This pocket guide is the one book to read for everyone who wants to learn about Scrum. The book covers all roles, rules and the main principles underpinning Scrum, and is based on the Scrum Guide Edition 2013. A broader context to this fundamental description of Scrum is given by describing the past and the future of Scrum. The author, Gunther Verheyen, has created a concise, yet complete and passionate reference about Scrum. The book demonstrates his core view that Scrum is about a journey, a journey of discovery and fun. He designed the book to be a helpful guide on that journey. Ken Schwaber, Scrum co-creator says that this book currently is the best available description of Scrum around. The book combines some rare characteristics:

- It describes Scrum in its entirety, yet places it in a broader context (of past and future).
- The author focuses on the subject, Scrum, in a way that it truly supports the reader. The book has a language and style in line with the philosophy of Scrum.
- The book shows the playfulness of Scrum.

David Starr and Ralph Jocham, Professional Scrum trainers and early agile adopters, say that this is the ultimate book to be advised as follow-up book to the students they teach Scrum to and to teams and managers of organizations that they coach Scrum to.

Lettering as Drawing

Show biz memoir at its name-dropping, bridge-burning, profane best: the music industry's most outspoken, outrageous, and phenomenally successful executive delivers a rollicking memoir of pop music's heyday. During the 1970s and '80s the music business was dominated by a few major labels and artists such as Michael Jackson, Bruce Springsteen, the Rolling Stones, Bob Dylan, Billy Joel, Paul Simon, Barbra Streisand and James Taylor. They were all under contract to CBS Records,

making it the most successful label of the era. And, as the company's president, Walter Yetnikoff was the ruling monarch. He was also the most flamboyant, volatile and controversial personality to emerge from an industry and era defined by sex, drugs and debauchery. Having risen from working-class Brooklyn and the legal department of CBS, Yetnikoff, who freely admitted to being tone deaf, was an unlikely label head. But he had an uncanny knack for fostering talent and intimidating rivals with his appalling behavior—usually fueled by an explosive combination of cocaine and alcohol. His tantrums, appetite for mind-altering substances and sexual exploits were legendary. In Japan to meet the Sony executives who acquired CBS during his tenure, Walter was assigned a minder who confined him to a hotel room. True to form, Walter raided the minibar, got blasted and, seeing no other means of escape, opened a hotel window and vented his rage by literally howling at the moon. In *Howling at the Moon*, Yetnikoff traces his journey as he climbed the corporate mountain, danced on its summit and crashed and burned. We see how Walter became the father-confessor to Michael Jackson as the King of Pop reconstructed his face and agonized over his image while constructing *Thriller* (and how, after it won seven Grammys, Jackson made the preposterous demand that Walter take producer Quincy Jones's name off the album); we see Walter, in maniacal pursuit of a contract, chase the Rolling Stones around the world and nearly come to blows with Mick Jagger in the process; we get the tale of how Walter and Marvin Gaye—fresh from the success of "Sexual Healing"—share the same woman, and of how Walter bonds with Bob Dylan

because of their mutual Jewishness. At the same time we witness Yetnikoff's clashes with Barry Diller, David Geffen, Tommy Mottola, Allen Grubman and a host of others. Seemingly, the more Yetnikoff feeds his cravings for power, sex, liquor and cocaine, the more profitable CBS becomes—from \$485 million to well over \$2 billion—until he finally succumbs, ironically, not to substances, but to a corporate coup. Reflecting on the sinister cycle that left his career in tatters and CBS flush with cash, Yetnikoff emerges with a hunger for redemption and a new reverence for his working-class Brooklyn roots. Ruthlessly candid, uproariously hilarious and compulsively readable, *Howling at the Moon* is a blistering *You'll Never Eat Lunch in this Town Again* of the music industry.

Molecular Visions (Organic, Inorganic, Organometallic) Molecular Model Kit #1 by Darling Models to accompany Organic Chemistry

This book discloses a great deal of Bonhoeffer's family context, social world, and cultural milieu. Events from his life are recounted in a way that embodies and illuminates his theology. Characters and situations that represent Nazi types and attitudes are a form of social criticism and help to explain Bonhoeffer's participation in the resistance movement and the plot to kill Adolf Hitler, for which he was hanged.

Molecular models are as vital a tool for the study of chemistry as calculators are for the study of mathematics. Molecular Visions models may be assembled in infinite combinations enabling the user to construct not only familiar configurations but also undiscovered possibilities. Models are intended to inspire the imagination, stimulate thought, and assist the visualization process. They present the user with a solid form of an abstract object that can otherwise only be visualized by the chemist. While chemistry textbooks use letters and graphics to describe molecules, molecular models make them "real". MOLECULAR VISIONS Organic Kit #1 is in a green plastic box, 9"x4"x2"

Live in the Moment came about by the grace of God. We can look at the past for anything and still cannot find what we are looking for. If we are living in the moment, what can go wrong? The past has gone, and the moment is what you can see. Life is one big road with many signs. We create so many signs and thoughts we forget and get lost in them. To my awareness if we cannot live in the present moment, then we cannot truly enjoy life, because the past is gone and the future is living in the moment.

Typographic organization has always been a complex system in that there are so many elements at play, such as hierarchy, order of reading, legibility, and contrast. In *Typographic Systems*, Kim Elam, author of our bestselling books, *Geometry of Design* and *Grid Systems*, explores eight major structural frameworks beyond the grid including random, radial, modular, and bilateral systems. By taking the reader through exercises, student work, and professional examples, Elam offers a broad

range of design solutions. Once essential visual organization systems are understood the designer can fluidly organize words or images within a structure, combination of structures, or a variation of a structure. With clarity and substance, each system from the structured axis to the nonhierarchical radial array is explained and explored so that the reader comes away with a better understanding of these intricate complex arrangements. *Typographic Systems* is the seventh title in our bestselling *Design Briefs* series, which has sold more than 100,000 copies worldwide.

Madness & Art

Recently interest has surged in what Jean Dubuffet called Art Brut, "raw art" produced by persons operating outside cultural norms, reflecting inner need rather than any "official" artistic attitude. Of the known practitioners of Art Brut, one of

the most gifted was the Swiss peasant Adolf Wölfli. From 1895, when he was thirty-one, until his death in 1930, Wölfli was incarcerated in Waldau hospital, severely afflicted with rage and depression. Supplied with colored pencils and paper by his primary physician, Walter Morgenthaler, he began to draw. Morgenthaler's pathbreaking study of Wölfli and his art, published in 1921, aimed at the center of contemporary debates about the relationships between creativity, madness, and art. This first English-language edition includes twenty-four color reproductions of Wölfli's art and Wölfli's brief account of his own life.

Helps to Latin Translation at Sight Edmund Luce The aim of the present book is to help boys to translate at sight. Of the many books of unseen translation in general use few exhibit continuity of plan as regards the subject-matter, or give any help beyond a short heading. The average boy, unequal to the task before him, is forced to draw largely upon his own invention, and the master, in correcting written unseens, has seldom leisure to do more than mark mistakes—a method of correction almost useless to the boy, unless accompanied by full and careful explanation when the written work is given back. Now that less time is available for Latin and Greek, new methods of teaching them must be adopted if they are to hold their own in our public schools. When Lord Dufferin could say, 'I am quite determined, so far as care and forethought can prevent it, that the ten best years of my boy's life shall not be spent (as mine were) in nominally learning two dead languages without being able to translate an ordinary paragraph from either without the aid of a dictionary;' and Dr. Reid could write, 'It is not too much to say that a large number of boys pass through our schools without ever dreaming that an ancient writer could pen three consecutive sentences with a connected meaning: chaos is felt to be natural to ancient literature: no search is made for sense, and the Latin or Greek book is looked upon as a more or less fortuitous concourse of words;' when Dr. Rouse can assert, 'The public schoolboy at nineteen is unable to read a simple Latin or Greek book with ease, or to express a simple series of thoughts without atrocious blunders: he has learnt from his classics neither accuracy nor love of beauty and truth'-it is obvious that, for the average

boy, the system of perfunctorily prepared set-books and dashed-off unseens is a failure. We are delighted to publish this classic book as part of our extensive Classic Library collection. Many of the books in our collection have been out of print for decades, and therefore have not been accessible to the general public. The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature, and our view is that this is a significant literary work, which deserves to be brought back into print after many decades. The contents of the vast majority of titles in the Classic Library have been scanned from the original works. To ensure a high quality product, each title has been meticulously hand curated by our staff. Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work. We hope that you will enjoy this wonderful classic work, and that for you it becomes an enriching experience.

The author of *The Siege* “provides readers with what is perhaps . . . the finest exposition of a parent’s decades-long experience with a child with autism” (Jeffrey L. Geller, MD, MPH, Psychiatric Services). *Exiting Nirvana* details Clara Claiborne Park’s continuing efforts to have her adult daughter Jessy develop as an artist and connect with our world. “Park has been both mother and anthropologist, recording verbal and social breakthroughs and setbacks, administering praise and succor.

She describes the serene insularity of the autistic's 'Nirvana,' and observes collisions between the autistic and external worlds. She's urged Jessy to enter, 'yet never entirely,' the extraordinary dailiness inhabited by nonautistic people. In incisive, often exquisite prose, Park affords entry into Jessy's and her own remarkable journey between the two" (Publishers Weekly). "Beautifully written . . . a fascinating excursion into an otherworldly mind."—The New York Times "Park's second book on her daughter Jessy (the first appeared in 1967, when Jessy was eight) is a perceptive, detailed, and empathetic account not of autism but of the experience of autism . . . A warm, levelheaded, neither overly optimistic nor overly glorified book that proves very rewarding."—Booklist "This beautifully crafted portrait of an autistic adult artist includes color reproductions of Jessy's paintings, with descriptions in her own handwriting."—Library Journal "This beautifully written book is must-reading—and not only for those seeking an understanding of autism."—Bernard Rimland, Director, The Autism Research Institute
