book is based on an IASB framework but the European directives, especially as regards detailed formats having no direct equivalent in IFRS, are discussed in detail. The European context and, in the case of important markets, the national context is recognised and contrasted with the international approach. Important non-European influences, especially those from the US, are included in order to provide a genuinely wide-ranging appreciation of the implications of accounting internationalism. Part 1 - Framework, Theory and Regulation - contains coverage of the theoretical underpinnings of financial reporting in an international context. It also describes the international, European and domestic regulatory framework of accounting. Part 2 - Annual Financial Statements - starts by analysing the legal background of the concept of capital and profit. The relevant parts of the second European directive are introduced and the contents of published financial statements described. The main problem areas of financial reporting as covered by IFRS are then analysed. The approach in these chapters consists of discussion of each problem area and its theoretical issues, discussion of the international regulation relating to the problem, and important national and regional representations or variations. Part 3 - Consolidated Accounts and the Multinational - covers group accounts in an international context. Part 4 - Financial Information and Analysis - discusses in depth the availability and transparency of financial information as published, and then the usage and interpretation of that information. The book is student oriented throughout, and contains activities, examples of reporting using IFRS from real companies' accounts,

Advanced Financial Reporting and Analysis

Praise for Financial Statement Analysis FOURTH EDITION "I love this book. It helps to develop the questioning mind—the mind of a financial detective. It teaches the art of skepticism and critical thinking. Readers go beyond definition and calculation and learn interpretation." —Philip L. Cooley, PhD, Prassel Distinguished Professor of Business, Trinity University "Over my decades of involvement with high-yield bonds, Marty Fridson has been the leading speaker of truth. As he so accurately states in Financial Statement Analysis, the credit investor is required to engage in a game of cat-and-mouse with company management's intent on minimizing their cost of capital by putting a positive gloss on their financial statements. The Fourth Edition of Marty's terrific book is the bible on how to detect and deal with these efforts." —Howard Marks, Chairman, Oaktree Capital Management "Financial Statement Analysis is a unique text; it combines great academic work with numerous real-life examples to form a highly useful reference for equity investors, debt holders, and investors who straddle both asset classes. Whether you are an investor, an investment advisor, or a teacher, Financial Statement Analysis will prove very valuable." —Margaret M. Cannella, former head of Global Credit Research, J.P. Morgan and Adjunct Professor, Columbia Business School "Marty has seen it all! He has had a front-row seat to see the birth,

death, and rebirth of the high-yield bond market . . . several times over! In the Fourth Edition of Financial Statement Analysis, Marty clearly demonstrates that despite the enactment of Sarbanes-Oxley in 2002, and other attempts to curtail abuse of the system, one needs a critical analytical eye to be certain that management is not trying to obfuscate the truth. The case studies provide excellent and timely examples of some of the techniques that companies have used to mislead investors." —Edward Z. Emmer, former global head of Corporate and Government Ratings and Equity Research, Standard & Poor's "Those who read financial statements without understanding the strategic context in which they are written will land on the losing end of the gripping episodes with which bond-market legend Marty Fridson illustrates in the Fourth Edition of his classic reference, Financial Statement Analysis. And all of us who depend on the markets sending capital to its best use should hope that investors read this book first." —David Musto, Professor of Finance, the Wharton School of the University of Pennsylvania "This book rightly urges resolute skepticism when inspecting financial statements. Its great value, though, is in the plain-spoken stripping down of real-world and illustrative examples that show how to see past the numbers to the practicalities and incentives behind them—and so help analysts and journalists alike ask the right questions." —Richard Beales, Assistant Editor, Reuters Breakingviews

Corporate Financial Reporting and Analysis: A Global Perspective/3e by David Young and Jacob Cohen is an introductory textbook on financial reporting for MBA students. This book is intended to offer the rigor and comprehensive coverage required of an MBA text, while at the same time offering an accessible and practical reference for participants in executive programs. David Young is based at INSEAD Business School in France, and Jacob Cohen is based at MIT Sloan School of Management in the USA. This book offers a rigorous, yet accessible, treatment of contemporary financial reporting practice. Examples are drawn from a broad range of companies to illustrate key concepts. Particular emphasis is given to the latitude and flexibility granted to managers in reporting financial performance, and the steps that financial statement readers can take to identify potential trouble areas in the accounts. Topics include the analysis and interpretation of the three principal financial statements, revenue recognition, inventory accounting, receivables and bad debts, accounting for long-term assets, provisions and contingencies, income taxes, and the accounting for mergers and acquisitions. A unique feature of this book is the seamless way in which it deals with differences in U.S. GAAP and IFRS. Both regimes are covered simultaneously, i.e. when a topic is discussed, including the relevant journal entries and disclosures,

the discussion applies equally to GAAP companies and to IFRS companies. It doesn't matter whether the company used in a given example is from the U.S., Europe, or elsewhere. Thanks to the ongoing GAAP/IFRS convergence project, the two regimes are close enough to allow for a somewhat generic approach that allows for coverage of both regimes at the same time. In this way, the examples that are covered in the book are relevant to all readers, regardless of which regime dominates in their business environment. The content of this book has been classroom tested over the past 20 years at INSEAD with the MBA class which has students from 80 different countries.

Tracing the nuances of a short-lived life, this involving and sympathetically written novel maintains a tone of finely judged tension between laughter and tears. Jonathon Bender had something to tell the world, but the world wouldn't listen. However, he left behind him unsent letters addressed to relatives, friends, neighbors, coaches, teachers, classmates, professors, roommates, psychiatrists, employers, his younger self, former girlfriends, his ex-wife, a TV station, and God, among many others. This unsent correspondence forms the narrative of a remarkable life.

Crash Course in Accounting and Financial Statement Analysis

Although the need to expand the boundaries of financial reporting has been discussed since the mid-1990s, little consideration has been given to the evolution and discourses of integrated reporting of non-financial aspects. Yet by investigating how and why an organisation defines and its reporting boundaries, it is possible to understand what is truly "valued" (or not) in its business model. This innovative book reviews the guidelines and frameworks from the major relevant international organisations including: the International Accounting Standards Board, Global Reporting Initiative, Sustainability Accounting Standards Board, International Integrated Reporting Council, Carbon Disclosure Standards Board, and the World Intellectual Capital Initiative, and analyses their development and impact on the boundaries of financial and non-financial reporting. Illustrated with case studies and interviews with representatives of these organisations, this concise volume makes a

This new text is intended as a companion volume to the existing Wiley title Financial Reporting and Analysis by John Dunn, published in Jan 2010. Advanced Financial Reporting and Analysis will complement the existing book by offering the opportunity to continue into the third year with a similar approach, but will also stand alone as a book that could be adopted without having used the earlier volume.

Analysis of Financial Statements

Financial reporting provides an overview of a business' profitability and financial condition in both short and long term. A hot topic in the current market climate. Financial Reporting and Regulation explains the meaning behind the rules of financial reporting, as opposed to just the implementation of these rules. It contains sufficient detail on the application of standards to enable the reader to appreciate the effects of the rules, and the logic behind them is described in terms of the reasoning and history behind their development. This will give readers a more informed insight of the regulations than many of the "practical" books currently on the market.
