While US-centred bilateralism and ASEAN-led multilateralism have largely dominated the post-Cold War regional security architecture in the Indo-Pacific, increasing doubts about their effectiveness have resulted in countries turning to alternative forms of cooperation, such as minilateral arrangements. Compared to multilateral groupings, minilateral platforms are smaller in size, as well as more exclusive, flexible and functional. Both China and the US have contributed to minilateral initiatives in the Indo-Pacific. In the case of the former, there is the Lancang-Mekong Cooperation mechanism—involving China, Cambodia, Laos, Myanmar, Thailand and Vietnam—established in 2015. In the case of the latter, there has been a revival of the Quadrilateral Security Dialogue in 2017—involving the US, Australia, Japan and India. This book examines the rise of these arrangements, their challenges and opportunities, as well as their impact on the extant regional security architecture, including on the ASEAN-led multilateral order. A valuable guide for students and policy-makers looking to understand the nature and development of minilateralism in the Indo-Pacific region.

This third edition of Teaching and the Case Method is a further response to increased national and international interest in teaching, teachers, and learning, as well as the pressing need to enhance instructional effectiveness in the widest possible variety of settings. Like its predecessors, this edition celebrates the joys of teaching and learning at their best and emphasizes the reciprocal exchange of wisdom that teachers and students can experience. It is based on the belief that teaching is not purely a matter of inborn talent. On the contrary, the knowledge, skills, and attitudes that make for excellence in teaching can be analyzed, abstracted, and learned. One key premise of Teaching and the Case Method is that all teaching and learning involve a core of universally applicable principles that can be discerned and absorbed through the study and discussion of cases.

This book represents a detailed and comprehensive examination of the developments of NATO's engagement in Kosovo, and the related policies of western countries. In addition to offering an in-depth analysis of historical developments in the relationships between Albanians and Serbs, the book also provides a constructive discussion of the events of the Kosovo conflict, which constituted one of the main concerns in the international agenda towards the end of the twentieth century. The basic theme set forth in this book is the reasoning behind NATO's intervention in Kosovo during the spring of 1999, namely to end the conflict between Albanians and Serbs and to aid the Kosovo Albanians in achieving their freedom from the jurisdiction of the Serbian state. Based on extensive evidence, the author analyzes the contradicting stances conveyed at the Security Council regarding the conflict, NATO's military intervention and the issue of Kosovo's future. The book provides useful information for any scholars, students and readers interested in gaining a more detailed understanding of Kosovo's historical developments on an international level. It offers the reader detailed insights into, and descriptions of, the events that took place in the military conflict in Kosovo; it provides various facts and figures, evidences and counterarguments in response to what happened in this politically volatile region."

Traditionally, legal problems arising in connection with international business transactions had to be solved by a national law. This view was challenged in post war scholarly writing and transnational practice. It was argued that transnational rules (such as transnational contracts, general conditions, trade usages, general principles, uniform rules, arbitral cases) should be applied instead. Often, these transnational rules are referred to as *lex mercatoria*. This volume analyzes the different legal approaches to international business problems (including the theory of *lex mercatoria*) as well as their implications for international practice. As such, the relevance and importance of substantive law and conflict of laws and of national, international and transnational rules are discussed both with regard to their application by national courts and by international commercial arbitrators.

### **Contemporary Reflections on Business Ethics**

Few generals proved themselves better than Scanderbeg. Leader of a small army of Eagles, at the height of its power, he single-handedly could be said to have saved Europe from the jaws of the Ottoman Dragon, when a heartless Mehmed II, the Conqueror, had already captured Constantinople and wanted to carry Rome to achieve universal victory over Christianity. He would have achieved his purpose had not Scanderbeg, an Albanian Christian General, not put an obstacle to his march in Albania, for about a quarter of a century. After Scanderbeg's death, the Albanians continued their resistance for another decade. Thus, Mehmed II was delayed long enough to thwart his plans. He managed only to start his Italian invasion, and when he died his mission died with him. World-famous individuals, painters, like Bellini and Durer, composers like Vivaldi and Franc ur, philosophers like Voltaire, poets and writers like Longfellow, Byron, and Holberg, generals like Wolfe, and popes like Paul II, have all been generous enough to dedicate a part of their work to this great general. Yet, surprisingly many historians have maintained silence about Scanderbeg's fame as a general. This ingratitude brings pause to any with the knowledge regarding such a great general, one who met such success and performed so brilliantly as to be recognized among the greatest generals of all time. He was the principal deterrent in stopping the Ottoman expansion westward and in that, he was the true defender of Christendom from the danger of becoming totally Ottomanized. If, for such great deeds, he does not deserve to be mentioned in world history, who does?

This concise intellectual history of the law offers an accessible introduction to the ideas and contexts of law from ancient Babylon to eighteenth-century Europe. Robert W. Shaffern examines a rich array of sources to illuminate ideas about law and justice in Western civilization. He identifies four main sources for traditional jurisprudence—the civilizations of the Fertile Crescent and classical Athens, the legal legacy of ancient Rome, the legal traditions of the Middle Ages, and developments in early modern Europe. By focusing on the recurring issues and historical contexts of the law, the author shows the extensive influence earlier sources had on the later development of Western law. For instance, the ancient code of Hammurabi pledged to obtain justice for the "widow and the orphan," a phrase that appeared again in later laws. Also, the tragedies of Aeschylus insisted that private individuals pursue vengeance, but government judiciaries upheld justice, an idea that the early modern European monarchies advanced when they promulgated new codes of criminal law. Additionally, Roman, medieval, and modern jurists all believed that natural law theory served as a rational criterion for legislators and judges. Throughout the span of centuries covered in the text, governments used law to regulate or monopolize the employment of violence. Designed to introduce undergraduates to the significant developments and ideas about the law and justice, this book will be invaluable for courses on the history of law and jurisprudence.

The Bektashi dervish order is a Sufi Alevite sect found in Anatolia and the Balkans with a strong presence in Albania. In this,

his final book, Robert Elsie analyses the Albanian Bektashi and considers their role in the country's history and society. Although much has been written on the Bektashi in Turkey, little has appeared on the Albanian branch of the sect. Robert Elsie considers the history and culture of the Bektashi, analyses writings on the order by early travellers to the region such as Margaret Hasluck and Sir Arthur Evans and provides a comprehensive list of tekkes (convents) and tyrbes (shrines) in Albania and neighbouring countries. Finally he presents a catalogue of notable Albanian Bektashi figures in history and legend. This book provides a complete reference guide to the Bektashi in Albania which will be essential reading for scholars of the Balkans, Islamic sects and Albanian history and culture.
