This chapter addresses family-centered care as central to the philosophy of palliative care. It describes illness as being incorporated into every aspect of family life. Family and illness are shown to be a biopsychosocial model—the fit between family strengths and vulnerabilities in relation to the psychosocial demands over

A malocclusion is a misalignment or incorrect relation between the teeth of the two dental arches when they approach each other as the jaws close. The term was coined by Edward Angle, the "father of modern orthodontics", as a derivative of occlusion. This refers to the manner in which opposing teeth meet (mal-+ occlusion = "incorrect occlusion"). The malocclusion classification is based on the
