The Hungarian Revolution of 1956 was perhaps the most dramatic single event of the Cold War and a major turning point in history. Though it ended unsuccessfully, the spontaneous uprising of Hungarians against their country's Communist party and the Soviet occupation forces in the wake of Stalin's death demonstrated to the world at large the failure of Communism. In full view of the Western media—and therefore the world—the Russians were obliged to use force on a vast scale to subdue armed students, factory workers, and intellectuals in the streets of a major European capital. In October 1956, Michael Korda and three fellow Oxford undergraduates traveled to Budapest in a beat-up Volkswagen to bring badly needed medicine to the hospitals—and to participate, at street level, in one of the great battles of the postwar era. *Journey to a Revolution* is at once history and a compelling memoir—the author's riveting account of the course of the revolution, from its heroic beginnings to the sad martyrdom of its end.

Mastering Woodworking Machines

The Turkish Atrocities in Bulgaria

Basic Stairbuilding

Annotation. This study of the social circumstances of Japanese intellectuals in the last quarter of the eighteenth century is based on biographical data concerning 173 individuals. It deals with the image of intellectual life of that period in current scholarship, and with the self-image and ethos of scholars, authors, poets and artists. That self-image and ethos, however, often clash with the realities of their everyday lives. This prosopographical investigation offers a new look at intellectual life on a basic level. The current image of intellectual life in the Tokugawa period is one of dissatisfaction and withdrawal,

whereas the image that results from this study is one of dynamism and interaction. Fly Fishing for Beginners

Cardinal Education is an educational consulting and tutoring company based in Palo Alto, CA. Guided by a philosophy of fulfilling students' academic potential in a way that boosts skills and confidence for life, we work to maximize successful middle school, high school, and college admissions outcomes. While some of our methods defy "conventional wisdom," we have a proven track record with a broad range of students: the Ivy League bound to those wishing to avoid community college, the self-motivated to the intransigently jaded, and the profoundly gifted to

learning disabled. We have a passion for expanding students' dreams and helping them attain their goals. Cardinal Education believes in the social value of a strong public education system and sponsors pro bono programs to bring private sector expertise to bear. However, government fiscal policies are shortchanging public schools of opportunities: activities, sports, variety of classes, advanced classes, student: teacher ratios, and counseling departments. The "private school imperative" means that despite economic trends, admission to private school is becoming so competitive that it necessitates standardized testing excellence. The philosophy of this math workbook is rigor and drill. Because this is the first test students take that actively tries to trick students at every turn, students who sit for these standardized exams need reflexive familiarity with computation (math facts), problem types, and strategy. The entrance exams are the first standardized tests for which budgeting time is a significant issue. Students need to spend the majority of time on analysis to avoid getting tricked rather than computation. By building skills, speed, and confidence, we hope to eliminate anxiety and give students a solid foundation on which to build excellent scores. This book is intended as a supplement for our highly trained staff, so it does not include strategies. However, motivated students can use it successfully with occasional help from a teacher or parent. Each chapter is comprised of units, with each unit comprised of 4 problem sets of difficulty, increasing in a logically progressive manner. Students should do as many of the 4 problem sets for each unit as it takes to achieve a 90% accuracy rate. Students

taking lower level exams should complete problems 1-10 in each set. Students competing for high school admissions should complete each problem set in its entirety. Questions or feedback: Info@CardinalEducation.com

The classic introduction to fly fishing, now updated for a new generation of anglers. The best way to learn about fly fishing is right there at the waterside - with an expert who can point out where the trout are lying, explain the tackle you need and teach you how to use it. The next best way is to read this book. Keith Draper's handy, practical guide has introduced a whole generation of New Zealanders to the delights of fly fishing since its first appearance in 1985. It has now been thoroughly updated with new photographs and the latest information on developments in tackle and techniques. Follow its advice and you'll soon be fishing with confidence - and results!

Barbaro

Life and Letters of Janet Erskine Stuart, Superior General of the Society of the Sacred Heart, 1857-1914

Learn powerful, science-based techniques to boost focus, drive and energy hour-by-hour throughout the

day--every day. As leadership consultants and executive trainers, Bonnie St. John and Allen P. Haines have heard the same complaints from clients for years; periodic burnout, lack of focus and low energy. So they dug into the latest research on neuroscience, psychology and physiology looking for big answers. Instead they found small answers; proof that small adjustments in daily routines, including thought patterns, food and drink, rest and movement can fight the forces that sap our energy and store focus and drive. They call these amazing efficient restorative techniques "micro-resilience." Thousands of men and women from all walks of life have already found effortless ways to incorporate these little changes into the busiest of schedules. Dozens of entertaining anecdotes from real people using micro-resilience demonstrate that when our brains fire faster, our energy increases and we can cope with almost any surprise, pressure or crisis.
