Financial Accounting, Seventh Canadian Edition

Libby/Libby/Short wrote this text based on their belief that the subject of financial accounting is inherently interesting, but financial accounting textbooks are often not. They believe most financial accounting textbooks fail to demonstrate that accounting is an exciting field of study and one that is important to future careers in business. When writing this text, they considered career relevance as their guide when selecting material, and the need to engage the student as their guide to

style, pedagogy, and design. Libby/Libby/Short is the only financial accounting text to successfully implement a real-world, single focus company approach in every chapter. Students and instructors have responded very favorably to the use of focus companies and the real-world financial statements. The companies chosen are engaging and the decision-making focus shows the relevance of financial accounting regardless of whether or not the student has chosen to major in accounting.

This study guide is a powerful tool for in classroom use and for preparing for exams. Each chapter of the guide includes study objectives, a chapter review consisting of 20-30 key points, and a demonstration problem linked to study objectives in the textbook. True/false, multiple-choice, and matching questions in it provide additional practice opportunities. Solutions to the exercises are detailed and therefore provide substantial feedback.

The Demo Docs System of instruction replicates the classroom experience by providing more “I get it” moments outside of class. We’ve talked to tons of POA instructors and our editors have even taken the accounting course (numerous times!) to figure out the following issue in this course that is consistent: & Students

understand (or “get it”) right after you do a problem in class, but as soon as they leave class, with each passing hour, their ability to do the problems again and complete their homework diminishes to the point of them either having to come to office hours to get help, or they just quit and get behind in the course.& On top of this, you can end up getting behind in the course as well, in order to keep everyone on track.& The Demo Docs system helps to recreate the “I get it” moments outside of class-keeping both you and the students on track.
