"Rai subjects the projects of both national development and globalization to searching scrutiny through a gender lens. Her emphasis on the intersection of gender and other forms of inequality is very timely. An excellent text for a wide range of courses in politics, sociology and development studies." --Diane Elson, University of Essex Shirin Rai pushes us to rethink development. She brings us to ear a feminist analysis that grows out of her nuanced understanding of both China's and India's gendered experience. Readers will find fresh ideas and sharp caveats about how patriarchy is sustained and fought over globally. --Cynthia Enloe, Clark University This important book ranges across contemporary debates in the study of gender and political economy. It situates differing gender-based theories in the context of wider political and historical processes such as colonialism, post-colonialism, Cold War politics, the New World Order, globalization and democratization. Shirin Rai focuses on the gendered nature of the political economy of development, and the shifts that have occurred as economies and states have moved from a development process that is state-focused to one that is clearly framed by globalization. Differences between men and women, and differences between women in contrasting social and geographical positions, are explored in relation to their influence on political practice. Rai considers how the structures of economic and political power frame men and women and examines the consequences of these gendered positionings. She makes important connections between the political narratives of different levels of governance and examines the discourse of empowerment at these different levels. The book concludes by reflecting on the way men and women are coping with the challenges of globalization and argues that women's movements need to re-establish the link between the recognition of difference and the redistribution of economic and social resources if they are to maintain their radical edge. This will be essential reading for undergraduates and graduates in politics, development studies and gender studies.

The central claim of this book is that, early and late, Wittgenstein modelled his approach to existential meaning on his account of linguistic meaning. A reading of Nietzsche's *The Birth of Tragedy* sets up Bearn's reading of the existential point of Wittgenstein's *Tractatus*. Bearn argues that both books try to resolve our anxiety about the meaning of life by appeal to the deep, unutterable essence of the world. Bearn argues that as Wittgenstein's and Nietzsche's thought matured, they both separately came to believe that the answer to our existential anxiety does not lie beneath the surfaces of our lives, but in our acceptance--Nietzsche's "Yes"--of the groundless details of those surfaces themselves: the wonder of the ordinary

Long believed to be disappearing and possibly even extinct, the Southwestern bighorn sheep of Utah's canyonlands have made a surprising comeback. Naturalist Ellen Meloy tracks a band of these majestic creatures through backcountry hikes, downriver floats, and travels across the Southwest. Alone in the wilderness, Meloy chronicles her communion with the bighorns and laments the growing severance of man from nature, a severance that she feels has left us spiritually hungry. Wry, quirky and perceptive, *Eating Stone* is a brilliant and wholly original tribute to the natural world.

Olivia Lockhart-Griffin 16 Lighthouse Road Cedar Cove, Washington Dear Reader, Mary Jo Wyse tells me she's in love! With Mack McAfee—who also happens to be her landlord. She and her baby girl, Noelle, have been living at 1022 Evergreen Place, which is right next door to Mack, for a few months. She says she's still a little wary about their relationship because, as she readily admits, she hasn't always made good decisions about men. Her baby's father, David Rhodes, is testament to that! She's worried that he might sue for custody, even though I doubt he has any real interest in his daughter. In the meantime, the World War II letters she found at the house are a wonderful distraction. Both she and Mack are trying to

learn what happened to the soldier who wrote them and the woman he loved. She's invited you and me to go to her place sometime. She'll show us the letters. Plus we can catch up on the latest about all our friends in Cedar Cove. I'd also like to learn what's going on with her brother Linc and his wife, Lori (who, according to Mary Jo, tied the knot about five minutes after they met!). Oh, and maybe Mack can join us.... Taking action to achieve this will require sustained courage and conviction from today's corporate leaders. Reading Why Women Mean Business will be an important first step.

Set in contemporary Israel, *The Immortal Bartfuss* is perhaps the most profound and powerful portrait of a Holocaust survivor ever drawn. Using the techniques of omission and indirection perfected in such masterpieces as *Badenheim 1939* and *To the Land of the Cattails*, Appelfeld tells the story of Bartfuss, enigmatically "the immortal" because of his experience in the camps. Now locked in a hopeless marriage, Bartfuss struggles to suppress the emotions and recollections he fears and despises, while trying to keep alive the poise, dignity, and compassion essential to a human being. *The Immortal Bartfuss* is an overwhelming and unforgettable study of a man reduced to his tragic limits.

Compact Utility Tractors, or CUTs, are cute little cutters! As farming became more refined so did the needs of tractors. The answer was a smaller, more maneuverable and fuel-efficient tractor with a variety of implements and attachments. With this focus on special needs, attachments became available such as plows, disc harrows, mower decks, cultivators, spreaders, snowblowers, and more. They have become a necessary utility for farmers, orchards, small construction jobs, and landscaping/maintenance for estates, parks and golf courses. At the forefront of this evolution was the Farmall Cub and John Deere Model L. Then came the Japanese invasion; a new kind of tractor by companies such as Yanmar and Kubota. These four-wheel drive machines were rugged and tough and used a variety of hydraulically powered attachments. American companies like John Deere, International Harvester, and Massey Ferguson built their own their own four-wheel versions. Today's compact tractors, such as the Kubota BX series, Massey Ferguson's GC series, and the John Deere 3000, offer an even larger selection of implements for special purposes.
