Emissions From Combustion Processes - An ACS Environmental Chemistry Division Book

## **The Great American Canals**

## **The Basic Writings of Trotsky**

Topics discussed in this book cover all aspects of combustion from the mechanics and formation of toxic pollutants and their transport/fate in the environment to emission abatement and risk assessment. Leading experts in the field have contributed information from studies ranging from fundamental bench-scale investigations to risk assessment of existing large-scale municipal incinerators. This book will be a valuable reference for scientists, engineers, administrators and environmentalists who must deal with the complex issues of waste management and environmental protection.
