Squeezed between more powerful France and Spain, Catalonia has endured a violent history. Its medieval empire that conquered Naples, Sicily and Athens was crushed by Spain. Its geography, with the Pyrenees falling sharply to the rugged

Costa Brava, is tormented, too. Michael Eaude traces this history and its monuments: Roman Tarragona, celebrated by the poet Martial; Greek Empuries, lost for centuries beneath the sands; medieval Romanesque architecture in the Vall de Boi churches (a World Heritage Site) and Poblet and Santes Creus monasteries. He tells the stories of several of Catalonia's great figures: Abbot Oliva, who brought Moorish learning to Europe, the ruthless mercenary, Roger de Flor, and Verdaguer, handsome poet-priest. Catalonia is famous today for its twentieth-century art. This book focuses on the revolutionary Art Nouveau buildings (including the Sagrada Familia) of Antoni Gaudi. It also explores the region's artistic legacy: the young Picasso painting Barcelona's vibrant slums; Salvador Dali, inspired by the twisted rocks of Cap de Creus to paint his landscapes of the human mind; and Joan Miro, discovering the colours of the red earth at Montroig.

The City Cultures Reader

In this volume, the authors apply insights from a variety of perspectives to explore the alignment among strategy, organization design, process and human resource management, and e-business practices on developing successful social networking programs—with particular regard to applying such initiatives against the backdrop of the global financial crisis

and challenges to traditional business models. Showcasing in-depth case studies, the authors present emerging approaches to analyze the impact of investment in social networking sites, aligning internal resources, and measuring effects on positioning, branding, and new business creation. The fact that a growing proportion of the world population has a relationship with social networking sites could prove very valuable for companies. The question is whether this represents a business opportunity, whether companies know how to make the most of it and if they will make the necessary efforts to adapt to these new platforms. In the modern world, social networking sites have enormous potential for large as well as small and medium-sized enterprises (SMEs); most companies are aware of the need for a presence on social networking sites, but at present their e-business strategies are part of their medium and long-term strategic planning and only a small percentage have been put into practice. In short, this book attempts to answer the following questions: Is there a business opportunity for companies on social networking sites? Do they know how to make the most of it? Are they willing to make the necessary effort to adapt? Can e-business strategies contribute to company creation and the success of already existing businesses? And if so, how?

A Geographical and Historical Account of the Principality of Catalonia, and Earldom of Barcelona.

A monumentally informed and irresistibly opinionated guide to the most un-Spanish city in Spain, from the bestselling author of *The Fatal Shore*. In these pages, Robert Hughes scrolls through Barcelona's often violent history; tells the stories of its kings, poets, magnates, and revolutionaries; and ushers readers through municipal landmarks that range from Antoni Gaudi's sublimely surreal cathedral to a postmodern restaurant with a glass-walled urinal. The result is a work filled with the attributes of Barcelona itself: proportion, humor, and *seny*—the Catalan word for triumphant common sense.

"What Catalans Want" takes a concerned look at Catalonia at a time when the country's political future as a Spanish autonomous region is being questioned for the first time since it came into being in 1980. It does so by talking to 30 representative Catalan and non-Catalan personalities in various key areas of public life. Interest for an English and American readership has been the main guideline for their selection. The book's aim is to discover why so many Catalans feel as uncomfortable about forming part of Spain as they feel comfortable about being members of the EU. Could the Catalan question, fanned by ongoing Spanish oppression and incomprehension, be welling up into a political issue of the same order as Scotland's or Flanders'? The book delves into a question that cannot be overlooked by concentrating on what matters most: the opinion of those affected—from the presidents of Catalonia and FC Barcelona to experts in every area. This book appears at a time when events have bowled over the country's traditional image as an "oasis" of satisfaction enjoying

what was seen as an "ample" margin of autonomy and economic welfare. Independent polls now reveal that close to 40% of Catalans would like to have a State of their own. The book also delves into the 2009-2011 unofficial independentist polls that were held in over 500 municipalities in which over 90% of participants voted for independence. Why have things come to a head? And parallel to this, why do most foreign tourists visiting the country have so little idea about what is going on? The book opens with an enlightening and poignant prologue by Irish novelist Colm Tóibín. The book is beautifully illustrated with photographer Lluís Brunet's remarkable portraits of the interviewees. This is the Black and White edition. Colour print (ISBN: 978-1-61150-009-7), EPUB (978-1-61150-012-7), and Kindle/Mobi (978-1-61150-013-4) are also available.

In this second novel of the Out of Solitude trilogy, Australian wine writer, Andrew Johnston, is again staying in Europe, this time with his brother, Adrian, for both work and a holiday. He receives an extensive new project from his publisher that takes him through the premium wine producing regions of France, during which he meets up again with a number of his old acquaintances from both France and Dubrovnik. Among these is Niki Meneti and the chance meeting rekindles his old feelings for her. While their relationship develops, Andrew is again drawn into events and affairs which he finds curious and difficult to fathom, having to rely on his trust in Niki's judgement and his own faith in her to maintain his equanimity. While Andrew's travels through Europe are superficially normal, the tendrils of Niki's world reach out to and entangle him at various stages, bringing with them complications that he is confident he can resolve but whether the opportunity to do so arises in time raises considerable uncertainties for his future.

DK Eyewitness Travel Guide: Barcelona & Catalonia

Created by social movement activists and left-wing parties during years of austerity, Barcelona en Comú, or the Comuns (as they are known in Catalan), won control of the city council of Barcelona in May 2015. The ensuing municipal government gave the city its first ever female mayor in the form of former housing rights campaigner Ada Colau. The Comuns' administration proceeded to undertake ambitious initiatives, attempting to regenerate democracy by changing the relationship between municipal authority and citizen, addressing social inequality issues and seeking to curb the hitherto unbridled tourist expansion in the name of improving the environment for those who live in the Catalan capital. This book examines the extent to which the political project of the Comuns has brought radical change in Barcelona, where it has faced opposition from revolutionary anti-capitalists, traditional Catalan nationalists and independentistas, as well as conservative political and economic forces. It also considers the Comuns' relationship to Podemos and their prospects of growing beyond the city, in the metropolitan area of Barcelona and across Catalonia.

Barcelona barely has time to take down the bunting between its rollicking festivals — when there isn't an all night fiesta happening on the street, there's more likely a party on the beach (only 10 minutes away) and never any shortage of action in its clubs and bars. Gentler pursuits are also myriad: the city's museums have got it all covered from Picasso and Miro to perfume and an outstanding aquarium. Its galleries are among the most avant-garde in Europe, and its history writ large in the churches and perfectly preserved medieval alleyways of the Barri Gotic. Time Out's local journalists give travelers the inside scoop on where to stay, eat, shop and what to see. Suggested day-trips to coast, country, and city are also included.

In 1950, Katherine Proctor leaves Ireland for Barcelona, determined to escape her family and become a painter. There she meets Miguel, an anarchist veteran of the Spanish Civil War, and begins to build a life with him. But Katherine cannot escape her past, as Michael Graves, a fellow Irish émigré in Spain, forces her to reexamine all her relationships: to her lover, her art, and the homeland she only thought she knew. *The South* is a novel of classic themes—of art and exile, and of the seemingly irreconcilable yearnings for love and freedom—to which Colm Tóibín brings a new, passionate sensitivity.

Sergi Belbel and Catalan Theatre

A #1 international bestseller reminiscent of the works of Roberto Bolaño, Carlos Ruiz Zafon, and Edward Rutherford—a page-turning historical epic, set in early eighteenth-century Spain, about a military mastermind whose betrayal ultimately leads to the conquest of Barcelona, from the globally popular Catalan writer Albert Sánchez Piñol. Why do the weak fight against the strong? At 98, Martí Zuviría ponders this question as he begins to tell the extraordinary tale of Catalonia and its annexation in 1714. No one knows the truth of the story better, for Martí was the very villain who betrayed the city he was commended to keep. The story of Catalonia and Barcelona is also Martí's story. A prestigious military engineer in the early 1700s, he fought on both sides of the long War of the Spanish Succession between the Two Crowns—France and Spain—and aided an Allied enemy in resisting the consolidation of those two powers. Politically ambitious yet morally weak, Martí carefully navigates a sea of Machiavellian intrigue, eventually rising to a position of power that he will use for his own mercenary ends. A sweeping tale of heroism, treason, war, love, pride, and regret that culminates in the tragic fall of a legendary city, illustrated with battle diagrams, portraits of political figures, and priceless maps of the old city of Barcelona, *Victus* is a magnificent literary achievement that is sure to be hailed as an instant classic.

Catalonia & the Balearic Isles

The first part of the book, which begins on March 8, 1918, is a story of family life on the Costa Brava and the coming-of-age story of a young man torn between an old-fashioned ideal of a life of quiet dedication to work and family and the intellectual seductions of European culture. Pla's enthusiasms and uncertainties, friendships and crushes, his reading, the drama and

politics and absurdity of family life—we are drawn into all these as we also follow Pla in his wanderings through town, scrutinizing his fellow citizens, or out under the magnificent skies of the still-unspoiled countryside of the coast. In January 1919, Pla returns to Barcelona to complete his studies, and the book's second part paints a hilariously revealing picture of student life. He learns next to nothing from his teachers, a good deal more from the writers and artists he meets in cafés and salons, and most of all from Barcelona itself, with its night life and ramblas, the city of Gaudi and Modernisme, where just outside the city limits the seemingly timeless life of the country still went on as before.

Catalonia - A Cultural History

Fear and Loathing in La Liga is the definitive history of the greatest rivalry in world sport: FC Barcelona vs. Real Madrid. It's Messi vs. Ronaldo, Guardiola vs. Mourinho, the nation against the state, freedom fighters vs. Franco's fascists, plus majestic goals and mesmerizing skills. It's the best two teams on the planet going head-to-head. It's more than a game. It's a war. It's El Clásico. Only, it's not quite that simple. Spanish soccer expert and historian Sid Lowe covers 100 years of rivalry, athletic beauty, and excellence. Fear and Loathing in La Liga is a nuanced, revisionist, and brilliantly informed history that goes beyond sport. Lowe weaves together this story of the rivalry with the history and culture of Spain, emphasizing that it

is “never about just the soccer.” With exclusive testimonies and astonishing anecdotes, he takes us inside this epic battle, including the wounds left by the Civil War, Madrid's golden age in the fifties when they won five European cups, Johan Cruyff's Barcelona Dream Team, the doomed Galáctico experiment, and Luís Figo's “betrayal.” By exploring the history, politics, culture, economics, and language—while never forgetting the drama on the field—Lowe demonstrates the relationship between these two soccer giants and reveals the true story behind their explosive rivalry.

Computational methodologies of signal processing and imaging analysis, namely considering 2D and 3D images, are commonly used in different applications of the human society. For example, Computational Vision systems are progressively used for surveillance tasks, traf?c analysis, recognition process, inspection p- poses, human-machine interfaces, 3D vision and deformation analysis. One of the main characteristics of the Computational Vision domain is its inter-multidisciplinary. In fact, in this domain, methodologies of several more fundam- tal sciences, such as Informatics, Mathematics, Statistics, Psychology, Mechanics and Physics are usually used. Besides this inter-multidisciplinary characteristic, one of the main reasons that contributes for the continually effort done in this domain of the human knowledge is the number of applications in the medical area. For instance, it is possible to consider the use of statistical or physical procedures on medical images in order to model the represented structures. This modeling can have different goals, for example: shape reconstruction, segmentation, registration, behavior interpretation and simulation, motion and deformation analysis, virtual reality, computer-assisted therapy or tissue characterization. The main objective of the ECCOMAS Thematic Conferences on Computational Vision and Medical Image Processing (VIPimage) is to promote a comprehensive forum for discussion on the recent advances in the related ?elds trying to id- tify widespread areas of potential collaboration between researchers of different sciences.

This book includes most of the contributions presented at a conference on “Universities and Science in the Early Modern Period” held in 1999 in Valencia, Spain. The conference was part of the “Five Centuries of the Life of the University of Valencia” (Cinc Segles) celebrations, and from the outset we had the generous support of the “Patronato” (Foundation) overseeing the events. In recent decades, as a result of a renewed attention to the institutional, political, social, and cultural context of scientific activity, we have witnessed a reappraisal of the role of the universities in the construction and development of early modern science. In essence, the following conclusions have been reached: (1) the attitudes regarding scientific progress or novelty differed from country to country and followed different trajectories in the course of the early modern period; (2) institutions of higher learning were the main centers of education for most scientists; (3) although the universities were sometimes slow to assimilate new scientific knowledge, when they did so it helped not only to remove the suspicion that the new science was intellectually subversive but also to make science a respectable and even prestigious activity; (4) the universities gave the scientific movement considerable material support in the form of research facilities such as anatomical theaters, botanical gardens, and expensive instruments; (5) the universities provided professional employment and a means of support to many scientists; and (6) although the relations among the universities and the academies or scientific societies were sometimes antagonistic, the two types of institutions often worked together in harmony, performing complementary rather than competing functions; moreover, individuals moved from one institution to another, as did knowledge, methods, and scientific practices.
