Reveals the secret spiritual exercises of the Bektashi Order of Sufis • Shows how this order, also known as Oriental Freemasonry, preserves the ancient spiritual doctrines forgotten by modern Freemasonry • Explains how to transform the soul into the alchemical Magnum Opus by combining Masonic grips and the abbreviated letters of the Qur'an • Includes a detailed biography of Baron von Sebottendorff

Originally published in Germany in 1924, this rare book by Baron Rudolf von Sebottendorff reveals the secret spiritual exercises of the Bektashi Order of Sufis as well as how this order, also known as Oriental Freemasonry, preserves the ancient spiritual doctrines forgotten by modern Freemasonry. Sebottendorff explains how the mysterious abbreviated letters found in the Qur'an represent formulas for perfecting the spirit of the individual. When combined with Masonic hand signs and grips and conducted accordingly to a precise schedule, these formulas incorporate spiritual power into the body and transform the soul from its base state into a noble, godlike state: the Magnum Opus of the medieval alchemists. Laying out the complete program of spiritual exercises, Sebottendorff

explains each abbreviated word-formula in the Qur'an, the hand gestures that go with them, and the exact order and duration for each exercise. Including a detailed biography of Sebottendorff and an examination of alchemy's Islamic heritage, this book shows how the traditions of Oriental Freemasonry can ennoble the self and lead to higher knowledge.

The Encyclopedia of Magic and Alchemy

Al-Kimia-The Mystical Islamic Essence of the Sacred Art Of Alchemy by John Eberly presents a condensed history of Alchemy told through concise biographies of early Sufi Masters. Chapters examine occult areas of alchemical and spiritual interest such as jafr, an exegetical Qur'anic science akin to Hebrew Qabala; the Qiyamat or 'Great Resurrection', of the heretical Ismaili sect; the contrary path of the saintly Malamatiyya or 'blameworthy ones'; Hermetic color theory, and 'hidden' art history. A glossary of transliterated terms is appended that will greatly help the beginner as well as the advanced student of these subjects.

How might understandings of environmentalism and the environmental humanities shift by incorporating Islamic perspectives? In this book, Anna M. Gade explores

the religious and cultural foundations of Islamic environmentalisms. She blends textual and ethnographic study to offer a comprehensive and interdisciplinary account of the legal, ethical, social, and empirical principles underlying Muslim commitments to the earth. *Muslim Environmentalisms* shows how diverse Muslim communities and schools of thought have addressed ecological questions for the sake of this world and the world to come. Gade draws on a rich spectrum of materials—scripture, jurisprudence, science, art, and social and political engagement—as well as fieldwork in Indonesia and Southeast Asia. The book brings together case studies in disaster management, educational programs, international development, conservation projects, religious ritual and performance, and Islamic law to rethink key theories. Gade shows that the Islamic tradition leads us to see the environment as an ethical idea, moving beyond the established frameworks of both nature and crisis. *Muslim Environmentalisms* models novel approaches to the study of religion and environment from a humanistic perspective, reinterpreting issues at the intersection of numerous academic disciplines to propose a postcolonial and global understanding of environment in terms of consequential relations.

Al-Kimia

A series of gatherings took place in 2006 to discuss the contemporary relevance of the ancient sacred science of hermeticism, or alchemy. This book is a partial record of those meetings, focusing on finding a spiritual and cultural path for the healing of the current ecological crisis. Peter Lamborn Wilson, explores the many ramifications of the alternative worldview offered by Hermeticism; Christopher Bamford provides a broad historical overview of the tradition from the Ancient Mysteries to contemporary manifestations of the alchemical tradition; while Kevin Townley brings a practical dimension, teaching the preparation of herbal elixirs and demonstrating that cosmology and philosophy can become a truly healing path for the Earth.

Islam and the Modern Age

This book is one of the many Islamic publications distributed by Mustafa Organization throughout the world in different languages with the aim of conveying the message of Islam to the people of the world. Mustafa Organization is a registered Organization that operates and is sustained through collaborative efforts of volunteers in many countries around the world, and it welcomes your

involvement and support. Its objectives are numerous, yet its main goal is to spread the truth about the Islamic faith in general and the Shi`a School of Thought in particular due to the latter being misrepresented, misunderstood and its tenets often assaulted by many ignorant folks, Muslims and non-Muslims. Organization's purpose is to facilitate the dissemination of knowledge through a global medium, the Internet, to locations where such resources are not commonly or easily accessible or are resented, resisted and fought!

Empire of the Islamic World

Philippus Aureolus Theophrastus Bombast von Hohenheim, who called himself Paracelsus, stands at the cusp of medieval and modern times. A contemporary of Luther, an enemy of the medical establishment, a scourge of the universities, an alchemist, an army surgeon, and a radical theologian, he attracted myths even before he died. His fantastic journeys across Europe and beyond were said to be made on a magical white horse, and he was rumored to carry the elixir of life in the pommel of his great broadsword. His name was linked with Faust, who bargained with the devil. Who was the man behind these stories? Some have accused him of being a charlatan, a windbag who filled his books with wild speculations and invented words. Others claim him as the father of modern medicine. Philip Ball exposes a more complex truth in *The Devil's Doctor*—one that emerges only by entering into Paracelsus's time. He explores the intellectual, political, and religious

undercurrents of the sixteenth century and looks at how doctors really practiced, at how people traveled, and at how wars were fought. For Paracelsus was a product of an age of change and strife, of renaissance and reformation. And yet by uniting the diverse disciplines of medicine, biology, and alchemy, he assisted, almost in spite of himself, in the birth of science and the emergence of the age of rationalism. The Miracle of Islamic Science

In this book, sixteen leading scholars address themselves to providing as full an account of medieval science as current knowledge permits. Designed to be introductory, the authors have directed their chapters to a beginning audience of diverse readers.

Kimiya-e Saadat-The Alchemy of Happiness

The Alchemy of Happiness was an attempt to show ways in which the lives of a Sufi could be based on what is demanded by Islamic law. This book allowed Al Ghazzali to considerably reduce the tensions between the scholars and mystics. The influence of Al-Ghazzali upon both the Christian and Islamic thinkers of the Middle

Ages and beyond is being more and more widely documented.

The Islamic Art and Architecture

This work examines the relevance of traditional Islamic thought and practices for a lasting solution to the current environmental crisis. The book argues that only a revival of the traditional worldview which perceives all entities of nature as signs of God can effectively respond to the crisis our planet faces.

Although little known, cannabis and other psychoactive plants held a prominent and important role in the Occult arts of Alchemy and Magic, as well as being used in ritual initiations of certain secret societies. Find out about the important role cannabis played in helping to develop modern medicines through alchemical works. Cannabis played a pivotal role in spagyric alchemy, and appears in the works of alchemists such as Zosimos, Avicenna, Lull, Paracelsus, Cardano and Rabelais. Cannabis also played a pivotal role in medieval and renaissance magic and recipes with instructions for its use appear in a number of influential and important grimoires such as the Picatrix, Sepher Raxiel: Liber Salomonis, and The Book of Oberon. Could cannabis be the Holy Grail? With detailed historical

references, the author explores the allegations the Templars were influenced by the hashish ingesting Assassins of medieval Islam, and that myths of the Grail are derived from the Persian traditions around the sacred beverage known as haoma, which was a preparation of cannabis, opium and other drugs. Many of the works discussed, have never been translated into English, or published in centuries. The unparalleled research in this volume makes it a potential perennial classic on the subjects of both medieval and renaissance history of cannabis, as well as the role of plants in the magical and occult traditions.

The Islamic Review

A myth-shattering view of the Islamic world's myriad scientific innovations and the role they played in sparking the European Renaissance. Many of the innovations that we think of as hallmarks of Western science had their roots in the Arab world of the middle ages, a period when much of Western Christendom lay in intellectual darkness. Jim al- Khalili, a leading British-Iraqi physicist, resurrects this lost chapter of history, and given current East-West tensions, his book could not be timelier. With transporting detail, al-Khalili places readers in the hothouses of the Arabic Enlightenment, shows how they led to Europe's cultural awakening, and poses the question: Why did the Islamic world enter its own dark age after such a dazzling flowering?

Unlike other vocabulary guides that require the rote memorization of literally thousands of words, this book starts from the premise that using the etymological connections between Spanish and English words—their common derivations from Latin, Greek, and other languages—is the most effective way to acquire and remember vocabulary. This approach is suitable for beginners as well as for advanced students. Teachers of the language will also find much material that can be used to help motivate their students to acquire, and retain, Spanish vocabulary. Spanish Vocabulary is divided into four parts and four annexes: Part I provides background material on the origins of Spanish and begins the process of presenting Spanish vocabulary. Part II presents "classical" Spanish vocabulary—words whose form (in both Spanish and English) is nearly unchanged from Latin and Greek. Part III deals with "popular" Spanish vocabulary, which underwent significant changes in form (and often meaning) during the evolution from Latin to Spanish. A number of linguistic patterns are identified that will help learners recognize and remember new vocabulary. Part IV treats a wide range of themes, including words of Germanic and Arabic origin, numbers, time, food and animals, the family, the body, and politics. Annex A: Principal exceptions to the "Simplified Gender Rule" Annex B: 700 words whose relations, if any, to English words are not immediately obvious Annex C: -cer verbs and related words Annex D: 4,500 additional words, either individually or in groups, with English

Muslim Environmentalisms

Spiritual attainment has frequently been described as a transformation whereby a human's leaden, dull nature is returned to its golden state. This wonderfully insightful volume introduces some of the metaphors useful for establishing attitudes required for the soul's advancement: trust, confidence, hope, and detachment. It is a reminder that when any substance or entity undergoes dissolution, it must eventually be resolved or re-crystalized in a new, possibly higher and more noble form.

The Devil's Doctor

One of the distinguished schools of Islamic spiritual discipline, the Naqshbandi Sufi Order has a long and illustrious history from the first days of Islam. Led by the shaykhs of the Golden Chain-inheritors of spiritual knowledge from Prophet Muhammad-the Naqshbandi Order has always played a central, pivotal role in the life of people in the Muslim world and survived the turmoil and tribulations of the past century to remain one of the few authentic mystical traditions maintaining a living link with its ancient past. The extraordinary vision of the Naqshbandi Saints

was manifest in their establishment of fixed devotions and daily practices firmly rooted in the Qur'an and Sunnah of the Prophet. These practices have enabled devout seekers to awaken certainty of belief and to attain stations of nearness to the Divine Presence. The renewed prominence of this order at the turn of the 21st century, due to the indefatigable striving of Mawlana Shaykh Muhammad Nazim al-Haqqani, signals an impending change to our society in which aspirants to Divine Service will be granted to transcend the bounds of the physical senses in order to fulfill the unexplored potential in each human heart. The Naqshbandi Devotions are a source of light and energy, an oasis in a worldly desert. Through the manifestations of Divine Blessings bestowed on the practitioners of these magnificent rites, they will be granted the power of magnanimous healing, by which they seek to cure the hearts of mankind darkened by the gloom of spiritual poverty and materialism. We pray that each person who picks up this book of devotions with sincere intention to observe any of its efficacious practices will receive a portion of the blessings and manifestations bestowed on the greatest saints of earlier times.

Science in the Middle Ages

With academic courses either encouraging commercialism, or cultivating zealots, Chittick states that it is impossible to understand classical Islamic texts without the years of contemplative study that are anathema to the modern education system. Insisting upon a return to the ways of the ancient wisdom tradition, which saw the quest for knowledge of the soul, the world, and God as a unifying spiritual discipline, Chittick maintains that the study of Islamic texts cannot be treated separately from self-understanding. Fascinating, radical, and a true challenge to modern trends in academic study, this book opens a new debate in Islamic

thought.

Women with Mustaches and Men Without Beards

In *Reading Darwin in Arabic*, Marwa Elshakry questions current ideas about Islam, science, and secularism by exploring the ways in which Darwin was read in Arabic from the late 1860s to the mid-twentieth century. Borrowing from translation and reading studies and weaving together the history of science with intellectual history, she explores Darwin's global appeal from the perspective of several generations of Arabic readers and shows how Darwin's writings helped alter the social and epistemological landscape of the Arab learned classes. Providing a close textual, political, and institutional analysis of the tremendous interest in Darwin's ideas and other works on evolution, Elshakry shows how, in an age of massive regional and international political upheaval, these readings were suffused with the anxieties of empire and civilizational decline. The politics of evolution infiltrated Arabic discussions of pedagogy, progress, and the very sense of history. They also led to a literary and conceptual transformation of notions of science and religion themselves. Darwin thus became a vehicle for discussing scriptural exegesis, the conditions of belief, and cosmological views more broadly. The book also acquaints readers with Muslim and Christian intellectuals, bureaucrats, and theologians, and concludes by exploring Darwin's waning influence on public and intellectual life in the Arab world after World War I. *Reading Darwin in Arabic* is an engaging and

powerfully argued reconceptualization of the intellectual and political history of the Middle East.

Aus der geistigen Erbmasse der römischen Spätantike entstanden zwei Religionssysteme: das kaiserzeitliche Christentum und der Islam. Beide haben ihre spezifischen Probleme mit der Rezeption des vorgefundenen "Wissens der Alten" und mit den weltlich umtriebigen τέχναί/artes. Beide Religionssysteme bilden spezifische atechnische Attraktionsbereiche: Diese könnten wir in der christlichen Tradition mit dem augustinischen Terminus "civitas dei" charakterisieren (Kapitel V). Die aktuelle Diskussion zeigt, dass die wichtigsten Ereignisse und Daten der muslimischen Geschichte selbst unter den Gebildeten offensichtlich wenig bekannt sind. So brauchen wir, bevor wir die "Einstellungen zu den artes" untersuchen, einen differenzierenden Blick für die bedeutendsten Normen und Strömungen in der muslimischen Geisteswelt. Die Auseinandersetzung mit der geistigen Erbmasse der Antike hat von den drei Zweigen der artes die Wissenschaften und die Philosophie ganz anders erfasst als die produktiven Techniken und die
