Computer Forensics: Investigating File and Operating Systems, Wireless Networks, and Storage (CHFI)

Imagine if network security had no 0s and no 1s. That Digital was not Binary.Imagine, instead, that network security has no absolutes but applies in a Continua.Imagine if we added dynamic analogue functionality to security processes.Imagine if we used OODA and feedback and feedforward loops as core security concepts.Imagine if we added the word `Time¿ to every question and every answer when discussing security.Imagine we can actually employ Negative Time.Imagine if we added new OOB functionality to TCP/IP rather than redesign fundamental communications protocols.Imagine. Just imagine how our views of security would suddenly change, and new answers, approaches and models appeared just because we looked at security through an analogue prism. This is a new conceptual model of security.

Practical Cyber Forensics

Computer Hacking Forensic Investigator (CHFI)

The 10th edition of Elementary Differential Equations and Boundary Value Problems, like its predecessors, is written from the viewpoint of the applied mathematician, whose interest in differential equations may sometimes be quite theoretical, sometimes intensely practical, and often somewhere in between. The authors have sought to combine a sound and accurate exposition of the elementary theory of differential equations with considerable material on methods of solution, analysis, and approximation that have proved useful in a wide variety of applications. While the general structure of the book remains unchanged, some notable changes have been made to improve the clarity and readability of basic material about differential equations and their applications. In addition to expanded explanations, the 10th edition includes new problems, updated figures and examples to help motivate students. The book is written primarily for undergraduate students of mathematics, science, or engineering, who typically take a course on differential equations during their first or second year of study.
