of the “lady” while condemning girls and women seen as “hos.” The stereotype preserves gender hierarchy, black patriarchy, and heteronormativity in black communities, cultures, and institutions. In response,

black women and girls resist, appropriate, and play with the stereotype's meanings. Healing the black church, Lomax contends, will require ceaseless refusal of the idea that sin resides in black women's bodies, thus disentangling black women and girls from the jezebel narrative's oppressive yoke.

The Black Revolution on Campus

First published in 1965, this is a unique text in the history of the American Civil Rights Movement. Robert Penn Warren interviewed a wide range of African American leaders, activists, and artists across the country, among them Martin Luther King, Malcom X, and James Baldwin. Sections from the transcripts of these interviews are combined with the author's reflections on the interviewees and the Civil Rights Movement as a whole to create a powerful oral history of this all-important struggle. A new introduction by David W. Blight places Warren's book in historical perspective. " In this new edition introduced by the eminent historian David Blight, *Who Speaks for the Negro?* reveals a provocative admixture of history's variance. Warren's book is a burden of the past from which we cannot escape. It summons us to awaken a more vital national heartbeat of reparations for an American dilemma."—Houston Baker, Vanderbilt University

today A stark disparity exists between black and white youth experiences in the justice system today. Black youths are perceived to be older and less innocent than their white peers. When it comes to incarceration, race trumps class, and even as black youths articulate their own experiences with carceral authorities, many Americans remain surprised by the inequalities they continue to endure. In this revealing book, Carl Suddler brings to light a much longer history of the policies and strategies that tethered the lives of black youths to the justice system indefinitely. The criminalization of black youth is inseparable from its racialized origins. In the mid-twentieth century, the United States justice system began to focus on punishment, rather than rehabilitation. By the time the federal government began to address the issue of juvenile delinquency, the juvenile justice system shifted its priorities from saving delinquent youth to purely controlling crime, and black teens bore the brunt of the transition. In New York City, increased state surveillance of predominantly black communities compounded arrest rates during the post-World War II period, providing justification for tough-on-crime policies. Questionable police practices, like stop-and-frisk, combined with media sensationalism, cemented the belief that black youth were the primary cause for concern. Even before the War on Crime, the stakes were clear: race would continue to be the crucial determinant in American notions of crime and delinquency, and black youths condemned with a stigma of criminality would continue to confront the overwhelming power of the state.

Theologizing in Black

The fullest account to date of African American young people in a segregated city *Coming of Age in Jim Crow DC* offers a complex narrative of the everyday lives of black young people in a racially, spatially, economically, and politically restricted Washington, DC, during the 1930s. In contrast to the ways in which young people have been portrayed by researchers, policy makers, law enforcement, and the media, Paula C. Austin draws on previously unstudied archival material to present black poor and working class young people as thinkers, theorists, critics, and commentators as they reckon with the boundaries imposed on them in a Jim Crow city that was also the American emblem of equality. The narratives at the center of this book provide a different understanding of black urban life in the early twentieth century, showing that ordinary people were expert at navigating around the limitations imposed by the District of Columbia's racially segregated politics. *Coming of Age in Jim Crow DC* is a fresh take on the New Negro movement, and a vital contribution to the history of race in America.

The Afrocentric Paradigm

This study introduces the nature, history, and interventions of two theoretical-political cultural productions that formally emerged in U.S. educational institutions in the late 1960s as a part of the Black Freedom movement: Black/Africana studies and Black/Africana biblical studies.

Africana

A warm, wise, and urgent guide to parenting in uncertain times, from a longtime reporter on race, reproductive health, and politics In *We Live for the We*, first-time mother Dani McClain sets out to understand how to raise her daughter in what she, as a black woman, knows to be an unjust--even hostile--society. Black women are more likely to die during pregnancy or birth than any other race; black mothers must stand before television cameras telling the world that their slain children were human beings. What, then, is the best way to keep fear at bay and raise a child so she lives with dignity and joy? McClain spoke with mothers on the frontlines of movements for social, political, and cultural change who are grappling with the same questions. Following a child's

development from infancy to the teenage years, *We Live for the We* touches on everything from the importance of creativity to building a mutually supportive community to navigating one's relationship with power and authority. It is an essential handbook to help us imagine the society we build for the next generation.

May We Forever Stand

How do people in the African diaspora practice Islam? While the term "Black Muslim" may conjure images of Malcolm X and Muhammad Ali, millions of African-descended Muslims around the globe have no connection to the American-based Nation of Islam. *The Call of Bilal* is a penetrating account of the rich diversity of Islamic religious practice among Africana Muslims worldwide. Covering North Africa and the Middle East, India and Pakistan, Europe, and the Americas, Edward E. Curtis IV reveals a fascinating range of religious activities--from the observance of the five pillars of Islam and the creation of transnational Sufi networks to the veneration of African saints and political struggles for racial justice. Weaving together ethnographic fieldwork and historical perspectives, Curtis shows how Africana Muslims interpret not only their religious identities but also their attachments to the African diaspora. For some, the dispersal of African people across time and space has been understood as a mere physical scattering or perhaps an economic opportunity. For others, it has been a metaphysical and spiritual exile of the soul from its sacred land and eternal home.

Chocolate Cities

On March 31, 1968, over 500 Black nationalists convened in Detroit to begin the process of securing independence from the United States. Many concluded that Black Americans' best remaining hope for liberation was the creation of a sovereign nation-state, the Republic of New Afrika (RNA). New Afrikan citizens traced boundaries that encompassed a large portion of the South--including South Carolina, Georgia, Alabama, Mississippi, and Louisiana--as part of their demand for reparation. As champions of these goals, they framed their struggle as one that would allow the descendants of enslaved people to choose freely whether they should be citizens of the United States. New Afrikans also argued for financial restitution for the enslavement and subsequent inhumane treatment of Black Americans. The struggle to "Free the Land" remains active to this day. This book is the first to tell the full history of the RNA and the New Afrikan Independence Movement. Edward Onaci shows how New Afrikans remade their lifestyles and daily activities to create a self-consciously revolutionary culture, and argues that the RNA's tactics and ideology were essential to the evolution of Black political struggles. Onaci expands the story of Black Power politics, shedding new light on the long-term legacies of mid-century Black Nationalism.
