Working Papers for use with Financial Accounting

This text is intended for a first course in introductory financial accounting. It was updated to reflect current International Financial Reporting Standards (IFRS). For example, it reflects the recent change in IAS38, para. 98, allowing the use of multiple methods in amortizing intangible assets. It focuses on core Introductory Financial Accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. Excluded are advanced topics that are covered in Intermediate Financial Accounting, such as leases and bond amortization. The text takes a corporate approach (vs. beginning with a sole proprietorship emphasis and then converting to a corporate approach); this consistency throughout the book reduces confusion for the introductory student. The book covers all essential topics: the accounting cycle, merchandising, assigning costs to inventory, cash and receivables, property, plant and equipment, debt financing, equity financing, statement of cash flows, financial statement analysis, and proprietorships and partnerships. Additionally, this version of the open text is supported by Lyryx Learning, offering at an affordable price editorial services to develop and adapt the content, formative online assessment, course supplements, and daily support to both the students and instructors.

Financial Accounting

Financial Accounting, 10e, by Meigs/Williams/Haka/Betner will gain support in traditional accounting departments where instructors expect students to not only understand the concepts of accounting, but to be able to apply and perform accounting processes. Truly a revision based on users needs and market feedback, the tenth edition of Financial Accounting offers increased end-of-chapter material, and a new student CD-ROM including GLAS, SPATS, and student tutorial. Chapters 6-10 are reorganized to be more consistent with the structure of a balance sheet, making the accounting process much clearer for the student. Finally, by providing a stronger foundation, Meigs better prepares students to apply concepts such as the Statement of Cash Flows and Financial Statement Analysis in later chapters. These changes and others have made an already proven financial accounting text even stronger.
