An authoritative account by the historian and Korean War vet offers "a comprehensive picture of the war . . . and riveting tales of heroics . . . Gripping" (The Washington Post Book World). Winner of the Westminster Medal for Military Literature On June 25, 1950, the North Korean People's Army shocked American troops by crossing the 38th parallel into South Korea. After five years of relative quiet following the close of World War II, the US Army was unprepared to face a battle-ready enemy. After an initial defeat, General MacArthur turned the tides along with significant contributions from UN allies.

Joining the Americans were troops from Britain, Australia, Canada, New Zealand, South Africa, Turkey, and elsewhere, working together despite problems of culture and logistics. In *The Korean War*, Michael Hickey frames the conflict in the larger context of international power politics. A veteran of the war himself, he recounts such masterstrokes as MacArthur's landing behind the enemy lines at Inchon, the drama of the glorious Glosters episode, and both collaboration and mutiny in the prisoner-of-war camps of either side. Drawing on many previously unexamined sources from several countries, including recently declassified documents, regimental archives, diaries, and interviews, Hickey adds extensively to our knowledge of one of the most significant conflicts of modern times. "[A] fine, opinionated contribution to Korean War literature . . . Not to be missed."

Translated from the original Dutch by Agnes Louise Symmers and originally published by Alfred A. Knopf, this collection of letters was written by the daughter of a Javanese civil servant in the Dutch colonial government. She had been permitted the unusual privilege of attending a Dutch elementary school, but then returned home to seclusion during her adolescence, as was the Indonesian custom for women. The letters provide a fascinating picture of the life and spirit of the time during the period when Java was undergoing intimate contact with Western civilization. Through her writings she became a

While there has been increasing interest in recent years in the welfare of farm animals, fish are frequently thought to be different. In many people's perception, fish, with their lack of facial expressions or recognisable communication, are not seen to count when it comes to welfare. Angling is a major sport, and fishing a big industry. Millions of fish are caught on barbed hooks, or left to die by suffocation on the decks of fishing boats. Here, biologist Victoria Braithwaite explores the question of fish pain and fish suffering, explaining what we now understand about fish behaviour, and examining the related ethical questions about how we should treat these animals. She asks why the question of pain in fish has not been raised earlier, indicating our prejudices and assumptions; and argues that the latest and growing scientific evidence would suggest that we should

FAMOUS is a short illustrated poem. Both text and illustrations have a charmingly ironic take on what it means to be "famous." At once simple and profound, it "opens minds and hearts." when I visited schools, students of all ages gathering in their libraries or auditoriums would often clamor to ask me, “Are you famous, Miss?” before I even began speaking about writing. The concept confounded me. Of course I could never say “Yes” and I realized that saying “No” might mean they would be less attentive, so I meditated on the oddity of the word and the concept itself and wrote this little poem that I could read whenever they asked. Sometimes they thought I was trying to trick them. Huh? Sometimes they laughed. But they always paid good attention afterwards, and I liked that the poem might bend their idea of what the word even means. Sometimes I started by saying “Everything is famous if you notice it. Sure, here’s my answer.” I think the poem has served me well. My biggest surprise has been, everyone always wants me to read this poem. I guess it is one of my three most often-requested poems. Teachers always mention it. Parents have told me they copy it on graduation cards for their high school seniors. I’ve seen it hand-printed on posters in many classrooms. Students participating in UIL public speaking competitions often recite it. It’s been printed on more than one standardized test. I allow it to be printed because I like to imagine students can have friendly moments even while taking ominous tests. Book artist Lisa Desimini, whose work I cherish and delight in, honored me by wanting to illustrate this poem and create a visual experience for the poem as well. Lisa and I imagine Famous as a possible gift book for people of all ages. People who have been famous to us, whom we wish to encourage, who are at a crossroads, who are graduating, w

As a leading Confederate general, Braxton Bragg (1817-1876) earned a reputation for incompetence,

for wantonly shooting his own soldiers, and for losing battles. This public image established him not only as a scapegoat for the South's military failures but also as the chief whipping boy of the Confederacy. The strongly negative opinions of Bragg's contemporaries have continued to color assessments of the general's military career and character by generations of historians. Rather than take these assessments at face value, Earl J. Hess's biography offers a much more balanced account of Bragg, the man and the officer. While Hess analyzes Bragg's many campaigns and battles, he also emphasizes how his contemporaries viewed his successes and failures and how these reactions affected Bragg both personally and professionally. The testimony and opinions of other members of the Confederate army--including Bragg's superiors, his fellow generals, and his subordinates--reveal how the general became a symbol for the larger military failures that undid the Confederacy. By connecting the general's personal life to his military career, Hess positions Bragg as a figure saddled with unwarranted infamy and humanizes him as a flawed yet misunderstood figure in Civil War history.

At a time when globalization and technology are dramatically altering the world we live in, is education reform in the United States headed down the right path? Are schools emphasizing the knowledge and skills that students need in a global society--or are they actually undermining their strengths by overemphasizing high-stakes testing and standardization? Are education systems in China and other countries really as superior as some people claim? These and other questions are at the heart of author Yong Zhao's thoughtful and informative book. Born and raised in China and now a distinguished professor at Michigan State University, Zhao bases many of his observations on firsthand experience as a student in China and as a parent of children attending school in the United States. His unique perspective leads him to conclude that "American education is at a crossroads" and "we need to change course" to maintain leadership in a rapidly changing world. To make his case, Zhao explains \* What's right with American education; \* Why much of the criticism of schools in the United States has been misleading and misinformed; \* Why China and other nations in Asia are actually reforming their systems to be more like their American counterparts; \* How globalization and the "death of distance" are affecting jobs and everyday life; and \* How the virtual world is transforming the economic and social landscape in ways far more profound than many people realize. Educators, policymakers, parents, and others interested in preparing students to be productive global citizens will gain a clear understanding of what kinds of knowledge and skills constitute "digital

Though left uncompleted, "Kubla Khan" is one of the most famous examples of Romantic era poetry. In it, Samuel Coleridge provides a stunning and detailed example of the power of the poet's imagination through his whimsical description of Xanadu, the capital city of Kublai Khan's empire. Samuel Coleridge penned "Kubla Khan" after waking up from an opium-induced dream in which he experienced and imagined the realities of the great Mongol ruler's capital city. Coleridge began writing what he remembered of his dream immediately upon waking from it, and intended to write two to three hundred lines. However, Coleridge was interrupted soon after and, his memory of the dream dimming, was ultimately unable to complete the poem.
