Construction Guide: Tax and Advisory Services provides CPAs with guidance on the tax considerations that are particular to the construction industry. In addition, it provides CPAs with guidance on engagements for a wide range of situations, including those special to utility contractors, road builders, home construction, commercial construction, residential construction, land developers, real estate developers, and more. The book includes work programs, practice aids, checklists, and sample reports.

Audel Pipefitter's and Welder's Pocket Manual

Anyone working to improve the childbearing experience and help women avoid unnecessary intervention has encountered numerous obstetric myths or old doctors' tales. And while the evidence in the medical literature may be solidly, often unequivocally, against whatever the doctor said, without access to that evidence, the pregnant woman is quite reasonably going to follow her doctor. This book is an attempt to make the medical literature on a variety of key obstetric issues accessible to people who lack the time, expertise, access, or proximity to a medical library to research concerns on their own.

This compact, accurate, yet understandable reference is designed for people without medical training and organized for easy access. After an introductory chapter giving basic information about the different types of medical studies, how to evaluate them, and some basic statistical concepts, Goer provides chapters on cesarean issues, pregnancy and labor management, and a review of alternative approaches. Each chapter begins with a stated myth, followed by an examination of the reality. Goer then analyzes the mainstream belief, pointing out its fallacies. Then comes a list of significant points gleaned from the studies and keyed to her abstracts. Next is the outline by which the abstracts are grouped. Finally come the numbered abstracts of relevant articles published, in most cases, after 1980. The book concludes with a glossary of medical terms and an index. This compact, accurate, and understandable reference tool is designed for people without medical training as well as care givers.

Strategic Stewardship of Cultural Resources identifies the risks involved in preserving cultural resources and presents effective strategies for security. The book guides you through the process of evaluating preservation and security programs, budgeting costs, determining the right amount of facilities security, meeting the challenge of preserving digital information, and coping with the negative effects of theft and vandalism. The Strategic Stewardship of Cultural Resources focuses on four keys that are central to safeguarding your heritage assets: physical security—protection from theft, mutilation, damage by water, fire, etc., with strategies used by the Library of Congress and other major libraries preservation—protection from deterioration through conservation and reformatting, using examples from the National Endowment for the Humanities, the Library of Congress, and other institutions bibliographic control—knowing what your library has inventory control—knowing where your collections are The Strategic Stewardship of Cultural Resources: To Preserve and Protect also examines the FBI's Art Theft Program, national and institutional requirements for preservation funding, and measuring the effect of environmental elements (temperature, humidity, etc.) on your collection. The book is an essential resource for library, archive, and museum directors, preservation officers, security professionals, curators, and archivists.

Interventional cardiology is a creative, innovative, and rapidly advancing frontier of cardiology. There has been mind-boggling proliferation of technology in this field, the use of which requires extraordinary skills and know how. In order to keep pace with the innovative genius of interventional cardiologists, it is indeed desirable to have specialty issues updating us on technology-orientated therapeutic procedures. Contemporary interventional cardiology care is a highly specialized art, dependent on critical decision making, selection of the most appropriate interventional procedure, and the operator possessing extraordinary skills and compassion. This first volume of the new series, Supported Complex and High Risk Coronary Angioplasty, attests to the preceding

statement. Dr. Fayaz Shawl has mastered the procedure and has been very thoughtful and innovative in the clinical application of the percutaneous cardiopulmonary bypass support technique. This book provides to an interventionist the basic principles of car diopulmonary bypass, identification of the high risk coronary angioplasty patient, and other alternate support devices for myocardial protection. Dr. Shawl and his team of talented contributors are to be complimented for providing us with this impressive volume on high technology. There will be ongoing specialty issues in this series highlighting the devel opments, complications, and advances in interventional cardiology.

This life of Marcel Proust will send readers back to Proust's classic Remembrance of Things Past. To those who have never read it, or to those who have previously tried and failed, Edmund White's evocation of Proust's life and work will be the guide. White has a psychologist's appreciation for the strange personality of this charismatic genius. We see Proust the recluse who lay in bed all night long in his cork-lined room, obsessively rewriting his one massive work - but we also see the yearning, lonely boy, the brilliant wit and socialite, the ambitious grasper after honours, and the miserably closeted homosexual. White, the author of an award-winning biography of Jean Genet and of the classic gay novel A Boy's Own Story, is uniquely suited to write this book, and Proust is currently

A Certain Idea of Europe

Metadata research has emerged as a discipline cross-cutting many domains, focused on the provision of distributed descriptions (often called annotations) to Web resources or applications. Such associated descriptions are supposed to serve as a foundation for advanced services in many application areas, including search and location, personalization, federation of repositories and automated delivery of information. Indeed, the Semantic Web is in itself a concrete technological framework for ontology-based metadata. For example, Web-based social networking requires metadata describing people and their interrelations, and large databases with biological information use complex and detailed metadata schemas for more precise and informed search

strategies. There is a wide diversity in the languages and idioms used for providing meta-descriptions, from simple structured text in metadata schemas to formal annotations using ontologies, and the technologies for storing, sharing and exploiting meta-descriptions are also diverse and evolve rapidly. In addition, there is a proliferation of schemas and standards related to metadata, resulting in a complex and moving technological landscape — hence, the need for specialized knowledge and skills in this area. The Handbook of Metadata, Semantics and Ontologies is intended as an authoritative reference for students, practitioners and researchers, serving as a roadmap for the variety of metadata schemas and ontologies available in a number of key domain areas, including culture, biology, education, healthcare, engineering and library science.

The Dignitas clinic in Switzerland may be a long way away. But the issues around euthanasia can suddenly become very close to home. To many, it seems remarkable that in a society where freedom of choice is eulogised, thousands of people find that there is one last choice that they are not free to make. But as this book will show, euthanasia is an issue at the intersection of new technology, old laws, and timeless ethical quandaries, so that even apparently clear-cut cases have many contradictions. Drawing on the latest research and cases from around the world, Richard Huxtable drills deep into the key issues around euthanasia. His is a new, balanced look at an important issue, and it will appeal to lawyers, medical students and - most importantly - those who find themselves or their relatives faced with end of life dilemmas.

The quasi-federal European Union stands out as the major exception in the thinly institutionalized world of international politics. Something has led Europeans—and only Europeans—beyond the nation-

state to a fundamentally new political architecture. Craig Parsons argues in *A Certain Idea of Europe* that this "something" was a particular set of ideas generated in Western Europe after the Second World War. In Parsons's view, today's European Union reflects the ideological (and perhaps visionary) project of an elite minority. His book traces the progressive victory of this project in France, where the battle over European institutions erupted most divisively. Drawing on archival research and extensive interviews with French policymakers, the author carefully traces a fifty-year conflict between radically different European plans. Only through aggressive leadership did the advocates of a supranational "community" Europe succeed at building the EU and binding their opponents within it. Parsons puts the causal impact of ideas, and their binding effects through institutions, at the center of his book. In so doing he presents a strong logic of "social construction"—a sharp departure from other accounts of EU history that downplay the role of ideas and ideology.

Reverend Curtis Black, divorced her second husband, the most womanizing and corrupt man she has ever known. Since then, Alicia has been dating her first husband, Phillip Sullivan, a wonderfully kind and true man of God whom she'd hurt terribly by cheating on him. Alicia has worked hard to prove herself worthy of his trust once more, and when he asks her to marry him again, she couldn't be happier. But Levi Cunningham, the drug dealer Alicia had an extramarital affair with, has just been released from prison, and he has completely turned his life around for the better. Still head-over-heels in love with Alicia, he will do whatever is necessary to win her back. Remarrying Phillip is the one thing Alicia has wanted for years, but she can't get Levi out of her mind. Alicia and Phillip aren't the only ones in the middle of a crisis. Their best friends, husband and wife Brad and Melanie Richardson, are struggling to keep their marriage together. Workaholic Brad is never home and has begun losing thousands on bad investments. Or so he says. Melanie, who is certain there's more to the story, is determined to get at the truth. Fresh betrayal leads to consequences no one saw coming, and Alicia's relationship with Phillip might not be the only thing that needs saving. But is it already too late? Email: kim@kimroby.com
