Through the eyes of an inventor of new markets, *Good Derivatives: A Story of Financial and Environmental Innovation* tells the story of how financial innovation – a concept that is misunderstood and under attack - has been a positive force in the last four decades. If properly designed and regulated, these “good derivatives” can open vast possibilities to address a variety of global problems. Filled with provocative ideas, fascinating stories, and valuable lessons, it will provide both an insightful interpretation of the last forty years in capital and environmental markets and a vision of world finance for the next forty years. As a young economist at the Chicago Board of Trade, Richard Sandor helped create interest rate futures, a development that revolutionized worldwide finance. Later, he pioneered the use of emissions trading to reduce acid rain, one of the most successful environmental programs ever. He will provide unique insights into the process of creating these new financial products. Covering successes and failures, the story describes the tireless process of inventing, educating and creating support for these new inventions in places like Chicago, New York, London, Paris and how it is unfolding today in Mumbai, Shanghai and Beijing. The book will tell the story of the creation of the Chicago Climate Exchange and its affiliated exchanges (European Climate Exchange, Chicago Climate Futures Exchange and Tianjin Climate Exchange, located in China). The lessons learned in these markets can play a critical role in effectively addressing global climate change and other pressing environmental issues. The author argues that market-based trading systems are a far more effective means of reducing pollutants than “command-and-control”. Environmental markets may ultimately help to find solutions to issues such as rainforest destruction, water problems and biodiversity threats. Written in an engaging, narrative style, *Good Derivatives* will be of interest to both practitioners and general readers who want to better understand the creative process of financial innovation. In the middle of so much distrust of markets, it is also a recipe of how transparent, well-regulated markets can be a force for good in the environmental, health, and social areas.

More than ever before modern chefs use interesting new cooking techniques and ingredients to boost texture, add depth of flavour and make so much more of humble carrots, kale and cauliflower. Vegetable dishes are now storming the menus at some of the world's best restaurants where chefs are treating fresh vegetable produce with the reverence it deserves and turning ingredients that used to be reserved for side dishes into centrepieces. Organized by type of produce, there are recipes for root veg, alliums and bulbs, potatoes and squash, legumes and pods, sweet vegetables, shoots and stems, mushroom and fungi, as well as basic recipes for a well-stocked chef's storecupboard. Choose from Smoked

Parsnips with Blue Cheese, Cauliflower & Truffle Pate, Red Cabbage & Burnt Aubergine Baba Ganoush, Kale Gnocchi, Kimchi, Spring Pistou Soup, Nettle & Wild Garlic Soup with Gruyere Toasts, Red Onion Tarte Tatin, Pea Panna Cotta, Pizza Bianca, Spaghetti Puttanesca, Artichoke Frittata, Champagne Mushrooms, Fennel & Roast Tomato Lasagne or a selection of versatile sauces, ketchups, chutneys, pickles, pestos and oils. Whether you want a revitalizing juice to start the day, a quick summer salad, a slow-roasted winter bake or to preserve an abundance of seasonal produce, you'll find plenty of fresh inspiration here.

The definitive book on steak has never been written-until now "Of all the meats, only one merits its own structure. There is no such place as a lamb house or a pork house, but even a small town can have a steak house." So begins Mark Schatzker's ultimate carnivorous quest. Fed up with one too many mediocre steaks, the intrepid journalist set out to track down, define,

and eat the perfect specimen. His journey takes him to all the legendary sites of steak excellence-Texas, France, Scotland, Italy, Japan, Argentina, and Idaho's Pahsimeroi Valley-where he discovers the lunatic lengths steak lovers will go to consume the perfect cut. After contemplating the merits of Black Angus, Kobe, Chianina, and the prehistoric aurochs-a breed revived by the Nazis after four hundred years of extinction-Schatzker adopts his own heifer, fattens her on fruit, acorns, and Persian walnuts, and then grapples with ambivalence when this near-pet appears on his plate. Reminiscent of both Bill Bryson's and Bill Buford's writing, *Steak* is a warm, humorous, and wide-ranging read that introduces a wonderful new travel and food writer to the common table.

## **Who Was William Hickey?**

This book analyzes an example of life-writing, an autobiography that was written in the early nineteenth century and will appeal to readers of many disciplines who are interested in understanding the interconnectedness of memory, textual narrative, and ideas of selfhood. Moreover, this book reasserts the importance of the individual in history. It explains how personal narratives reveal the individual as a purposeful social actor pursuing particular objectives, but framed by cultural and social contexts, in this case by eighteenth-century London and Imperial India. The author of this autobiography, William Hickey, projects a sense of self formed by a combination of an interiorized self-consciousness (an awareness of himself as an autonomous individual, although not one prone to deep self-reflection) and a socially-turned self-fashioning. Like so many autobiographers of his time, Hickey's self is realized through the production of a narrative, his self fixed and defined through the act of writing. As he wrote his memoirs, Hickey was engaged in purposeful textual representation to satisfy his perceived sense of place in that culture (above all, as a gentleman) while tacitly reflecting the constraints of that culture imposed upon the form and content of the text.
