Global Collaboration: Intercultural Experiences and Learning

This book compares primary education in urban and rural China and India. It focuses on how the sociocultural context including educational policy, educators and parents' beliefs, and the conditions under which teaching and learning occur shape classroom pedagogy and determine children's attainment. This in-depth, authentic, comparative analysis of the two largest educational systems in the world is a must-read for scholars interested in the teaching and learning in these two rapidly developing Asian cultures. A common set of questions has been addressed in diverse contexts. The empirical work on which this book is based is most impressive – videotaping of mathematics and language lessons, interviews with parents and educators questionnaires with parents, teachers and children and tests of children's mathematics attainment – and this done in 3 locations in China, 3 in India and 12 schools in total.

The Mathematics of Egypt, Mesopotamia, China, India, and Islam

Over the past three decades, China has experienced rapid economic growth and a fascinating transformation of its industry. However, much of this success is the result of industrial imitation, and China's continuing success now relies heavily on its ability to strengthen its indigenous innovation capability. In this book, Xiaolan Fu investigates how China can develop a strategy of compressed development to emerge as a leading innovative nation. The book draws on quantitative and qualitative research that includes cross-country, cross-province and cross-firm analysis. Large multi-level panel datasets, unique survey databases, and in-depth industry case studies are explored. Different theoretical approaches are also used to examine the motivations, obstacles and consequences of China's innovation with a wider discussion around what other countries can learn from China's experience. This book will appeal to scholars and policy-makers working in fields such as innovation policy, technology management, development and international economics, and China studies.

Economic Development in China, India and East Asia

Focused on unique features of economic development, this edited volume

Acces PDF China And India Learning From Each Other Reforms And Policies For Sustained Growth

examines the nature and structure of corporate governance of several key state-owned enterprises in China and public sector units in India in five strategic sectors: oil and natural gas, steel, coal, electricity generation, and banking industries.

The Asiatic Journal and Monthly Register for British and Foreign India, China, and Australia

Cultural Foundations of Chinese Education describes the evolution of Chinese education for more than 5,000 years, and analyzes in depth its interaction with Chinese culture.

Disruptive Innovation in Chinese and Indian Businesses

Contemporary Hospitality and Tourism Management Issues in China and India

Endorsed by University of Cambridge International Examinations. Written for the Cambridge International Examinations syllabus, Cambridge IGCSE India Studies adopts an enquiry based approach with a strong focus on investigating and analysing the emergence of contemporary India. In the process, it promotes the

Acces PDF China And India Learning From Each Other Reforms And Policies For Sustained Growth

development of core skills and ways of thinking critically that are essential to succeed in secondary and higher education and all professional areas. This will encourage students to be creative, innovative, enterprising and independent.

Teaching in Primary Schools in China and India

This is the sixteenth volume in an annual series in which leading economists provide a concise and accessible evaluation of major developments in trade and trade policy. Examines key issues pertinent to the multinational trading system, as well as regional trade arrangements and policy developments at the national level Provides up-to-date assessments of the World Trade Organization's current Trade Policy Reviews Analyses trade policy in areas such as Turkey and includes a symposium on China and Africa Contributors also investigate the growth of agricultural protection in Europe in the 19th and 20th Centuries. A vital resource for researchers, analysts and policy-advisors interested in trade policy and other open economy issues

Teaching and Learning Chinese in Global Contexts

First published in 1987, this volume was written to shed some light upon the nature and environmental consequences and wider relevance of development

Acces PDF China And India Learning From Each Other Reforms And Policies For Sustained Growth

strategies in the Peoples' Republic of China. It covers industrialisation, food production, energy use and landscape and settlement planning. The Chinese "autocentred" strategy is assessed from both the developmental and the environmental viewpoints. Decision-making processes and the opportunities to implement environmental policy in other parts of the developing world are analysed and the volume concludes with the view that benefits to other countries are likely to arise out of increased co-operation and exchange with China, although the Chinese model is by no means a panacea. All students and researchers interested in either environmental or developmental issues will find this book to be a substantial and enlightening contribution to literature.

Sustainability-oriented Innovation Systems in China and India

China and India are home to one-third of the world's population. And they're undergoing social and economic revolutions that are capturing the best minds--and money--of Western business. In *Billions of Entrepreneurs*, Tarun Khanna examines the entrepreneurial forces driving China's and India's trajectories of development. He shows where these trajectories overlap and complement one another--and where they diverge and compete. He also reveals how Western companies can participate in this development. Through intriguing comparisons, the author probes important differences between China and India in areas such as information and transparency, the roles of capital markets and talent, public and private property

Acces PDF China And India Learning From Each Other Reforms And Policies For Sustained Growth

rights, social constraints on market forces, attitudes toward expatriates abroad and foreigners at home, entrepreneurial and corporate opportunities, and the importance of urban and rural communities. He explains how these differences will influence China's and India's future development, what the two countries can learn from each other, and how they will ultimately reshape business, politics, and society in the world around them. Engaging and incisive, this book is a critical resource for anyone working in China or India or planning to do business in these two countries.

A History of Sino-Indian Relations

Written by a former World Bank economist, *How Does My Country Grow?* distils growth policy lessons from the author's first-hand experience in Poland, Kenya, India, and Russia, and his contributions to the economic policy debates that followed the emerging market crises of 1997 to 2001, extending up to the global financial crisis of 2008-09. Based on living and working in the field, the author argues that country economic analysis is in effect a separate, integrative branch of economics that draws upon but is distinct from academic economics. The country stories recounted, reinforced by the emerging market experience since the 1980s, point to a canonical growth policy package built around three interconnected elements: the intertemporal budget constraint of the government; the micropolicy trio of hard budgets, competition and competitive real exchange rates; and

Acces PDF China And India Learning From Each Other Reforms And Policies For Sustained Growth

managing volatility from external, but especially domestic, sources. This package is underpinned by good governance, which finds its most immediate expression in the management of the public finances. While the discussion is tilted towards developing countries, the insights have considerable relevance for advanced economies, many of which today are in the throes of their own growth-cum-sovereign debt crises.

Billions of Entrepreneurs

This interdisciplinary collection of essays offers a window onto the overseas Indian and Chinese communities in Asia. Contributors discuss the interactive role of the cultural and religious 'other', the diasporic absorption of local beliefs and customs, and the practical business networks and operational mechanisms unique to these communities. Growing out of an international workshop organized by the Institute of Southeast Asian Studies in Singapore and the Centre of Asian Studies at the University of Hong Kong, this volume explores material, cultural and imaginative features of the immigrant communities and brings together these two important communities within a comparative framework.

China's Path to Innovation

Thai Massage - E-Book

This practical and highly illustrated introduction to the principles and techniques of Thai massage discusses the theories of Thai medicine and its Chinese and Ayurvedic influences. It offers clear and easy-to-follow descriptions for all Thai massage techniques accompanied by full color photographs and drawings, with arrows to indicate direction of movement. Basic explanations describe how massage therapists can use elements of these techniques and apply them immediately in their own practice. Gives clear and easy-to-follow descriptions for each technique. Techniques can be used alone, in conjunction with other forms of massage, or to facilitate Yoga and other meditation practices. Clinically valuable and practical explanations of how to use elements of the procedures make it easy for therapists to enrich their practice with these techniques -- whether applying all of the methods, or starting with stretches alone. Features an icon throughout the text that calls attention to precautions therapists must be aware of for safe and effective sessions. Includes a 45-minute DVD presenting video of techniques and routines in real time, to demonstrate proper pacing. Photographs, drawings, and illustrations of techniques are now in full color, for greater clarity of concepts. More historical background provides a deeper understanding of this ancient medical art. An accompanying DVD offers a 45-minute video of a Thai massage session in real time - demonstrating procedures with proper pacing. The visual approach along with its step-by-step narration helps viewers understand how the concepts

Acces PDF China And India Learning From Each Other Reforms And Policies For Sustained Growth

discussed in the book translate to actual practice. The book also includes DVD icons that indicate which techniques are demonstrated on the DVD. Increased coverage of body mechanics helps readers understand the difference between correct and incorrect technique. Legends below the photographs provide specific information on the muscles being pressed or stretched with each technique to help therapists understand how this art of Asian healing corresponds to Western anatomy. A new Muscle Atlas appendix helps to further identify muscles mentioned in these legends. A new chapter, Correlations to Yoga, outlines the correlations between specific Thai massage procedures and yoga postures to help therapists incorporate Yoga into their practices. A new chapter, Suggested Sequences, provides guidelines for 60-, 90-, and 120-minute sessions - taking the guesswork out of planning Thai massage sessions.

Harvard Business Review on Thriving in Emerging Markets

Managing Globalization

Acces PDF China And India Learning From Each Other Reforms And Policies For Sustained Growth

This book is the first strategic guide for multi-national corporations (MNCs) who are contemplating expanding into both China and India. Gupta and Wang explain how many MNCs view China and India solely from the lens of off-shoring and cost-reduction, and focusing their marketing strategies on only the top 5-10% of the population. This is a missed opportunity. China and India are the only two countries that constitute four realities that are strategically crucial for the global enterprise: Both provide mega-markets for almost every product and service Both have platforms that will dramatically reduce the company's global cost structure Both have platforms that will significantly boost the company's global technology and innovation base Both are springboards for the mergence of new fearsome global competitors. This book aims to shed light on the brutal competition for markets and resources in China and India as well as lays out the strategic action implications for those companies who want to emerge as the global players of tomorrow.

The Political Economy of State-owned Enterprises in China and India

A novel mix of key attributes distinctive from those of established technologies or business models, disruptive innovations are typically inferior, yet affordable and "good-enough" products or services, which originate in lower-end market

Acces PDF China And India Learning From Each Other Reforms And Policies For Sustained Growth

segments, but later move up to compete with those provided by incumbent firms. This book sheds new light on disruptive innovations both from and for the bottom of the pyramid in China and India, from the point of view of local entrepreneurs and international firms seeking to operate their businesses there. It covers both the theoretical and practical implications of disruptive innovation using conceptual frameworks alongside detailed case studies, whilst also providing a comparison of conditions and strategic options in India and China.

India-China Relations

'This is an unusually rich and comprehensive comparative analysis of industrialisation and development in Asia. Drawing on the diverse experiences of Malaysia, Singapore, China, India and more, Roy, Blomqvist and Clark skilfully tease out the common institutional threads and the subtle differences in their developmental trajectories. An essential reading for all those interested in the lessons from Asian development.' – Jude Howell, London School of Economics, UK
This is a thorough and comprehensive study – both in terms of country coverage and in-depth analysis – covering the economic development of all the major economies in the Asian continent, namely China, India, Japan, South Korea, Taiwan, Malaysia and Singapore. Before embarking on analyses of different aspects of economic growth and development of these countries, the authors present a thought-provoking analysis of how institutional factors such as geography, history

Acces PDF China And India Learning From Each Other Reforms And Policies For Sustained Growth

of religion, culture and political governance have been deeply interwoven with development dynamics to shape the growth and development trajectory that each country has subsequently followed. Each country's development path consequently appeared almost be pre-determined. Japan's role as the lead-country in technology transfer under the flying-geese pattern of development is discussed, however the emphasis has shifted of late to China, India, Korea, Malaysia and Singapore. the authors also propose that instead of discussing the failure of India to catch up with China in growth and development outcomes, economists should be commenting on whether China, bestowed with India's highly decentralized democratic governance structure and institutional rigidities, would have been able to achieve the same results as that of India. Only then will a true understanding and appreciation of India's achievements in economic growth and development emerge. Economic Development in China, India and East Asia will be warmly welcomed and appreciated by academics and researchers of international and development economics as well as Asian development and economics. Policy makers and those involved in NGOs in the development and aid arenas will also find this of great interest.

Institutional Transformation through Best Practices in Virtual Campus Development: Advancing E-Learning Policies

Acces PDF China And India Learning From Each Other Reforms And Policies For Sustained Growth

Although there is an extensive literature on the teaching of English as a Second or Other Language, there is very little published research on the teaching or learning of Chinese in similar contexts. This book is the first to bring together research into the teaching and learning of Chinese as a foreign language to non-native speakers, as a second language to minority groups and as a heritage/community language in the diaspora. The volume showcases the contribution of researchers working in such areas as language teaching and learning, policy development, language assessment, language development, bilingualism, all within the context of Chinese as a Second or Other Language. This is an exciting extension of teaching research beyond the traditional TESOL field and will be of interest to researchers and practitioners working in applied linguistics and Chinese language education worldwide.

Lessons Learned from the Dragon (China) and the Elephant (India): 2004-2005 Annual Report

This publication contains 13 papers presented at an international seminar, held in Beijing in October 2005, which was jointly organised by the IMF, the China Society for Finance and Banking, and the Stanford Center for International Development. The papers set out the analysis of high-level policymakers and advisors in China and India about the structural economic reforms being implemented in their

Acces PDF China And India Learning From Each Other Reforms And Policies For Sustained Growth

respective countries, and the challenges and lessons to be learned from their experiences in order to achieve long-term sustainable development. The papers focus on the following issues: banking sector reform, securities market development, domestic financial liberalisation and international financial integration, fiscal dimensions of sustaining high growth, Sino-Indian economic co-operation, and the implications of the emergence of China and India for the regional and international financial system.

Society and Development in China and India

Revised version of papers presented at a two-day national seminar on "India-China relations : an agenda for the Asian century", held at Mumbai in March 2006.

Learning From China?

The United States and 11 other countries from both sides of the Pacific are currently negotiating the Trans-Pacific Partnership (TPP). The agreement is expected to set new benchmark for international trade through its comprehensive coverage of issues and binding regulations. It is expected to eventually mature into a regional trade agreement covering the entire Asia-Pacific. As of now, it does not include China and India, the two largest emerging markets and regional

Acces PDF China And India Learning From Each Other Reforms And Policies For Sustained Growth

economies. The TPP has generated controversy for its excessive emphasis on trade issues, which have remained unresolved or unaddressed at the WTO due to differences between developed and emerging markets. It has also been criticized for adopting a negotiating style reflecting the US regulatory approach to international trade and also as a geo-political strategy of the US for supporting its strategic rebalancing towards Asia. From both economic and geo-political perspectives, the TPP has various significant implications for China and India that are examined in the book. This book sheds light on how China and India's entries in the TPP are mutually beneficial and how both countries can gain from the TPP by gaining preferential access to large markets and using it as an opportunity for introducing more outward-oriented reforms. The book also cautions that US must reconcile to the rebalancing of economic power within the grouping that will occur following the entries of China and India. Otherwise, the TPP and China and India might walk divergent paths and trade and regional integration in Asia-Pacific may not ever converge. This book will interest anyone who wishes to learn more about the TPP and its future implications and challenges and China and India's roles in global and regional trade.

China. Pacific and Indian Oceans. Australia. India. Central Asia

Partially Awakened Giants

This book represents a comprehensive, authoritative and up-to-date analysis of key sectors in the hospitality and tourism industries in China and India, and will address the market's growing need for information on Tourism in China and India. The text will be written in an accessible style drawing on the authors' wealth of theoretical, educational and industry experience. The text will contain inputs from academic colleagues and commercial contacts from the identified region. Case studies will give real life experiences of hospitality and tourism companies and organisations operating in this region and will include interactive exercises and discussion points.

Tagore and China

The World Economy

In recent decades it has become obvious that mathematics has always been a worldwide activity. But this is the first book to provide a substantial collection of English translations of key mathematical texts from the five most important ancient and medieval non-Western mathematical cultures, and to put them into full

Acces PDF China And India Learning From Each Other Reforms And Policies For Sustained Growth

historical and mathematical context. The Mathematics of Egypt, Mesopotamia, China, India, and Islam gives English readers a firsthand understanding and appreciation of these cultures' important contributions to world mathematics. The five section authors--Annette Imhausen (Egypt), Eleanor Robson (Mesopotamia), Joseph Dauben (China), Kim Plofker (India), and J. Lennart Berggren (Islam)--are experts in their fields. Each author has selected key texts and in many cases provided new translations. The authors have also written substantial section introductions that give an overview of each mathematical culture and explanatory notes that put each selection into context. This authoritative commentary allows readers to understand the sometimes unfamiliar mathematics of these civilizations and the purpose and significance of each text. Addressing a critical gap in the mathematics literature in English, this book is an essential resource for anyone with at least an undergraduate degree in mathematics who wants to learn about non-Western mathematical developments and how they helped shape and enrich world mathematics. The book is also an indispensable guide for mathematics teachers who want to use non-Western mathematical ideas in the classroom.

Nepal and the Geo-Strategic Rivalry between China and India

Abstract: The paper examines the ways in which recent economic growth has been uneven in China and India and what this has meant for inequality and poverty. Drawing on analyses based on existing household survey data and aggregate data

Acces PDF China And India Learning From Each Other Reforms And Policies For Sustained Growth

from official sources, the authors show that growth has indeed been uneven-geographically, sectorally, and at the household level-and that this has meant uneven progress against poverty, less poverty reduction than might have been achieved had growth been more balanced, and an increase in income inequality. The paper then examines why growth was uneven and why this should be of concern. The discussion is structured around the idea that there are both "good" and "bad" inequalities-drivers and dimensions of inequality and uneven growth that are good or bad in terms of what they imply for both equity and long-term growth and development. The authors argue that the development paths of both China and India have been influenced by, and have generated, both types of inequalities and that while good inequalities-most notably those that reflect the role of economic incentives-have been critical to the growth experience thus far, there is a risk that bad inequalities-those that prevent individuals from connecting to markets and limit investment and accumulation of human capital and physical capital-may undermine the sustainability of growth in the coming years. The authors argue that policies are needed that preserve the good inequalities-continued incentives for innovation and investment-but reduce the scope for bad ones, notably through investments in human capital and rural infrastructure that help the poor connect to markets.

China and India

Acces PDF China And India Learning From Each Other Reforms And Policies For Sustained Growth

Global economic growth, recently fuelled by Asia's emerging economies, has greatly accelerated the accumulation of greenhouse gases in the atmosphere and boosted demand for scarce natural resources, including energy, food and mineral raw materials. These developments are pushing the planet close to its ecological boundaries. Transforming the world economy towards sustainability, while ensuring decent levels of resource use for all global citizens, is the greatest challenge of our time. This book explores how innovation systems need to be adapted to successfully confront these challenges. The first chapter introduces the concept of sustainability-oriented innovation systems which highlights the systematic differences between systems that have developed along current resource-intensive technological trajectories and those that address the impending environmental mega-problems. The subsequent articles present case studies of sustainability-oriented innovations in a number of policy areas, including energy efficiency, electric mobility and generation of renewable energy, in China and India. These case studies confirm the specificities of innovation systems geared towards a green techno-economic paradigm. This book was originally published as a special issue of Innovation and Development.

Getting China and India Right

in relation to best practice examples and case studies.

Letters from Japan, China, India

The importance of the Himalayan state of Nepal has been obscured by the international campaign to free Tibet and the vicissitudes of the Sino-Indian rivalry. This book presents the history of Nepal's domestic politics and foreign relations from ancient to modern times. Analysing newly declassified reports from the United States and Britain, published memoirs, oral recollections and interviews, the book presents the historical interactions between Nepal, China, Tibet and India. It discusses how the ageing and inevitable death of the 14th Dalai Lama, the radicalization of Tibetan diaspora and the ascendancy of the international campaign to free Tibet are of increasing importance to Nepal. With its position between China and India, the book notes how the focus could shift to Nepal, with it being home to some 20,000 Tibetan refugees and its chronic political turmoil, deepened by the Asian giants' rivalry. Using a chronological approach, the past and present of the rivalry between China and India are studied, and attempts to chart the future are made. The book contributes to a new understanding of the intricate relationship of Nepal with these neighbouring countries, and is of interest to students and scholars of South Asian studies, politics and international relations.

Cultural Foundations of Chinese Education

Economic Reforms in India and China

Beat local companies at their game. If you need the best practices and ideas for gaining market share in developing economies but don't have time to find them this book is for you. Here are 10 inspiring and useful perspectives, all in one place. This collection of HBR articles will help you: Manage risk in unstable environments Ward off political threats to your business Customize your business model for emerging markets Tailor your strategy to capitalize on countries? strengths Gain ground on emerging giants Compete in China?s new high-tech market Win the war for talent in developing economies Serve the bottom of the pyramid profitably

Cambridge IGCSE India Studies

This first-of-its-kind collection summarizes current trends in the economic scenario of India and China in the backdrop of globalization and outlines not only the goals and strategies for development but also the policies to achieve those goals. It provides a frame of development by addressing various issues such as how to expand the services sector, how to keep pace with the incredible growth of the

Acces PDF China And India Learning From Each Other Reforms And Policies For Sustained Growth

manufacturing sector and how to ensure widest possible diffusions of the huge economic gains. *Economic Reforms in India and China: Emerging Issues and Challenges* presents the latest data and appraises issues pertaining to the economic reforms of India and China—two of the major contenders for global power. The two countries have followed different paths to economic growth and yet both have emerged as fast growing economies. Thus, it is interesting to know the comparative views of the growth stories of the two countries to see where they are heading. The volume brings together some of the most influential scholars in development economics from India and China. They address issues that include the governance as well as the historical perspective of globalization, poverty, inequality of income and the potential for conflict, agriculture, WTO and its relation with trade prospects, and the nature and characteristics of institutions and markets. The compilation is a significant addition to the existing literature on development and reforms, as it puts forward in a single volume, a vast range of academic concerns—those of economists, sociologists, policy makers, agricultural scientists and research scholars.

The Trans Pacific Partnership, China and India

Technology for Education and Learning

The Argumentative Indian

The dynamics of a global economy is being reshaped by the economic emergence of two Asian giants, China and India. How the world's two most populous countries manage globalization as they pursue economic reform and liberalization will impact significantly their societies, the rest of Asia, and the world. This book brings together articles by first rate scholars of China and India to share and discuss their research findings in four areas: Challenges, Opportunities and Responses to Globalization; Social Security and Governance; National Security in the age of Globalization; and Ethnicity and Identity in the New World. The book includes an opening address by Singapore's Minister Mentor Lee Kuan Yew, from his speech on 'Managing Globalization: Lessons from China and India?', delivered at the official opening of the Lee Kuan Yew School of Public Policy on 4 April 2005.

India's Women and China's Daughters

This book offers qualitative studies of collaboration processes conducted in globalizing companies based in Denmark and with subsidiaries in Asia. It addresses the specific contexts of collaboration and studies how people with different cultural backgrounds work together, both face-to-face and in the virtual workplace.

How Does My Country Grow?

Tagore and China is the first full account in English of Rabindranath Tagore's visit to China and its civilizational import. Perhaps for the first time, exhaustive material related to the visit has been collected. The book charts Tagore's 'grand visit' in 1924 undertaken in response to China's 'Tagore fever' and the series of talks he gave there, their antecedents as well as impact. Also discussed is the foundation of Cheena-Bhavana at Visva-Bharati-and thereby of Chinese studies in India-and Tan Yun-shan's lifelong dedication to it and the Sino-Indian love it held. This well-researched book unearths new material from Chinese sources to confirm the devotion of Tagore's interpreter, poet Xu Zhimo, to him and Tagore's affection for Xu Zhimo. Tagore's two personal visits to Xu Zhimo, preceded by the latter's visit to Santiniketan, have also been detailed. Supplemented by several rare photographs, Tagore and China is a fitting tribute to Tagore's 150th birth anniversary and is going to be of abiding value to Sino-Indian understanding.

Learning Strategies for Post-literacy and Continuing Education in China, India, Indonesia, Nepal, Thailand, and Vietnam

The hardline view of Sino-Indian relations found in the published reports of Indian and Chinese security analysts is often at considerable odds with the more

Acces PDF China And India Learning From Each Other Reforms And Policies For Sustained Growth

tempered opinions those same analysts express in private interviews and conversations. What is the reality of the increasingly important security relationship between the two countries? The authors of this new study address that question in depth. Sidhu and Yuan explore a range of key issues, including mutual distrust and misperception (perhaps the most important factor), the undemarcated border, the status of Tibet and Sikkim, trade, the tussle over various nonproliferation treaties, terrorism, the regional roles of the U.S. and Pakistan, and the impact of domestic public opinion and special interests. They do see a trend toward a more pragmatic approach in Beijing and New Delhi to managing differences and broadening the agenda of common interests. Nevertheless, they conclude, significant obstacles remain to the amicable relationship necessary for regional peace and stability, posing a daunting challenge to policymakers in these two rising powers.

Indian and Chinese Immigrant Communities

A Nobel Laureate offers a dazzling new book about his native country India is a country with many distinct traditions, widely divergent customs, vastly different convictions, and a veritable feast of viewpoints. In *The Argumentative Indian*, Amartya Sen draws on a lifetime study of his country's history and culture to suggest the ways we must understand India today in the light of its rich, long argumentative tradition. The millenia-old texts and interpretations of Hindu,

Acces PDF China And India Learning From Each Other Reforms And Policies For Sustained Growth

Buddhist, Jain, Muslim, agnostic, and atheistic Indian thought demonstrate, Sen reminds us, ancient and well-respected rules for conducting debates and disputations, and for appreciating not only the richness of India's diversity but its need for toleration. Though Westerners have often perceived India as a place of endless spirituality and unreasoning mysticism, he underlines its long tradition of skepticism and reasoning, not to mention its secular contributions to mathematics, astronomy, linguistics, medicine, and political economy. Sen discusses many aspects of India's rich intellectual and political heritage, including philosophies of governance from Kautilya's and Ashoka's in the fourth and third centuries BCE to Akbar's in the 1590s; the history and continuing relevance of India's relations with China more than a millennium ago; its old and well-organized calendars; the films of Satyajit Ray and the debates between Gandhi and the visionary poet Tagore about India's past, present, and future. The success of India's democracy and defense of its secular politics depend, Sen argues, on understanding and using this rich argumentative tradition. It is also essential to removing the inequalities (whether of caste, gender, class, or community) that mar Indian life, to stabilizing the now precarious conditions of a nuclear-armed subcontinent, and to correcting what Sen calls the politics of deprivation. His invaluable book concludes with his meditations on pluralism, on dialogue and dialectics in the pursuit of social justice, and on the nature of the Indian identity.
