ACRP Report 78: "The original problem statement and objectives for ACRP 02-16 as developed by the project panel are restated as follows: 'Increased levels of demand at airports in the United States may result in a growth in airport GSE activity and an associated increase in airport surface emissions. Local air quality and global climate change concerns, regulatory pressures, and the desire to be environmentally responsible have resulted in a growing number of airport programs around the United States looking to assess and reduce airport emissions. Although much is known about aircraft fleets, operations, and emissions, comparatively little is known about GSE. The available GSE data are outdated, unreliable, and limited. Accurate GSE data are needed by the FAA and airport sponsors to plan adequately and to balance the growing demands of air travel with air quality concerns. Proactive strategies that reduce surface emissions may help airports address air quality concerns. As such, research is needed to

obtain additional information on GSE equipment and to identify programs and best practices that could reduce GSE emissions for GSE owners, operators, and airports.' In response to this problem statement, the primary objectives of this research were to (1) develop a tutorial that describes GSE operations and identifies potential strategies to reduce emissions from powered GSE for use by GSE owners and operators and (2) conduct a representative inventory of powered GSE at airports to help the industry assess the contribution of GSE to air quality impacts at airports. ." --from p. 1.

The poster was the popular art form in Cuba following the Cuban Revolution, when the government sponsored some 10,000 public posters on a fascinating range of cultural, social, and political themes. *Revolucin!*, produced with unprecedented access to Cuban national archives, assembles nearly 150 of these powerful but little—seen works of popular art. From the 1960s through the 1980s, the posters rallied the Cuban people to the huge task of building a new society, promoting massive sugar harvests and national literacy campaigns; opposing the U.S. war in Vietnam; celebrating films, music, dance, and baseball with a unique graphic wit and exuberant colorful style. With an introduction illuminating the rich social and artistic history of the posters, and rare biographical information on the artists themselves, this striking volume offers a window into the story of Cuba—and a truly revolutionary chapter in graphic design.

Suzuki Gs500 Twin

Moto-journalist Clement Salvadori has been riding motorcycles since the age of 15 and traveling all of his life, accumulating well over a million miles in the saddle across more than 70 countries on six continents. No Thru Road covers 30 different trips he has taken, to places like Afghanistan and Zimbabwe, since his first ride through western Europe in 1957. The stories are all original, though the subject may have appeared as a magazine article in a very different rendition. The book will appeal to adventure-travel enthusiasts and to motorcyclists and travelers of all persuasions. Adventurous riders will thoroughly

appreciate the book, as in the description of kick-starting a 500cc single - never easy to do - at 17,200 feet in the Tibetan Himalayas. Or going up to Cape Tribulation in Australia's Queensland in 1974 when the only access was via a once-a-week ferry across the Daintree River. Or riding a bike to Pamplona, Spain, in 1960 in order to run with the bulls. Activists who want to get on their motorcycles and ride down into Mexico's Copper Canyon will enjoy the book, as will the arm-chair traveler who is happy reading about traveling from Peru's Great Ica Desert over the Andes Mountains to the Amazon basin. Clement's adventures are arranged so the reader can open the book to any chapter, be it India, Nepal, the Sahara, New Zealand or Viet Nam, and not have to worry about following a thread. Lots of adventures, lots of good reading, lots of photos and illustrations. This book promises excellent entertainment and a glimpse into life as a moto-journalist.

Sudden changes, opportunities, or revelations have always carried a special significance in Western culture, from the Greek and later the Christian kairos to Evangelical experiences of conversion. This fascinating book explores the ways in which England, under the influence of industrializing forces and increased precision in assessing the passing of time, attached importance to moments, events that compress great significance into small units of time. Sue Zemka questions the importance that modernity invests in momentary events, from religion to aesthetics and philosophy. She argues for a strain in Victorian and early modern novels critical of the values the age invested in moments of time, and suggests that such novels also offer a correction to contemporary culture and criticism, with its emphasis on the momentary event as an agency of change.

Every motorcycle adventure presents new challenges - terrain, weather, geography, mechanical issues, survival and navigation. Adventure Riding Techniques

is designed to act as the essential and definitive guide to all the specialist skills one would need for off road adventure riding. It is designed to fill the reader with the confidence needed to undertake a long distance adventure ride, whatever the conditions. The book delivers a practical approach to adventure bike basics, riding techniques, crossing different types of terrain (everything from rivers and mud to rocks and deep sand), riding positions and strategies for survival. A long distance motorcycle journey is a significant undertaking and giving the reader insight into vital techniques and skills is this book's unique difference. Specialists in the field will be used to demonstrate techniques and provide insightful information for aspiring adventure riders.

In this new view of the Citroen story, automotive/aviation writer and design specialist Lance Cole investigates not just the details of the cars of Citroen, but the aeronautical and cultural origins that lay behind Citroen's form and function. The book digs deep into the ethos of Automobiles Citroen to create a narrative on one of the greatest car manufacturers in history. Using interviews, translations, archive documents and specially-commissioned photographs, the Citroen journey is cast in a fresh perspective. It explains in detail the influences upon Citroen design: Voisin, Lefebvre, Bertoni, Boulanger, Mages, Opron and recent Citroen designers such as Coco, Blakeslee and Soubirou. As well as all the men of the great period of 1920s-1970s expansion, it also cites less well-known names of Citroen's French engineering, design, and influence such as Cayla, Gerin, Giret, Harmand, Dargent and others, to give a full picture of Citroen heritage. The book provides in-depth analysis of all major Citroen models with an engineering and design focus and profiles key individuals and cars up to the present day and Citroen's 'DS'-branded resurgence. It features many newly commissioned photographs, rare archive drawings and interviews with Citroen owners. Researched amongst leading Citroen experts

and restorers, Lance Cole provides a fresh perspective on the Citroen car manufacturer, its design language and the legacy of its extraordinary engineering which will be of great interest to all Citroen and motoring enthusiasts. Superbly illustrated with 329 colour photographs, many newly commissioned along with rare archive drawings.

The Dirty Divorce

In 1982, at the age of just twenty-three and halfway through her architecture studies, Elspeth Beard left her family and friends in London and set off on a 35,000-mile solo adventure around the world on her 1974 BMW R60/6. Reeling from a recent breakup and with only limited savings from her pub job, a tent, a

few clothes and some tools, all packed on the back of her bike, she was determined to prove herself. She had ridden bikes since her teens and was well travelled. But nothing could prepare her for what lay ahead. When she returned to London nearly two and a half years later she was stones lighter and decades wiser. She'd ridden through unforgiving landscapes and countries ravaged by war, witnessed civil uprisings that forced her to fake documents, and fended off sexual attacks, biker gangs and corrupt police convinced she was trafficking drugs. She'd survived life-threatening illnesses, personal loss and brutal accidents that had left permanent scars and a black hole in her memory. And she'd fallen in love with two very different men. In an age before email, the internet, mobile phones, satnavs and, in some parts of the world, readily available and reliable maps, Elspeth achieved something that would still seem remarkable today. Told with honesty and wit, this is the extraordinary and moving story of a unique and life-changing adventure.

This comprehensive book on audio power amplifier design will appeal to members of the professional audio engineering community as well as the student and enthusiast. Designing Audio Power Amplifiers begins with power amplifier design basics that a novice can understand and moves all the way through to in-depth design techniques for very sophisticated audiophiles and professional audio power amplifiers. This book is the single best source

of knowledge for anyone who wishes to design audio power amplifiers. It also provides a detailed introduction to nearly all aspects of analog circuit design, making it an effective educational text. Develop and hone your audio amplifier design skills with in-depth coverage of these and other topics:

- Basic and advanced audio power amplifier design
- Low-noise amplifier design
- Static and dynamic crossover distortion demystified
- Understanding negative feedback and the controversy surrounding it
- Advanced NFB compensation techniques, including TPC and TMC
- Sophisticated DC servo design
- MOSFET power amplifiers and error correction
- Audio measurements and instrumentation
- Overlooked sources of distortion
- SPICE simulation for audio amplifiers, including a tutorial on LTspice
- SPICE transistor modeling, including the VDMOS model for power MOSFETs
- Thermal design and the use of ThermalTrak(tm) transistors
- Four chapters on class D amplifiers, including measurement techniques

This second edition volume presents a selection of cellular and molecular techniques that can be adapted to cover a range of applications and diseases. The book is divided into three sections: saliva and oral diseases, molecular biosciences, and cell and tissues. The first section contains chapters that discuss proteomic analyses by mass spectrometry and NMR-based metabolomics that can be used to not only study saliva, but also to assess other oral fluids such as gingival crevicular fluid. The second section contains chapters that profile oral microbial communities, quantitative real-time PCR, and adhesion of yeast and bacteria to oral surfaces. The third section deals with a range of approaches that enable the behavior of cells and tissues in both health and disease to be analyzed at the molecular level. Written in the highly successful Methods in Molecular Biology series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Cutting-edge and comprehensive, Oral Biology: Molecular Techniques and Applications, Second Edition is a useful resource for oral biologists at all levels

(students, early career researchers, and experienced veterans), and it provides a ready reference to new techniques and approaches that can be used to answer numerous specific scientific questions that may lead to a deeper understanding and treatments of oral diseases.

Heat Treater's Guide

Back in 2010, a new custom motorcycles scene was born in Europe. Hugo Jézégabel and Fred Jourden both decided to quit their salaried lives, Hugo as a landscape designer and Fred as head of marketing for an online company by day and a mechanic by night. Together they created the Paris-based garage 'Blitz Motorcycles', dreaming of building beautiful and unique custom motorcycles only upon commission. This book charts their journey and incarnates their global philosophy. Featuring the most iconic pictures of their adventure, it reveals both the motorcycles they've built and the road trips they've undertaken, amid the backdrop of the most incredible scenery Europe has to offer.

Time and the Moment in Victorian Literature and Society

Eighteen countries. Five shock absorbers. Two bikers. One amazing adventure After their fantastic trip round the world in 2004, fellow actors and bike

fanatics Ewan McGregor and Charley Boorman couldn't shake the travel bug. Inspired by their UNICEF visits to Africa, they knew they had to go back and experience this extraordinary continent in more depth. And so they set off on their 15,000-mile journey with two new BMWs loaded up for the trip. Their route took them from John O'Groats at the northernmost tip of Scotland to Cape Agulhas on the southernmost tip of South Africa. Along the way they rode some of the toughest terrain in the world -- and met some of the friendliest people. They rode their bikes right up to the pyramids in Egypt and visited Luke Skywalker's house in Tunisia. They met people who had triumphed over terrifying experiences -- former childhood soldiers in Uganda and children living amidst the minefields of Ethiopia. They had a close encounter with a family of gorillas in Rwanda and were nearly trampled by a herd of elephants in Botswana. Riding through spectacular scenery, often in extreme temperatures, Ewan and Charley faced their hardest challenges yet. With their trademark humor and honesty they tell their story -- the drama, the dangers and sheer exhilaration of riding together again, through a continent filled with magic and wonder.

Oral Biology: Molecular Techniques and Applications

Jupiter's Travels -Ted Simon's astonishing 4 year motorbike journey around the world The book that inspired Ewan McGregor's Long Way Round In the late 1970s Ted Simon set off on a Triumph and rode

63,000 miles over four years through fifty-four countries in a journey that took him around the world. Through breakdowns, prison, war, revolutions, disasters and a Californian commune, he travelled into the depths of fear and reached the heights of euphoria. He met astonishing people and was treated as a spy, a welcome stranger and even a god. For Simon the trip became a journey into his own soul, and for many others - including bikers Charley Boorman and Ewan McGreggor - it provides an inspiration they will never forget. This classic text, which has informed a whole genre of travel writing in the thirty years since it was first published, will never be bettered for sheer adventure, passion, humour and honesty. Brought up in England by a German mother and a Romanian father, Ted Simon found himself impelled by an insatiable desire to explore the world. It led him to abandon an early scientific career in favour of journalism, and he has worked for several newspapers and magazines on Fleet Street and elsewhere. Ted Simon is also the author of *Riding Home* and *The Gypsy in Me*.

Motion Picture and Video Lighting, Second Edition, is your indispensable guide to film and video lighting. Written by the author of the industry bible *Cinematography*, this book explores technical, aesthetic, and practical aspects of lighting for film and video. It will show you not only how to light, but why. Written by a professional in the field, this comprehensive book explores light and color theory;

equipment; and techniques to make every scene look its best. Now in full color, Motion Picture and Video Lighting is heavily illustrated with photos and diagrams throughout. This new edition also includes the ultimate 'behind the scenes' DVD that takes you directly on a professional shoot and demonstrates technical procedures and equipment. In addition, 20 video clips include: lighting demonstrations, technical tests, fundamentals of lighting demos, and short scenes illustrating different styles of lighting.

This book documents the proceedings of the symposium, "Mineral Scale Formation and Inhibition," held at the American Chemical Society Annual Meeting August 21 to 26, 1994, in Washington, D. C. The symposium, sponsored by the Division of Colloid and Surface Chemistry, was held in honor of Professor George H. Nancollas for his pioneering work in the field of crystal growth from solution. A total of 30 papers were presented by a wide spectrum of scientists. This book also includes papers that were not presented but were in the symposium program. The separation of a solid by crystallization is one of the oldest and perhaps the most frequently used operations in chemistry. Because of its widespread applicability, in recent years there has been considerable interest exhibited by academic and industrial scientists in understanding the mechanisms of crystallization of sparingly soluble salts. The salt systems of great interest in industrial water treatment area (i. e. , cooling and boiler) include carbon ates,

sulfates, phosphates, and phosphonates of alkaline earth metals. Although not as common as calcium carbonate and calcium sulfate, barium and strontium sulfates have long plagued oil field and gas production operations. The build-up of these sparingly soluble salts on equipment surfaces results in lower heat transfer efficiency, increased corrosion rates, increased pumping costs, etc. In the laundry application, insoluble calcium carbonate tends to accumulate on washed fabrics and washing equipment parts, resulting in undesirable fabric-encrustation or scaling.

Turn dull meetings into dynamic group experiences! Chances are that you spend a lot of time at meetings - some are focused and productive, while others are not. This ebook, written by a professional facilitator, contains 77 tips for both meeting leaders and participants. Implementing one or more of these tips can produce dramatic results at your meetings. Learn how to strengthen your leadership abilities, plan effectively, use structure to get more from your meetings, manage group dynamics, empower yourself and others to become strong contributors to the meeting, and more. Inside this ebook there is even a helpful checklist that you can use to assess what you need to do to make your meetings more effective.

With complete coverage of the basic principles of

heat transfer and a broad range of applications in a flexible format, *Heat and Mass Transfer: Fundamentals and Applications* by Yunus Cengel and Afshin Ghajar provides the perfect blend of fundamentals and applications. The text provides a highly intuitive and practical understanding of the material by emphasizing the physics and the underlying physical phenomena involved. This text covers the standard topics of heat transfer with an emphasis on physics and real-world every day applications, while de-emphasizing the intimidating heavy mathematical aspects. This approach is designed to take advantage of students' intuition, making the learning process easier and more engaging. Key: 50% of the Homework Problems including design, computer, essay, lab-type, and FE problems are new or revised to this edition. Using a reader-friendly approach and a conversational writing style, the book is self-instructive and entertains while it teaches. It shows that highly technical matter can be communicated effectively in a simple yet precise language.

Bishop Jordan has written a stellar work that is guaranteed to free the mentally enslaved, acquit the wrongfully charged, and bring healing to the sick. *The Laws of Thinking* is not a work for the shallow-minded person. It is demanding and challenging. It is neither intended to be used as the basis for unmerited criticism nor as sermon material for the minister having difficulty receiving a fresh work from the Lord.

It was written with a very clear aim: to provoke spiritual thought. Bill Gates' Microsoft, Oprah Winfrey's Harpo Productions, Stephen Spielberg's DreamWorks, and even his own Zo? Ministries all began with a thought. Every invention, university, book, song, business, home, skyscraper, movie, stage play, and baby began when someone chose to think. Nothing happens without thought. Creation did not happen without God's thought. Bishop Jordan's first objective is getting you to think.
