The Northrop YF-17 holds a special place in aircraft history. The YF-17 was one of the two prototypes tested in the U.S. Air Force Air Combat Fighter competition, a program which attempted to reverse the trend of increasing cost and complexity of new fighter aircraft, and which resulted in the selection and manufacture of the F-16 as the next generation free world fighter. Even though the YF-17 lost the USAF competition, it was the prototype for the U.S. Navy's F/A-18 aircraft. Don Logan is also the author of Rockwell B-1B: SAC's Last Bomber, The 388th Tactical Fighter Wing: At Korat Royal Thai Air Force Base 1972, and Northrop's T-38 Talon: A Pictorial History(all three available from Schiffer Publishing Ltd.).

This book can be downloaded as a PDF file from here. TRAVANCORE STATE MANUAL was written in the closing years of the 1800s. It is a fascinating book in that the perspective of historical events that took place in the region known as the Indian Peninsula is markedly different from what is being taught in current day schools and colleges. There is need to bring this book out in a very readable form. That is what has been attempted here. VED from VICTORIA INSTITUTIONS has written a foreword, which aims to elucidate the various differences in perspective, and also tries to focus on varying issues which are nowadays, hidden away from public knowledge. What ultimately comes out as background of unvarying strength is the fact

that the English rule, especially that by the English EAST INDIA COMPANY was really of benign qualities, towards the common man of this area. This book contains the story of an independent kingdom at the southern most end of the Indian Peninsula, which lost its independence in 1947, in the wake of a fool coming to power in England.
