With unflinching gaze and uncompromising intensity

Julius Evola analyzes the spiritual and cultural malaise at the heart of Western civilization and all that passes for progress in the modern world. As a gadfly, Evola spares no one and nothing in his survey of what we have lost and where we are headed. At turns prophetic and provocative, *Revolt against the Modern World* outlines a profound metaphysics of history and demonstrates how and why we have lost contact with the transcendent dimension of being. The revolt advocated by Evola does not resemble the familiar protests of either liberals or conservatives. His criticisms are not limited to exposing the mindless nature of consumerism, the march of progress, the rise of technocracy, or the dominance of unalloyed individualism, although these and other subjects come under his scrutiny. Rather, he attempts to trace in space and time the remote causes and processes that have exercised corrosive influence on what he considers to be the higher values, ideals, beliefs, and codes of conduct--the world of Tradition--that are at the foundation of Western civilization and described in the myths and sacred literature of the Indo-Europeans. Agreeing with the Hindu philosophers that history is the movement of huge cycles and that we are now in the Kali Yuga, the age of dissolution and decadence, Evola finds revolt to be the only logical response for those who oppose the materialism and ritualized meaninglessness of life in the twentieth century. Through a sweeping study of the structures, myths, beliefs, and spiritual traditions of the major Western civilizations, the author compares the characteristics of the modern world with those of traditional societies. The domains explored include politics, law, the rise and fall of

empires, the history of the Church, the doctrine of the two natures, life and death, social institutions and the caste system, the limits of racial theories, capitalism and communism, relations between the sexes, and the meaning of warriorhood. At every turn Evola challenges the reader's most cherished assumptions about fundamental aspects of modern life. A controversial scholar, philosopher, and social thinker, JULIUS EVOLA (1898-1974) has only recently become known to more than a handful of English-speaking readers. An authority on the world's esoteric traditions, Evola wrote extensively on ancient civilizations and the world of Tradition in both East and West. Other books by Evola published by Inner Traditions include *Eros and the Mysteries of Love*, *The Yoga of Power*, *The Hermetic Tradition*, and *The Doctrine of Awakening*.

Quatrains 2

On 12 October 2010 the world's attention was fixed on a remote copper mine in the Atacama desert in Chile. Final preparations were underway for a daring rescue to bring to an end the longest underground entrapment in human history. 69 days earlier, 33 men were midway through a routine shift, deep in the San Jose mine. They stopped for their lunch break at the tiny safety shelter, 688 meters below the surface. Ten minutes later they heard an almighty crack and a deep rumbling sound. Clouds of dust and debris

poured down on the choking men. The bombardment lasted for five hours. When it finally cleared the men began to explore the 6km of underground tunnels, caves and dead ends - only to discover they were trapped under tonnes of collapsed rock. They survived on the most meagre of rations believing an attempt to rescue them was underway: a spoonful of tuna fish and a half glass of milk every 48 hours. But as days turned to weeks, hope began to fade and as starvation set in, they prepared for a slow and agonizing death. 17 days after the collapse a drill finally reached them, they sent a note back to the surface: 'all 33 of us are well inside the shelter'. Now a 700 meter-long tunnel, the width of an orange connected them to the surface. Above ground at 'Camp Hope' the rescue team now included hundreds of geologists, engineers, psychologists, as well as the families of the men. Three separate rescue missions were launched, but hit one setback after another. 10 weeks after the collapse, and with the world watching, all 33 men would be brought safely to the surface. The 33 is the remarkable story of their 10-week incarceration, half a mile below the surface - and the epic rescue mission which finally brought them back to life.

In this text, Joachim Jeremias explores the variety of ways of interpreting the parables of Jesus, including their translation; the way different audiences altered the parables Jesus told; and the role of the New Testament writers in shaping their telling of the parables. He also provides a thematic discussion of the theological messages contained within the parables.

"Well Mrs Caldwell is the English mother of Eliacim who has died a while ago (not clear but possibly in

WW2 or at least between the world wars). She is writing a sort of diary of her thoughts as she ponders her relationship with her now grown son. The book has about 200 pages with about 200 short chapters, each with a descriptive heading. She is going mad and the basic suggestion (though not clear since this is definitely not a simple narrative story, but in my view) is because of her guilt in having had incestuous thoughts about him since he was a boy. Each chapter is basically a thought picture with little connectivity with the others as Caldwell brings to mind Eliacim's possible loves, his career in the navy (he dies aboard ship and is buried at sea), objects that spark a memory, avoids but alludes to her inappropriate behaviours and so on. There is a possible thread of ideas associated with water, wood of coffins, sin, time and her own youth."--Goodreads

Why is revenge such a pervasive and destructive problem? How can we create a future in which revenge is less common and forgiveness is more common? Psychologist Michael McCullough argues that the key to a more forgiving, less vengeful world is to understand the evolutionary forces that gave rise to these intimately human instincts and the social forces that activate them in human minds today. Drawing on exciting breakthroughs from the social and biological sciences, McCullough dispenses surprising and practical advice for making the world a more forgiving place. Michael E. McCullough (Miami,

Florida), an internationally recognized expert on forgiveness and revenge, is a professor of psychology at the University of Miami in Coral Gables, Florida, where he directs the Laboratory for Social and Clinical Psychology.

For courses in Formal Logic. The general approach of this book to logic remains the same as in earlier editions. Following Aristotle, we regard logic from two

different points of view: on the one hand, logic is an instrument or organon for appraising the correctness of reasoning; on the other hand, the principles and methods of logic used as organon are interesting and important topics to be themselves systematically investigated.

Here is a unique book. It describes the theories and processes of repairing and adjusting the modern watch in precise and meticulous detail: a thing which has never been done so completely before in the many books on the same subject. As a text book it is a revelation. Taking nothing for granted, except the ability to read and comprehend a simple description of mechanical processes, de Carle takes his reader through every stage and every operation of watch repairing and to deal with them thoroughly is quite a programme - it takes 300 pages containing 24 chapters, two appendices and 553 illustrations. The fine draughtsmanship and accurate technical detail of the illustrations set a new standard. Practical Watch Repairing can justifiably claim to be the best illustrated book on practical horology yet issued, and one of the best of its kind on any subject. The publication of the book marks the beginning of a new epoch in the study of the mechanics of horology.

Throughout his narrative of Julio-Claudian Rome in the *Annals*, Tacitus includes numerous references to the gods, fate, fortune, astrology, omens, temples, priests, the emperor cult, and other religious material. Though scholars have long considered Tacitus' discussion of religion of minor importance, this volume demonstrates the significance of such references to an understanding of the work as a whole by analyzing them using cultural memory theory, which views religious ritual as a key component in any society's efforts to create a lived version of the past that helps define cultural identity in the present. Tacitus, who was not only an historian, but also a member of Rome's quindecimviral priesthood, shows a marked interest in even the most detailed rituals of Roman religious life, yet his portrayal of religious material also suggests that the system is under threat with the advent of the principate. Some traditional rituals are forgotten as the shape of the Roman state changes while, simultaneously, a new form of cultic commemoration develops as deceased emperors are deified and the living emperor and his family members are treated in increasingly worshipful ways by his subjects. This study traces the deployment of religious material throughout Tacitus' narrative in order to show how he views the development of this cultic "amnesia" over time, from the reign of the cryptic, autocratic, and oddly mystical Tiberius, through Claudius' failed attempts at reviving tradition, to the final sacrilegious disasters of the impious Nero. As the first book-length treatment of religion in the *Annals*, it reveals how these references are a key vehicle for his assessment

of the principate as a system of government, the activities of individual emperors, and their impact on Roman society and cultural identity.

In this important study of the meaning of the Grail, one of Europe's greatest esoteric philosophers

discloses the pre-Christian and initiatic sources of this symbolic motif that is so central to Western mythology and culture. He demonstrates how the main features of the legend are from an older tradition analogous to the great heroic sagas and cycles of the North, and that the Grail itself is a symbol of initiation. Evola uncovers the hidden meaning in the often surreal adventures of the knights who searched for the Grail, interpreting them as inner experiences and tests for the seeker. He also explores the history of the myth in the Middle Ages, its use by the Knights Templar and the Cathars, its legacy during the decline of the Holy Roman Empire, and its links with Rosicrucianism, alchemy, and Masonry. This excursion into the realm of the Grail throws new light on an endlessly fascinating subject.

The pigeon is the quintessential city bird. Domesticated thousands of years ago as a messenger and a source of food, its presence on our sidewalks is so common that people consider the bird a nuisance—if they notice it at all. Yet pigeons are also kept for pleasure, sport, and profit by people all over the world, from the “pigeon wars” waged by breeding enthusiasts in the skies over Brooklyn to the Million Dollar Pigeon Race held every year in South Africa. Drawing on more than three years of fieldwork across three continents, Colin Jerolmack traces our complex and often contradictory relationship with these

versatile animals in public spaces such as Venice's Piazza San Marco and London's Trafalgar Square and in working-class and immigrant communities of pigeon breeders in New York and Berlin. By exploring what he calls "the social experience of animals," Jerolmack shows how our interactions with pigeons offer surprising insights into city life, community, culture, and politics. Theoretically understated and accessible to interested readers of all stripes, *The Global Pigeon* is one of the best and most original ethnographies to be published in decades.

Readings on Logic

An insightful examination of why we compare ourselves to those above and below us. The United States was founded on the principle of equal opportunity for all, and this ethos continues to inform the nation's collective identity. In reality, however, absolute equality is elusive. The gap between rich and poor has widened in recent decades, and the United States has the highest level of economic inequality of any developed country. Social class and other differences in status reverberate throughout American life, and prejudice based on another's perceived status persists among individuals and groups. In *Envy Up, Scorn Down*, noted social psychologist Susan Fiske examines the psychological underpinnings of interpersonal and intergroup comparisons, exploring why we compare ourselves to those both above and below us and analyzing the social consequences of such comparisons in day-to-day life. What motivates individuals, groups, and cultures to envy the status of some and scorn the status of others? Who experiences envy and scorn most? *Envy Up, Scorn Down* marshals a wealth of recent psychological studies as well as findings based on years of Fiske's own research to address such questions. She shows that both envy and scorn have distinctive biological, emotional, cognitive, and behavioral characteristics. And though we are all "wired" for comparison, some individuals are more vulnerable to these motives than others. Dominant personalities, for example, express envy toward high-status groups such as the wealthy and well-educated,

and insecurity can lead others to scorn those perceived to have lower status, such as women, minorities, or the disabled. Fiske shows that one's race or ethnicity, gender, and education all correlate with perceived status. Regardless of whether one is accorded higher or lower status, however, all groups rank their members, and all societies rank the various groups within them. We rate each group as either friend or foe, able or unable, and accordingly assign them the traits of warmth or competence. The majority of groups in the United States are ranked either warm or competent but not both, with extreme exceptions: the homeless or the very poor are considered neither warm nor competent. Societies across the globe view older people as warm but incompetent. Conversely, the very rich are generally considered cold but highly competent. *Envy Up, Scorn Down* explores the nuances of status hierarchies and their consequences and shows that such prejudice in its most virulent form dehumanizes and can lead to devastating outcomes—from the scornful neglect of the homeless to the envious anger historically directed at Tutsis in Rwanda or Jews in Europe. Individuals, groups, and even cultures will always make comparisons between and among themselves. *Envy Up, Scorn Down* is an accessible and insightful examination of drives we all share and the prejudice that can accompany comparison. The book deftly shows that understanding envy and scorn—and seeking to mitigate their effects—can prove invaluable to our lives, our relationships, and our society.

The 33

This is the true moving story of a young man growing up in the 1950's, of staunch Roman Catholic parents. Encouraged by family and teachers, the eleven years old holds a burning desire to become a Missionary Priest. His story unfolds against the backdrop of a Catholic Church going through massive change, yet stuck firmly in the past, with teachings and traditions going back hundreds of years. Leaving the love of his family he joins a junior seminary where he begins his progress towards becoming a priest. It describes his fears and concerns about his calling from God and his life at a boarding school. It tracks his adolescent life, desperately trying to come to terms with being a youth with normal feelings, whilst living in the unusual environment of a Monastery. It tells of his emotional turmoil and inability to make a definite decision about his future, as he becomes more and more institutionalised. It follows his time in a Scottish Monastery where he is initiated into strict Monastic ways, then moves onto a Seminary where he struggles with Monastic life, his studies and emotional relationships. Finally, illness and love are the catalysts

for The Nearly Man making the decision of his lifetime.
