Growth and Jobs in Developing Economies: Trends and Cycles

In this case study, readers will embark on an improbable journey through the heart of Africa to discover how indigenous people cope with the rapid-killing Ebola virus. The Hewletts are the first anthropologists ever invited by the World Health Organization to join a medical intervention team and assist in efforts to control an Ebola outbreak. Their account addresses political, structural, psychological, and cultural factors, along with conventional intervention protocols as problematic to achieving medical objectives. They find obvious historical and cultural answers to otherwise-puzzling questions about why village people often flee, refuse to cooperate, and sometimes physically attack members of intervention teams. Perhaps surprisingly, readers will discover how some cultural practices of local people are helpful and should be incorporated into control procedures. The authors shed new light on a continuing debate about the motivation for human behavior by showing how local responses to epidemics are rooted both in culture and in human nature. Well-supported recommendations emerge from a comparative analysis of Central African cases and pandemics worldwide to suggest how the United States and other countries might use anthropologists and the insights of anthropologists to mount more effective public health campaigns, with particular attention to avian flu and bioterrorism. Annales parlementaires de Belgique

Relatively affluent individuals from various corners of the globe are increasingly choosing to migrate, spurred on by the promise of a better and more fulfilling way of life within their destination. Despite its increasing scale, migration academics have yet to consolidate and establish lifestyle migration as a subfield of theoretical enquiry, until now. This volume offers a dynamic and holistic analysis of contemporary lifestyle migrations, exploring the expectations and aspirations which inform and drive migration alongside the realities of life within the destination. It also recognizes the structural conditions (and constraints) which frame lifestyle migration, laying the groundwork for further intellectual enquiry. Through rich empirical case studies this volume addresses this important and increasingly common form of migration in a manner that will interest scholars of mobility, migration, lifestyle and culture across the social sciences.

ORSTOM actualités

The “middle-income trap” is the phenomenon of hitherto rapidly growing economies stagnating at middle-income levels and failing to graduate into the

ranks of high-income countries. In this study we examine the middle-income trap as a special case of growth slowdowns, which are identified as large sudden and sustained deviations from the growth path predicted by a basic conditional convergence framework. We then examine their determinants by means of probit regressions, looking into the role of institutions, demography, infrastructure, the macroeconomic environment, output structure and trade structure. Two variants of Bayesian Model Averaging are used as robustness checks. The results—including some that indeed speak to the special status of middle-income countries—are then used to derive policy implications, with a particular focus on Asian economies.

From New York Times bestselling author Douglas Clegg comes the Bram Stoker Award-winning collection *The Nightmare Chronicles* -- 13 spine-tingling tales of dark mystery, supernatural thrills and twisted horror which "can chill the spine so effectively that the reader should keep paramedics on standby, " says bestselling author Dean Koontz. "Clegg brings his stories together with a chilling fictive conceit. The effect is dangerously seductive." -- *Locus* "Clegg's (The Halloween Man, etc.) collection of 13 tales takes risks and is full of passions that sometimes burst forth violently...Clegg's use of innovative metaphors catapults each story

beyond a landscape crowded with the horror genre's usual monsters and madmen into a territory he alone can claim.” – Publisher’s Weekly “...Like M. R. James, Douglas Clegg can ‘write about the vile and horrific without seeming to smear it over himself or you.’ Like Shirley Jackson he has an understated precision of language and the ability to portray his characters emotionally in a wickedly effective manner. And, like Stephen King, he loves to tell stories and tells them well. At the same time, Clegg is a thoroughly modern writer Without doubt, one of the best collections of the year. -- DarkEcho “Every story is perfectly different and definitely unlike any other horror novel/film I’ve read or watched...all of them have their images that could come back to you in your dreams.” – Doubleshot Reviews. “Clegg writes some of the most harrowing, unforgettable tales you're ever likely to come upon.. Clegg's best stories...slip into your subconscious and stay with you well beyond the last turning of the page” – The Chiaroscuro “I was truly impressed with this collection, and was not surprised to learn that it received the 1999 International Horror Guild Award for Best Collection, and the 1999 Bram Stoker Award for Superior Achievement in a Fiction Collection.” – Casual Debris Contains the short stories "Underworld" "O Rare and Most Exquisite" "The Rendering Man" "The Fruit of Her Womb" "The Hurting Season" "Chosen" "The Night Before Alec Got Married" "Only Connect" "The Little Mermaid," "Damned If You Do" "The Ripening Sweetness of Late Afternoon" Plus the acclaimed novelettes, "White Chapel" and "I Am Infinite, I Contain Multitudes."

Devenez vendeur de luxe.

Europe, France outremer

How will the world be able to feed close to 9 billion people in 2050 and still maintain the ecosystems? In this perspective, INRA and CIRAD launched the initiative, in 2006, to develop a foresight project for analysing issues pertaining to the world's food and agricultural systems on the 2050 timeline. This book provides a synthetic presentation of the main conclusions that this foresight project has yielded. First, it recapitulates the main statistical references for the period 1961 to 2003, before going on to describe the Agribiom simulation tool used to calculate food biomass resource use balances. Two scenarios on the 2050 timeline are then considered: Agrimonde GO is a trend-based scenario that bets on economic growth to feed the world, in a context where environmental protection is not a priority; in contrast, the idea in Agrimonde 1 is to feed the world while preserving its ecosystems.

The Palgrave International Handbook of Mixed Racial and Ethnic Classification

This handbook provides a global study of the classification of mixed race and ethnicity at the state level, bringing together a diverse range of country case studies from around the world. The classification of race and ethnicity by the state is a common way to organize and make sense of populations in many countries, from the national census and birth and death records, to identity cards and household surveys. As populations have grown, diversified, and become increasingly transnational and mobile, single and mutually exclusive categories struggle to adequately capture the complexity of identities and heritages in multicultural societies. State motivations for classification vary widely, and have shifted over time, ranging from subjugation and exclusion to remediation and addressing inequalities. The chapters in this handbook illustrate how differing histories and contemporary realities have led states to count and classify mixedness in different ways, for different reasons. This collection will serve as a key reference point on the international classification of mixed race and ethnicity for students and scholars across sociology, ethnic and racial studies, and public

policy, as well as policy makers and practitioners.

Jeune Afrique

Corporate social responsibility (CSR) expresses a fundamental morality in the way a company behaves toward society. It follows ethical behavior toward stakeholders and recognizes the spirit of the legal and regulatory environment. The idea of CSR gained momentum in the late 1950s and 1960s with the expansion of large conglomerate corporations and became a popular subject in the 1980s with R. Edward Freeman's *Strategic Management: A Stakeholder Approach* and the many key works of Archie B. Carroll, Peter F. Drucker, and others. In the wake of the financial crisis of 2008–2010, CSR has again become a focus for evaluating

corporate behavior. First published in 1953, Howard R. Bowen's *Social Responsibilities of the Businessman* was the first comprehensive discussion of business ethics and social responsibility. It created a foundation by which business executives and academics could consider the subjects as part of strategic planning and managerial decision-making. Though written in another era, it is regularly and increasingly cited because of its relevance to the current ethical issues of business operations in the United States. Many experts believe it to be the seminal book on corporate social responsibility. This new edition of the book includes an introduction by Jean-Pascal Gond, Professor of Corporate Social Responsibility at Cass Business School, City University of London, and a foreword by Peter Geoffrey Bowen, Daniels College of Business, University of Denver, who is Howard R. Bowen's eldest son.

Universal basic income (UBI) is emerging as one of the most hotly debated issues in development and social protection policy. But what are the features of UBI? What is it meant to achieve? How do we know, and what don't we know, about its performance? What does it take to implement it in practice? Drawing from global evidence, literature, and survey data, this volume provides a framework to elucidate issues and trade-offs in UBI with a view to help inform choices around its appropriateness and feasibility in different contexts. Specifically, the book examines how UBI differs from or complements other social assistance programs in terms of objectives, coverage, incidence, adequacy, incentives, effects on poverty and inequality, financing, political economy, and implementation. It also reviews past and current country experiences, surveys the full range of existing policy proposals, provides original results from microtax benefit simulations, and sets out a range of considerations around the analytics and practice of UBI.

Children's Books from Other Countries

This book examines how ruling elites manage and manipulate their political

opposition in the Middle East. In contrast to discussions of government-opposition relations that focus on how rulers either punish or co-opt opponents, this book focuses on the effect of institutional rules governing the opposition. It argues rules determining who is and is not allowed to participate in the formal political arena affect not only the relationships between opponents and the state, but also between various opposition groups. This affects the dynamics of opposition during prolonged economic crises. It also shapes the informal strategies that ruling elites use toward opponents. The argument is presented using a formal model of government-opposition relations. It is demonstrated in the cases of Egypt under Presidents Nasir, Sadat and Mubarek; Jordan under King Husayn; and Morocco under King Hasan II.

Les Premières expériences de planification en Afrique noire

On September 15, 2008, Lehman Brothers, the fourth largest U.S. investment bank filed for bankruptcy. Global credit markets tightened. Spreads skyrocketed. International trade plummeted by double digits. Banks were reportedly unable to meet the demand from their customers to finance their international trade

Download Free Demande D Emploi Ocp Exemple

operations, leaving a trade finance 'gap' estimated at around US\$25 billion. Governments and international institutions felt compelled to intervene based on the information that some 80-90 percent of world trade relies on some form of trade finance. As the recovery unfolds, the time has come to provide policy makers and analysts with a comprehensive assessment of the role of trade finance in the 2008-09 great trade collapse and the subsequent role of governments and institutions to help restore trade finance markets. After reviewing the underpinning of trade finance and interfirm trade credit, 'Trade Finance during the Great Trade Collapse' aims to answer the following questions: - Was the availability and cost of trade finance a major constraint on trade during the 2008-09 global economic crisis? - What are the underpinnings and limits of national and international public interventions in support of trade finance markets in times of crisis? - How effective were the public and private sector mechanisms put in place during the crisis to support trade and trade finance? - To what extent have the new banking regulations under Basel II and Basel III exacerbated the trade finance shortfall during the crisis and in the post-crisis environment, respectively? 'Trade Finance during the Great Trade Collapse' is the product of a fruitful collaboration during the crisis among the World Bank Group, international financial partners, private banks, and academia. 'Trade is the lifeblood of the world economy, and the sharp collapse in trade volumes was one of the most dramatic consequences of the global financial crisis. It was the moment the financial crisis hit the real economy, and when parts of the world far from the epicenter of financial turbulence felt its full

Life's most profound mysteries have inspired great thinkers throughout the ages, but few answers have emerged to address these major questions: Why are we born? What is the meaning of life? What happens to us after we die? Is there life after so-called human death? Can we ever hope to have the answers to these important questions? Even the pursuit of answers stirs up controversy; some say that the questions themselves are more important than any answers that might be shared. Author Terence Hamilton-Morris, a clairvoyant and open medium, offers his insights into these unanswerable mysteries. His approach is controversial, enlightening, and confrontational. He invites us to look at these questions from a broader spectrum of possibility and encourages us to look more intently at subjects that we are often instructed to ignore. He challenges followers of all religions to be truthful to their original teachings. He stresses the importance of discipline, motivation, and respect for others, and he hopes to inspire us to take better care of our environment. Hamilton-Morris has called upon a veritable panel of experts from the spirit world, each of whom has chosen to share their experiences, insight, and teaching from beyond, based on their own experiences from their time on Earth. Compelled to share this story by his personal guides because of his extraordinary relationship to the world of Spirit, he wants the world to be able to reach what Spirit demanded of him.

Very Little-- Almost Nothing

Nearly twenty-five hundred years ago the Greek thinker Heraclitus supposedly uttered the cryptic words "Phusis kruptesthai philei." How the aphorism, usually translated as "Nature loves to hide," has haunted Western culture ever since is the subject of this engaging study by Pierre Hadot. Taking the allegorical figure of the veiled goddess Isis as a guide, and drawing on the work of both the ancients and later thinkers such as Goethe, Rilke, Wittgenstein, and Heidegger, Hadot traces

successive interpretations of Heraclitus' words. Over time, Hadot finds, "Nature loves to hide" has meant that all that lives tends to die; that Nature wraps herself in myths; and (for Heidegger) that Being unveils as it veils itself. Meanwhile the pronouncement has been used to explain everything from the opacity of the natural world to our modern angst. From these kaleidoscopic exegeses and usages emerge two contradictory approaches to nature: the Promethean, or experimental-questing, approach, which embraces technology as a means of tearing the veil from Nature and revealing her secrets; and the Orphic, or contemplative-poetic, approach, according to which such a denuding of Nature is a grave trespass. In place of these two attitudes Hadot proposes one suggested by the Romantic vision of Rousseau, Goethe, and Schelling, who saw in the veiled Isis an allegorical expression of the sublime. "Nature is art and art is nature," Hadot writes, inviting us to embrace Isis and all she represents: art makes us intensely aware of how completely we ourselves are not merely surrounded by nature but also part of nature.

The Nightmare Chronicles

To: Female Baby Boomers Cc: Young women who may grow old one day Subject: The Joy of Life Dearest Baby Boomers and Future Bifocal Wearers, Are you old enough to need bifocals, but young enough to deny it? Are you tired of exercise programs that leave you . . . tired? Are you weary of self-help books that expect you to change your evil ways? Do you consider sloth a virtue youd like to pursue? If you answered yes to any of these questions, the attached book is for you. *Bikini Is a State of Mind* gives you magical advice on the joy of wearing nothing but a bikini and a smile, even if you have reached an age when a muumuu might be more appropriate. Buy the book, curl up in a lounge chair beside the pool, and get into the best shape of your life. Respectfully yours, Coach This book centers on five fifty-something women who form the Bikini Team in Davidson, North Carolina. During the summer, the women meet at the local Swimming Hole clad in bikinis. At other times of year, they gather together for parties, retreats, and social outings, usually wearing a little more than bikinis. At the heart of the book lies the metaphor of wearing bikinis in middle age. This small concept is the seed of something much largera holistic approach to aging without giving up edginess and attractiveness. This is a book by, for, and about women who, although aging, still take care of themselves; still relish dressing up, down, and scantily; and still turn heads. Their

bodies are not what they used to be. But their spirit, camaraderie, and flair make a statement that others read as stylish, free, and lots of fun. They want to spread the word.

La pollution des eaux continentales africaines

Includes section "Recensiones".

Maghreb, Machrek

Orientalia christiana periodica

This paper investigates the relationship between economic growth and job creation in developing economies with a focus on low and lower middle-income countries along two dimensions: growth patterns and short-run correlations. Analysis on growth patterns shows that regime changes are quite common in both economic growth and employment growth, yet they are not synchronized with each other. Okun's Law—the short-run relationship between output and labor market—holds in half of the countries in our sample and shows considerable cross-country heterogeneity.

Growth Slowdowns and the Middle-Income Trap

The authors study the impact of labor market policies on unemployment in Morocco. They begin by reviewing the main features of the labor market. Then they present a quantitative framework that captures many of these features-such

as a large public sector, high redundancy payments, powerful trade unions, and international labor migration. The authors simulate the impact of a cut in the minimum wage and a reduction in payroll taxation. The results indicate that these policies may have a significant impact in the short term on open unskilled unemployment. But they also show that labor market reforms, to be effective in the long run, may need to be accompanied by offsetting changes in the budget to avoid crowding-out effects on private investment.

Ebola, Culture and Politics: The Anthropology of an Emerging Disease

Danette Michaels knew that when she became Principe Marcello Scorsolini's secret mistress there would be no marriage, no future and no public acknowledgment. At the time it was enough. But Danette can't be Marcello's secret any longer. She wants him, all or nothing — even if it means their affair is over. Until a pregnancy test changes the rules forever.
