Inderjeet Parmar reveals the complex interrelations, shared mindsets, and collaborative efforts of influential public and private organizations in the building of American hegemony. Focusing on the involvement of the Ford, Rockefeller, and Carnegie foundations in U.S. foreign affairs, Parmar traces the transformation of America from an "isolationist" nation into the world's only superpower, all in the name of benevolent stewardship. Parmar begins in the 1920s with the establishment of these foundations and their system of top-down, elitist, scientific giving, which focused more on managing social, political, and economic change than on solving modern society's structural problems. Consulting rare documents and other archival materials, he recounts how the American intellectuals, academics, and policy makers affiliated with these organizations institutionalized such elitism, which then bled into the machinery of U.S. foreign policy and became regarded as the essence of modernity. America hoped to replace Britain in the role of global hegemon and created the necessary political, ideological, military, and institutional capacity to do so, yet far from being objective, the Ford, Rockefeller, and Carnegie foundations often advanced U.S. interests at the expense of other nations. Incorporating case studies of American philanthropy in Nigeria, Chile, and Indonesia, Parmar boldly exposes the knowledge networks underwriting American dominance in the twentieth century.

In the ebullient spirit of *Ocean's 8*, *The Heist*, and *Thelma & Louise*, a sensational and entertaining memoir of the world's most notorious jewel thief—a woman who defied society's prejudices and norms to carve her own path, stealing from elite jewelers to live her dreams. Growing up during the Depression in the segregated coal town of Slab Fork, West Virginia, Doris Payne was told her dreams were unattainable for poor black girls like her. Surrounded by people who sought to limit her potential, Doris vowed to turn the tables after the owner of a jewelry store threw her out when a white customer arrived. Neither racism nor poverty would hold her back; she would get what she wanted and help her mother escape an abusive relationship. Using her southern charm, quick wit, and fascination with magic as her tools, Payne began shoplifting small pieces of jewelry from local stores. Over the course of six decades, her talents grew with each heist. Becoming an expert world-class jewel thief, she daringly pulled off numerous diamond robberies and her Jewish boyfriend fenced the stolen gems to Hollywood celebrities. Doris's criminal exploits went unsolved well into the 1970s—partly because the stores did not want to admit that they were duped by a black woman. Eventually realizing Doris was using him, her boyfriend turned her in. She was arrested after stealing a diamond ring in Monte Carlo that was valued at more than half a million dollars. But even prison couldn't contain this larger-than-life personality who cleverly used nuns as well as various ruses to help her break out. With her arrest in 2013 in San Diego, Doris's fame skyrocketed when media coverage of her astonishing escapades exploded. Today, at eighty-seven, Doris, as bold and vibrant as ever, lives in Atlanta, and is celebrated for her glamorous legacy. She sums up her adventurous career best: "It beat being a teacher or a maid." A rip-roaringly fun and exciting story as captivating and audacious as *Catch Me if You Can* and *Can You Ever Forgive Me?*—Diamond Doris is the portrait of a captivating anti-hero who refused to be defined by the prejudices and mores of a hypocritical society.

The Jewelers' Circular-keystone

Containing toll free numbers, telephone numbers, and mailing addresses for leading U.S. businesses, organizations, agencies, and institutions, including companies, associations, educational institutions, media, political organizations, societies, travel providers, and U.S. government agencies. Arranged alphabetically by name of organization and in a classified section by type of business.

Congressional Record

"Long before Charles Ponzi's name was permanently attached to the word "scheme" and a hundred years before Bernie Madoff mastered the investment con, Kentuckian Philip Arnold put together a plan which, like none before, would bilk rich (and greedy) investors with a "sting" entirely befitting America's still-wild West. Not content with simply swindling some of the country's brightest luminaries, politicians and high-profile celebrities of the day, Arnold did so in grand style, making himself and his story the subject of nation-wide headlines. Award winning author Ron Elliott takes the reader behind the scenes of this little known and almost too fantastic to be true scam, and reveals how a fake diamond mine

induced investors to heap a fortune on its perpetrator and describes his inevitable downfall. In the years following the discovery of gold at Sutter's Mill in 1848, which led to the California Gold Rush and Nevada's silver Comstock Lode in 1859, the largely unexplored American West was prime territory for the next discovery of untold treasure. So, in 1872 when news of a newly found diamond mine swept the nation, many people were eager to join in the quest for fortune. American El Dorado is the true story of how Philip Arnold and John Slack, cousins from Kentucky, convinced some of America's most notable citizens to invest in their discovery of an untouched field of precious stones in an unspecified Western location. So convincing was the scheme that even America's most famous jeweler, Charles Lewis Tiffany, was taken in. The con game made the pair rich - until the fraud was eventually revealed. American El Dorado is a story of the lust for riches and the consequences of greed; a cautionary tale which proves that things which seem to be too good to be true usually are."--Publisher's website.

This proposed Resource Management Plan (RMP) and Final Environmental Impact Statement (FEIS), when combined with the Draft Environmental Impact Statement (DEIS) describes and analyzes four alternatives for management of public lands and resources in the Cedar, Beaver, Garfield and Antimony planning units. The Proposed RMP is patterned after the Planning Alternative and focuses on resolving five planning issues. These issues addressed such topics as land disposal, oil, gas, and geothermal leasing, coal leasing, protection of sensitive resources, providing habitat and forage for domestic livestock and wildlife, and providing woodland products on a sustained basis.

Now with a new page design, this international directory describes awards given for achievements in virtually every field of endeavor. Awards are listed alphabetically by the name of the administering organization, followed by alphabetical listings and descriptions of each of the awards it offers. Each volume contains organization, award, and subject indexes for quick reference. This reference now includes e-mail addresses and URLs.

The Black Diamond

Encyclopedia of Associations

Conflict Diamonds

First discovered in 1930, the diamonds of Sierra Leone have funded one of the most savage rebel campaigns in modern history. These "blood diamonds" are smuggled out of West Africa and sold to legitimate diamond merchants in London, Antwerp, and New York, often with the complicity of the international diamond industry. Eventually, these very diamonds find their way into the rings and necklaces of brides and spouses the world over. Blood Diamonds is the gripping tale of how the diamond smuggling works, how the rebel war has effectively destroyed Sierra Leone and its people, and how the policies of the diamond industry - institutionalized in the 1880s by the De Beers cartel - have allowed it to happen. Award-winning journalist Greg Campbell traces the deadly trail of these diamonds, many of which are brought to the world market by fanatical enemies. These repercussions of diamond smuggling are felt far beyond the borders of the poor and war-ridden country of Sierra Leone, and the consequences of overlooking this African tragedy are both shockingly deadly and unquestionably global.

Updated with a new epilogue.

Blood Diamonds, Revised Edition

Nigeria, the United States' most important strategic partner in West Africa, is in grave trouble. While Nigerians often claim they are masters of dancing on the brink without falling off, the disastrous administration of President Goodluck Jonathan, the radical Islamic insurrection Boko Haram, and escalating violence in the delta and the north may finally provide the impetus that pushes it into the abyss of state failure. In this thoroughly updated edition, John Campbell explores Nigeria's post-colonial history and presents a nuanced explanation of the events and conditions that have carried this complex, dynamic, and very troubled giant to the edge. Central to his analysis are the oil wealth, endemic corruption, and elite competition that have undermined Nigeria's nascent democratic institutions and alienated an increasingly impoverished population. However, state failure is not inevitable, nor is it in the interest of the United States. Campbell provides concrete new policy options that would not only allow the United States to help Nigeria avoid state failure but also to play a positive role in Nigeria's political, social, and economic development.

Africa Insider

Department of Interior Final Resource Management Plan, Environmental Impact Statement for the Cedar/Beaver/Garfield/Antimony Planning Area, Cedar City District, Utah

The mining and sales of diamonds by parties to participants of armed conflicts, notably in Africa, are regarded as a significant factor fuelling such hostilities. These diamonds, labelled 'conflict diamonds', make up an estimated 3.7 per cent to 15 per cent of the value of the global diamond trade. In response to public pressure to halt the trade of conflict diamonds and due to the persistence of diamond-related conflicts, governments and multi-lateral organisations have taken diplomatic action to combat the trade. Several international policy making forums, including the UN, have addressed the problem, and the international diamond industry and non-governmental organisations have proposed a range of reforms and legislative initiatives to halt the illicit trade. This new book examines the diamond-related African conflicts, the various methods that are being researched and used to 'tag' diamonds with microscopic markings, and the efforts taken to regulate the marketing and exporting of diamonds.
