### **Win Win**

There are more than 1,000 school and community college (K-14) districts in California. To build, repair, or equip their campuses, they must ask voters to approve a general obligation (GO) bond and raise their property taxes rates -- a big ask. While GO bonds have become a multi-billion-dollar market, there has to date been no "how to" guide for district administrators, elected officials, taxpayer organizations, and concerned citizens. There is now. With hard-earned wisdom and wry wit, Dale Scott, California's leading K-14 financial advisor, has written WIN WIN: An Insider's Guide to School Bonds to demystify the complex, often challenging process that goes on "underneath the hood" in developing, structuring, passing, and selling a GO bond. Drawing on three decades of work as an advisor to

school districts and community college districts, investment banker on Wall Street, financial advisor, and campaign manager, Dale walks readers through each step of the process, answering the many questions he's been asked over the years. Hard-hitting, detailed, and humorous, WIN WIN explores and explains why some bond elections pass but others fail, how bond deals are put together, tips on selecting the right team of professionals, how to avoid recent scandals surrounding GO bonds, and how to tell if tax rate estimates are accurate or just wishful thinking. Scott's book is an upbeat demystification of the complex processes of California school bonds, showing that when executed correctly, the teamwork of passing a school bond can have a transformative effect on both local schools and people's sense of their role in their community.

### **The British National Bibliography**

It was not the author's original intention to produce a series of boys' books. On the contrary, he expected that his work in this line would begin and end with 'The American Boy's Handy Book.' The great popularity of that book is a constant source of gratification and pleasure to the author; but he was not a little surprised and embarrassed when he discovered that in place of satisfying the lads he had only whetted their appetite for more material in the same line. Letters from boys in many parts of the British Provinces, and from all over the United States, convinced the writer that he had yet work to do for them, and the revised and enlarged edition of 'The American Boy's Handy Book' was issued. After a brief period of

time the quaintly worded letters in boyish handwriting began again to increase the mail left at the author's studio, and this time he laid aside his brush and pencil to produce "The Outdoor Handy Book." It is hoped that the present demand for new ideas for boys will be fully satisfied by "The Jack of All Trades." To the best of the author's knowledge and belief there is not a thing described in this book which has not been proved practical by the experiments of himself or some boy or boys. Parts of this book have appeared in various periodicals, but all these chapters have been revised and enlarged. It is now a generally accepted truth that the so-called skill of the hand is in reality the skill of a trained mind. The necessity, in work or play, of constantly overcoming new obstacles and solving new problems, develops a strong and normal mind and body. There can be little doubt that the rude schooling and hard knocks of a pioneer's life rejuvenated our race and developed those qualities in the characters of Americans, without which Washington would have been but a country gentleman and Lincoln a village store-keeper. Had little Abe Lincoln been reared under the care of a foreign woman with cap and ribbons (i.e. a French nurse), his strong manly character would never have been developed and our country would have lost one of its grandest patriots and history its most unique figure. Aside from these vitally important facts, art demands that our youth should be encouraged to do things for themselves, to produce things by their own labor. The most finished product of the machine cannot appeal to the heart of a real artist as does some useful and homely object which still bears the marks of its maker's hands.

As an increasingly polarized America fights over the legacy of racism, Susan Neiman, author of the contemporary philosophical classic *Evil in Modern Thought*, asks what we can learn from the Germans about confronting the evils of the past. In the wake of white nationalist attacks, the ongoing debate over reparations, and the controversy surrounding Confederate monuments and the contested memories they evoke, Susan Neiman's *Learning from the Germans* delivers an urgently needed perspective on how a country can come to terms with its historical

wrongdoings. Neiman is a white woman who came of age in the civil rights-era South and a Jewish woman who has spent much of her adult life in Berlin. Working from this unique perspective, she combines philosophical reflection, personal stories, and interviews with both Americans and Germans who are grappling with the evils of their own national histories. Through discussions with Germans, including Jan Philipp Reemtsma, who created the breakthrough Crimes of the Wehrmacht exhibit, and Friedrich Schorlemmer, the East German dissident preacher, Neiman tells the story of the long and difficult path Germans faced in their effort to atone for the crimes of the Holocaust. In the United States, she interviews James Meredith about his battle for equality in Mississippi and Bryan Stevenson about his monument to the victims of lynching, as well as lesser-known social justice activists in the South, to provide a compelling picture of the work contemporary Americans are doing to confront our violent history. In clear and gripping prose, Neiman urges us to consider the nuanced forms that evil can assume, so that we can recognize and avoid them in the future.

Perhaps our records have been lost or the physician is rushed and abrupt, spending more time looking at the computer than talking to us. And then we get an incomprehensible bill - usually, many different bills - that leaves us confused, frustrated, and in the worst cases, looking at a dire personal financial crisis. Why is that? Why, when the U.S. spends more on health care than any country in the world, can't we get it right? In *Unraveled*, physicians William B. Weeks and James N. Weinstein look at the health
