## Pigeon River Country

From Darkness to Sight chronicles the remarkable life journey of Dr. Ming Wang, a world-renowned laser eye surgeon and philanthropist. As a teenager, Ming

fought valiantly to escape one of history's darkest eras - China's Cultural Revolution - during which millions of innocent youth were deported to remote areas to face a life sentence of poverty and hard labor. Through his own tenacity and his parents' tireless efforts to provide a chance of freedom for their son, Ming eventually made his way to America with \$50 in his pocket and an American dream in his heart, where against all odds he would earn a PhD in laser physics and graduate magna cum laude with the highest honors from Harvard Medical School and MIT. He embraced his Christian faith and tackled one of the most important questions of our time - Are faith and science friends or foes? - which led to his invention of a breakthrough biotechnology to restore sight. To date, Dr. Wang has performed over 55,000 eye procedures and has treated patients from nearly every state in the U.S. and from over 55 countries worldwide. He is considered the "doctor's doctor," as he has operated on over 4,000 physicians. Dr. Wang has published 8 textbooks, holds several U.S. patents and performed the world's first laser artificial cornea implantation. He is the recipient of the Honor Award from American Academy of Ophthalmology and the Lifetime Achievement Award from American Chinese Physician Association. Dr. Wang is currently the only surgeon in the state who performs 3D LASIK (age 18+), 3D Forever Young Lens Surgery (age 45+), 3D Laser Kamra (age 45+) and 3D Laser Cataract Surgery (age 60+). Dr. Wang established a non-profit foundation which provides sight restoration surgeries for indigent patients who otherwise would never have the opportunity to receive them free-of-charge. This is a story of one man's inspirational journey, of turning

fear, poverty, persecution and prejudice into healing and love for others. It demonstrates how focus, determination, humility and profound faith can inspire a life that, in turn, impacts that of countless others. "Dr. Wang is not only a dear friend and the very best eye surgeon, he is also one of the greatest people I have ever known." - Dolly Parton "To try to put my feelings about Dr. Wang, his accomplishments, his courage, his iron will and his faith into a couple of sentences would be tantamount to packing a Mack truck into a burlap bag. This remarkable man overcame all but impossible odds to become the best in his field and this world is a better place for having Dr. Ming Wang pass through it." - Charlie Daniels. "I have known Dr. Wang for nearly two decades - he is a respected eye surgeon and friend. What Ming has done with his life since arriving here in the United States as a penniless student over 30 years ago exemplifies the true essence of the American dream, and the freedom that we enjoy in this great country. I highly recommend his autobiography, From Darkness to Sight." - Senator William H. Frist, MD, former U.S. Senate Majority Leader "If I didn't know Ming, it would be hard to believe the story of his life. But I do know him, and his life truly is a remarkable story of faith, persistence, and excellence." - Bill Haslam, Governor of the state of Tennessee "Ming Wang is well-known for the eye surgeries he's performed to give countless people better sight. And it's hard to forget that he's also a ballroom dancer once you've seen one of his ads on TV. But what many people don't know is that Dr. Wang also gives very generously of his time and talents so that blind children in other countries can regain their sight. What better gift can you give

someone? Nashville is lucky to be able to count Dr. Wang as one of our own." - Karl Dean, Mayor, Nashville "My deeply respected friend, Dr. Ming Wang, has topped the heights of human achievement. Through his personal and professional triumphs he has captured the essence of what it means to be free and to be a loving humanitarian. The story of his unique life, as only he can tell it, will be a blessing and an inspiration to all who come to know it." - Former governor of Tennessee Dr. Winfield Dunn "From Darkness to Sight is an inspiring story that shows how hard work, optimism and faith not only can lead to personal success, but also make our country stronger. Dr. Ming Wang's journey from dark days in Communist China to his career in the United States as a physician and philanthropist is a testament to the possibilities of the American Dream." - Senator Lamar Alexander

The long awaited new edition of a classic offers memories, myths, and meanings of the largest contiguous piece of wild land in Michigan's Lower Peninsula. This updated edition explores more deeply why and how the outdoors moves and compels us. It's a book about mice who sing, elk who wear collars, deer who kiss, and birds who could dictate their compositions to Mozart. It's about the human species interacting in generous and sometimes misguided ways with the rest of life. It's about men trying to ripen pinecones into pineapples and women taking better aim with a revolver than expected. It's about

poetry—from Mary Oliver, Lao Tzu, and Theodore Roethke—and seeing hawks dive in a night sky or feeling oil geologists shake the earth below. It's about finding fish dead in the river by the thousands and crouching behind a stump to watch beaver build a dwelling. While this book considers life beyond the boundaries of Pigeon River Country, it is steeped in the specifics of a place that lives mostly on its own, instead of human, terms. The Pigeon River Country is a remote northern forest, ecologically distinct from most of the United States. Laced with waterways, it has a storied past. Dale Clarke Franz has collected personal accounts from various people intrigued with the Pigeon River Country—including loggers, conservationists, mill workers, campers, even the young Ernest Hemingway, who said he loved the forest "better than anything in the world." There are comprehensive discussions of the area's flora and fauna, guides to trails and camping sites, and photos showcasing the changing face of this hidden national treasure.

subject - grammar. Grammar for Middle School: A Sentence-Composing Approach gives your students the chance to absorb and replicate the grammatical structures used by some of the best writers of our times. Included among the over 150 authors, 200 titles, and 400 model sentences in Grammar for Middle School are award-winning young-adult literature such as Cynthia Voigt's *Homecoming*, popular favorites like J. K. Rowling's *Harry Potter*, and curricular staples such as John Steinbeck's *The Red Pony* and *The Pearl*. Fourteen grammatical structures are developed in the same predictable, understandable manner, using the sentence-composing approach. When students first encounter a tool, it is clearly defined and characterized. Then it's practiced through five activities: matching, unscrambling, combining, imitating, and expanding. Finally, a creative writing activity immerses students in the composition or revision of a paragraph through independent use of the sentence - composing tools they have already learned. Best of all, after each section, review activities - which can be easily graded as unit or final tests - offer opportunities for students to bring it all together and build better sentences. An accompanies Grammar for Middle School and includes advice, tips, resources, answer keys, and even curricular plans for teachers who are either new to the Killgallon approach or sentence-composing veterans. No one can forge the link between grammar and writing like Don and Jenny Killgallon. The terror began one autumn night when Jack Railey's young daughter Sarah, did not return home. Was it kidnapping, brainwashing, or worse? Suddenly Jack is caught up in a harrowing scenario of betrayal, terror, and death, when he learns she has joined a cult. Their leader, Kahir, is a man some call kind, others call evil-some say he protects children, others say he destroys them. Jack is asked to join a small band of parents led by a man named Anthony Bane-their aim, to regain their children from the clutches of this Messiah. Agreeing to meet with these strangers for his wife's sake and his own curiosity, Jack soon finds that they had their own secrets-secrets that lead to dangerous consequences. After seeing things thought impossible, Jack finally understands that Kahir possesses powers of dangerous proportion and deadly force. Anyone opposing him would meet a grim fate-a fate pulled from their deepest fears. If Jack Railey wants his daughter back, he'll have to fight a battle unlike any other he has ever fought before. To win he must release his own power-he must face his dark side-he must learn the secrets of the Messiah.

We start by covering the basics of how to create smart systems using machine learning and deep learning techniques. You will assimilate various neural network architectures such as CNN, RNN, LSTM, to solve critical new world challenges. You will learn to train a model to detect diabetic retinopathy conditions in the human eye and create an intelligent system for performing a video-to-text translation. You will use the transfer learning technique in the healthcare domain and implement style transfer using GANs. Later you will learn to build AI-based recommendation systems, a mobile app for sentiment analysis and a powerful chatbot for carrying customer services. You will implement AI techniques in the cybersecurity domain to generate Captchas. Later you will train and build autonomous vehicles to self-drive using reinforcement learning. You will be using libraries from the Python ecosystem such as TensorFlow, Keras and more to bring the core aspects of machine learning, deep learning, and AI. By the end of this book, you will be skilled to build your own smart models for tackling any kind of AI problems without any hassle. What you will learn

This title includes a number of Open Access chapters. The twenty-first century world faces several enormous challenges: how to mitigate climate change, meet a growing energy demand without relying on fossil fuels, and manage the escalating quantities of solid waste generated by cities around the world. This compendium volume offers a viable solution to all three: using solid waste as a renewable resource. Intended for a wide audience ranging from engineers and academics to decision-makers in both the public and private sectors, this volume has gathered together research into a range of technologies and methodologies. The editors, two well-published researchers at the top of their field, have selected articles that lay the foundation for this discussion. They have then included chapters for the following waste management scenarios: anaerobic digestion, composting, pyrolysis and chemical upgrading, incineration and carbonization, and

When he became a commercial pilot at age nineteen, Bill Grenier never imagined that one day he'd be captain of the largest commercial plane the world had seen, flying the highest profile routes of a proud national carrier. Even less could he have imagined, at age nineteen and with barely a penny to his name, that he'd one day be a wealthy man. But he would ultimately control an empire worth nearly a billion dollars. With liberal doses of wit and humour, Miles to Millions shows what a little luck, lots of perseverance, and an appetite for adventure can do. From boarding house to boardroom, from cradle to cockpit, Grenier offers a fascinating story of success both as a commercial pilot and as a businessman. Filled with anecdotes you'd never expect from a single career from acting as repo man taking planes for payment to saving hundreds of passengers in a stricken 747 with a collapsed co-pilot Miles to Millions is a high-flier of a story bound to entertain both aviation experts and enthusiasts alike.

Managing the IT Service Process is the first book of its kind to recognize the truth of IT Service delivery. It takes the overall view of the service management process and links together the elements of service level management, systems availability, costs and benchmarking, and the helpdesk. In the last 5 years there has been a major structural shift in the IT industry with the traditional position of Helpdesk Manager being replaced by a new function of IT Services Manager. The industry is now concentrating on the formulation of an end-to-end service process that replaces the previous norm of several disparate and non-integrated sections in an IT department such as the helpdesk, applications maintenance, operations, development procurement and systems management. Managers are focusing on a totality of management so they can correlate costs and processes and offer their customers an integrated service. Managing the IT Services Process is an instructional manual written by an acknowledged industry expert and includes techniques, charts, methods, case studies and anecdotes to support the text. The author encourages the reader to formulate an end-to-end IT service process by using a step by step approach. The text describes and encourages integration in IT and therefore will be useful for managers involved in the unified process.

A modern composer linked to the great Russian tradition of Rimsky-Korsakov and Mussorgsky, Alexander Tcherepnin produced a substantial body of work-both compositions and writings-that is of interest to music scholars as well as performers. Although his works are better known and more frequently performed in Europe, Tcherepnin made a unique contribution to the U.S. musical scene in the 1950s and 1960s as a teacher of composition at De Paul University in Chicago. This volume provides detailed information on his life and accomplishments, together with a catalogue of his works and performances and a complete bibliography. The first section offers an account of the composer's life and musical education in Russia and Paris and his

subsequent career in the United States. It concludes with a critical analysis of his musical style. The catalogue is followed by separate alphabetical, chronological, and genre listings of the composer's works. The final sections are devoted to a discography of commercially available sound recordings and an annotated bibliography of writing by and about Tcherepnin. A series of appendixes contains valuable additional information on Tcherepnin's life and accomplishments, as well as data relating to the musical careers of his father, his two sons, and several of his composition students who have become recognized composers in their own right. This work, which incorporates the first detailed English-language biography of Alexander Tcherepnin, will be a valuable resource for scholars, music educators, and musicians with an interest in Russian music of the late nineteenth and early twentieth centuries.

Clerk Maxwell will be near the top of the list. Maxwell, an unassuming Victorian Scotsman, explained how we perceive colour. He uncovered the way gases behave. And, most significantly, he transformed the way physics was undertaken in his explanation of the interaction of electricity and magnetism, revealing the nature of light and laying the groundwork for everything from Einstein's special relativity to modern electronics. Along the way, he set up one of the most enduring challenges in physics, one that has taxed the best minds ever since.
