The Complete Book of BMW is a master work. The word 'definitive' is a bold claim but this book should be viewed in this light. It is the most comprehensive survey of BMW Group models from the 501 right up to this year's 1 and 6 Series published in the English language. Data tables covering specifications, production volumes and prices will be invaluable to the BMW enthusiast and the layout and production volumes are second to none. Tony Lewin deserves high praise for this outstanding book. - Chris Willows, Corporate Communications Director, BMW Great Britain BMW is the most remarkable phenomenon to hit the auto industry in a generation. Celebrated for its luxury sports cars, motorcycles and aero engines in the pre-war era, it squandered its glamorous heritage in the 1950s; on its knees and near-bankrupt, it was rejected as a lost cause when offered by desperate banks to Mercedes-Benz. But thanks to a wealthy German aristocrat, a brilliant engineer and a young and inspirational manager, Mercedes would soon regret not having scooped up the once-glorious firm: pioneering the concept of the compact, high-quality sports saloon, the visionary new team systematically built BMW into the spectacular success we know today. Through the most expressive medium of all - the cars themselves - The Complete Book of BMW tells the story of one of the most remarkable turnarounds of the century. From the iconic 2002tii of the 1960s through the mighty M3 of the 1990s to today's born-again MINI and the crowning glory of the Rolls-Royce Phantom.- Every model since 1962- Technical specifications and performance data- Production and sales data- Key decisions that made BMW great- Von Kuenheim's brilliant template- Taking technology leadership- 1,600 color photographs- The new focus: premium at every levelAbout the AuthorTony Lewin is an automotive writer and commentator specializing in the business and design sides of the auto industry. He has reported on the automobile sector for more than two decades as editor of industry publications such as What Car?, Financial Times Automotive World and World Automotive Manufacturing, and as a regular columnist in magazines and newspapers in Europe, Japan and the United States.General AudienceThe Complete Book of BMW tells the remarkable story of the company and its cars. From the luxury sports cars and motorcycles of the pre-war era through its rebirth at the hands of a wealthy German aristocrat, a brilliant engineer, and an inspired manager during the past two decades, the book uses the most expressive medium of all-the cars themselves-to illustrate the story of one of the most remarkable turnarounds in automotive history.

Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center

It was a naked girl, with her back to him. She was not quite naked. She wore a broad leather belt round her waist with a hunting knife in a leather sheath at her right hip. The belt made her nakedness extraordinarily erotic. She stood not more than five yards away on the tideline looking down at something in her hand. She stood in the classical relaxed pose of the nude, all the weight on the right leg and the left knee bent and turning slightly inwards, the head to one side as she examined the things in her hand. M called this case a soft option. Bond can't quite agree. The tropical island is luxurious, the seductive Honey Rider is beautiful and willing. But they are both part of the empire of Dr. No. The doctor is a worthy adversary, with a mind as hard and cold as his solid steel hands. Dr. No's obsession is power. His only gifts are strictly pain-shaped. 'Masterful beautifully written.'—Raymond Chandler, *The Sunday Times*. 'The essence of a James Bond thriller is its speed, its knowingness Dr. No has a full quota of every ingredient. Bond is better than ever.'—*Evening Standard*. 'Wildly thrilling, packed with convincing technical detail.'—C. Day Lewis, *BBC World of Books*. 'Pace, brilliant descriptive powers, superb imaginations sheer entertainment.'—*Spectator*.
