The story of the history-making meeting between scorned master composer Johann Sebastian Bach and Prussia's Frederick the Great discusses Frederick's abuse-marked upbringing, his challenge to Bach to improvise an intricate fugue, and their clashes about faith as they reflected the Reformation and Enlightenment periods. 30,000 first printing.

Evening in the Palace of Reason

Charles I, often known as Charlemagne, is one of the most extraordinary figures ever to rule an empire. Driven by unremitting physical energy and intellectual curiosity, he was a man of many parts, a warlord and conqueror, a judge who promised "for each their law and justice," a defender of the Latin Church, a man of flesh and blood. In the twelve centuries since his death, warfare, accident, vermin, and the elements have destroyed much of the writing on his rule, but a remarkable amount has survived. Janet Nelson's wonderful new book brings together everything we know about Charles I, sifting through the available evidence, literary and material, to paint a vivid portrait of the man and his motives. Building on Nelson's own extraordinary knowledge, this biography is a sort of detective story, prying into and interpreting fascinating and often obdurate scraps of evidence, from prayer books to skeletons, gossip to artwork. Charles's legacy lies in his deeds and their continuing resonance, as he shaped counties, countries, and continents; founded and rebuilt towns and monasteries; and consciously set himself up not just as King of the Franks, but as the head of the

renewed Roman Empire. His successors—even to the present day—have struggled to interpret, misinterpret, copy, or subvert his legacy. Janet Nelson gets us as close as we can hope to come to the real figure of Charles the man as he was understood in his own time.

Sentimental Fabulations, Contemporary Chinese Films

The acclaimed author of *The Vertigo Years* tells the remarkable story of the Parisian salon that brought together the greatest minds of the 18th century - Rousseau, Hume, Diderot, Voltaire, Benjamin Franklin - and changed the world forever. The Paris salon of Paul-Henri Thiry, Baron d'Holbach - where friendship and radical philosophy flourished throughout the 1760s - stands as a seminal event in Western history. Over wine-soaked dinner parties, the finest minds of the Western world matched wits and scandalized one another with their radical ideas. Holbach's house became an epicenter of free thinking, a place like no other in repressive eighteenth-century Europe, frequented by men and women united by their love of intellectual freedom, their contempt for the conventional, and often the danger of persecution. It was a moment of astonishing radicalism in European thought, so uncompromising and bold that its vision has still not been fully realized. In *A Wicked Company*, acclaimed historian Philipp Blom describes the fortunes of this group of friends: writers of genius all, full of wit and courage, but also personal contradictions, doubts, conflicts of conscience, and

their fair share of arguments and love affairs. Their bracing, liberating, humanist vision bursts free of the page in Blom's telling, and their analysis of our culture remains as valid as it was then. A startlingly relevant work of narrative history, *Wicked Company* forces us to confront with new eyes modern debates about our society and its future. From the Hardcover edition.

Memories of Gospel Triumphs Among the Jews During the Victorian Era

This book explores how alarmist social discourses about 'cruel' young people fail to recognize the complexity of cruelty and the role it plays in child agency. Examining representations of cruel young people in popular texts and popular culture, the collected essays demonstrate how gender, race, and class influence who gets labeled 'cruel' and which actions are viewed as negative, aggressive, and disruptive. It shows how representations of cruel young people negotiate the violence that shadows polite society, and how narratives of cruelty and aggression are used to affirm, or to deny, young people's agency.

Cruel Delight

Die Erfindung der Welt

Cruel Investigation investigates the fascination with joyful malice in 18th-century Europe and how this obsession helped inform the very meaning of humanity. James A. Steintrager reveals how the understanding of cruelty moved from an inexplicable,

apparently paradoxical "inhuman" pleasure in the misfortune of others to an eminently human trait stemming from will and freedom.

Dan Jiang Ping Lun

Internationale Bibliographie der Rezensionen wissenschaftlicher Literatur

Choice Outstanding Academic Title, 2008 The period of the Enlightenment saw great changes in the way animals were seen. The codifying and categorizing impulse of the age of reason saw sharp lines drawn between different animal species and between animals and humans. In 1600, "beasts" were still seen as the foils and adversaries of human reason. By 1800, animals had become exemplars of sentiment and compassion, the new standards of truth and morals. A new age had dawned, a time when humans admired animals and sought to recover their own animality. A Cultural History of Animals in the Age of Enlightenment presents an overview of the period and continues with essays on the position of animals in contemporary symbolism, hunting, domestication, sports and entertainment, science, philosophy, and art.

The Enlightenment and the Book

The cross of Christ is undeniably central to the Christian faith. But, how can the cruelty and brutality of a two-thousand-year-old Roman cross touch base with a hedonistic world that has been so desensitized towards violence? Within the postmodern setting of a body-obsessed culture, Christianity urgently requires an innovative and stimulating way of understanding the cross and its atoning significance. At the heart of this book is the Naked Christ--an emblem through which the author draws on the rich resources of the Christian tradition in its portrayal of the cross. He explores how the metaphors of nakedness and clothing can encapsulate aspects of atonement and enable them to be understood within a variety of contemporary contexts. The Naked Christ is a useful resource for anyone seeking fresh ways to express what the cross of Christ means to contemporary culture.

In a dual biography crafted around the famous encounter between the French philosopher who wrote about power and the Russian empress who wielded it with great aplomb, Robert Zaretsky invites us to reflect on the fraught relationship between politics and philosophy, and between a man of thought and a woman of action.

The Works of William E. Channing

What is the sentimental? How can we understand it by way of the visual and narrative modes of signification specific to cinema and through the manners of social interaction and collective imagining specific to a particular culture in transition? What can the sentimental tell us about the precarious foundations of human coexistence in this age of globalization? Rey Chow explores these questions

through nine contemporary Chinese directors (Chen Kaige, Wong Kar-wai, Zhang Yimou, Ann Hui, Peter Chan, Wayne Wang, Ang Lee, Li Yang, and Tsai Ming-liang) whose accomplishments have become historic events in world cinema. Approaching their works from multiple perspectives, including the question of origins, nostalgia, the everyday, feminine "psychic interiority," commodification, biopolitics, migration, education, homosexuality, kinship, and incest, and concluding with an account of the Chinese films' epistemic affinity with the Hollywood blockbuster *Brokeback Mountain*, Chow proposes that the sentimental is a discursive constellation traversing affect, time, identity, and social mores, a constellation whose contours tends to morph under different historical circumstances and in different genres and media. In contemporary Chinese films, she argues, the sentimental consistently takes the form not of revolution but of compromise, not of radical departure but of moderation, endurance, and accommodation. By naming these films sentimental fabulations screen artifacts of cultural becoming with irreducible aesthetic, conceptual, and speculative logics of their own Chow presents Chinese cinema first and foremost as an invitation to the pleasures and challenges of critical thinking.

The late eighteenth century witnessed an explosion of intellectual activity in Scotland by such luminaries as David Hume, Adam Smith, Hugh Blair, William Robertson, Adam Ferguson, James Boswell, and Robert Burns. And the books written by these seminal thinkers made a significant mark during their time in almost every field of polite literature and higher learning throughout Britain, Europe, and the Americas. In this magisterial history, Richard B. Sher breaks new ground for our understanding of the Enlightenment and the forgotten role of publishing during that period. *The Enlightenment and the Book* seeks to remedy the common misperception that such classics as *The Wealth of Nations* and *The Life of Samuel Johnson* were written by authors who eyed their publishers as minor functionaries in their profession. To the contrary, Sher shows how the process of bookmaking during the late eighteenth-century involved a deeply complex partnership between authors and their publishers, one in which writers saw the book industry not only as pivotal in the dissemination of their ideas, but also as crucial to their dreams of fame and monetary gain. Similarly, Sher demonstrates that publishers were involved in the project of bookmaking in order to advance human knowledge as well as to accumulate profits. *The Enlightenment and the Book* explores this tension between creativity and commerce that still exists in scholarly publishing today. Lavishly illustrated and elegantly conceived, it will be must reading for anyone interested in the history of the book or the production and diffusion of Enlightenment thought.

Comment, en même temps que se formait la rationalité scientifique, a pu se développer ce qu'il faut bien appeler des " rationalités abominables ", chargées de justifier l'injustifiable ? Cette étude historique des technologies d'avilissement appelle ainsi à la constitution d'une philosophie politique de la pratique scientifique.
