Dissemination Strategies. Dissemination is the targeted distribution of information and intervention materials to a specific public health or clinical practice audience. The intent is to spread knowledge and the associated evidence-based interventions. 4,5 Dissemination occurs through a variety of channels, social contexts, and settings. Evidence dissemination has several very broad goals: (1

### **An Introduction to Effectiveness, Dissemination and**

The purpose of this part of the website is to provide information about effective treatments for psychological diagnoses. The website is meant for a wide audience, including the general public, practitioners, researchers, and students. Basic descriptions are provided for each psychological diagnosis and treatment.

### **Immunocytochemistry - Wikipedia**

Key Findings. The Collaborative Care Model has the most evidence among integration models to demonstrate its effective and efficient integration in terms of controlling costs, improving access, improving clinical outcomes, and increasing patient satisfaction in a variety of primary care settings – rural, urban, and among veterans.
