“Unhurried education, and teaching to the heart through stories, develop a lifelong love of a continually unfolding process of learning and loving the world.” Teaching through Stories: Jane and Jeremy Learn to Knit will encourage you to take things into your own hands by giving you the tools to teach others. It’s effective and fun to teach using stories—this book tells you how! The first in a series on teaching handwork, this complete guide is written for teachers and others who want to teach this popular craft—or any subject—to children through storytelling, fostering personal connection in any educational setting. This handbook is a practical guide to creating and telling your own stories, and connecting with listeners, with examples from knitting lessons. It introduces important pedagogical foundations and offers suggestions for managing a busy handwork classroom. The last chapter shares ideas about selecting patterns and materials and over a dozen of the best patterns the author has developed. Teaching through Stories embodies an unhurried approach to education used successfully for a hundred years in Waldorf schools around the world.

Susan B. Anderson's Kids' Knitting Workshop

Create a suave high-flying rhino, a lovesick elephant who knows her way around a kitchen, and a seriously chivalrous tiger . . . With just two weeks to go before her baby Edward’s due date, yarn enthusiast Kerry Lord picked up a crochet hook for

the first time, and a new obsession began. Over the next twelve months, the collection of crochet animals expanded week by week until Edward's Menagerie was complete—with forty unique patterns. These cute animals with larger-than-life personalities are made using simple crochet techniques, and the step-by-step instructions enable a complete beginner to get hooking straight away. Each animal also has a universal pattern, allowing crocheters to change their hooks and yarns to create four different sizes, making for 160 different possibilities. Be warned—these unlikely characters, made using a super-soft yarn in a sumptuous natural color palette, will become your new best friends as you hook your way through the whole menagerie!

Stitch 'n Bitch

The Defining Decade for the #Adulting generation—a book that blends storytelling and data to unpack the choices you make in your twenties, why they matter, and how to turn those critical years into a launchpad for the life you want. We tend to think of our twenties as a playground for life: A time for low-consequence experimentation and delaying big decisions. But the truth is that while you're muddling through those years—exploring new cities, dating the wrong people, hopping between jobs—a small shift in your flight path can mean the difference between landing on Mars or Saturn. As the data shows, the choices we make (or put off) during this critical decade about our career, marriage, health, friends, even downtime have the greatest impact on how our lives play out. For example, did you know that people who marry between the ages of 28 and 32 have the lowest risk of divorce? And that the average 25 year old has 20 close friends, but this will shrink to 8 after age 40? And that most of us don't acquire new hobbies after we hit our thirties? Rather than prescribing one correct path (who are we kidding, there's no such thing anyway!), Elizabeth Segran invites readers to think critically and holistically about the life they want to build. With signature warmth and humor, Segran is the guide we all wish we had to show us the way. Blending insightful anecdotes with research from economics, sociology, and political science, *The Rocket Years* is an empowering exploration of these exciting, confusing, wonderful years.

As some knitters craft mittens and sweaters, others find themselves taking flight

into the realm of art. Some become true fiber artists, creating exhibition-quality quilts and sweaters and shawls, yarn mobiles and sculptures and gigantic abstract installations. An exploration of art knitting, this book profiles eighteen of the most prominent and intriguing practitioners of this craft-turned-art. Karen Searle, herself a recognized fiber artist, examines the works and inspirations of each of these knit artists. Numerous photographs illustrate each profile, documenting these artists' work and at the same time offering inspiration to those who might transcend the purely practical aspect of knitting. Among the artists encountered here are such nationally known knitters as movement founder Katharine Cobey, Carolyn Halliday, Debbie New, Lisa Anne Auerbach, Lindsay Obermayer, Kathryn Alexander, and others.

Traditional Fair Isle knitting and design skills were originally handed down from one Shetland generation to the next, with each new generation of knitters experimenting, adapting and extending the repertoire of patterns to develop the Fair Isle knitting we see today. Fair Isle knitting is fascinating - only two colours are used in any single row - yet the patterns and colours chosen combine to create something that is more than the sum of its parts. The distinctive combination of colours and patterns, ranging from the simple to the highly intricate, continues to inspire knitters worldwide. This beautifully illustrated book includes the development of Fair Isle knitting; a collection of Fair Isle patterns and motifs; exercises to develop a sense of colour and apply colour theory to Fair Isle knitting and a detailed step-by-step guide for the techniques used in Fair Isle knitting. Five original designs, with further ideas for their modification and development are included too as well as guidance on adapting and designing Fair Isle projects of your own.

Today's children are an endangered species. As a result of the reductionism spawned by Freud and the homogenization of the stages of human life that followed, many children seem to have lost their childhood and been thrust into the confusing and chaotic world of adults. Eugene Schwartz presents an incisive analysis of the ways in which the errors of the first third of our century have come back to haunt us at the century's end. After carefully examining Sigmund Freud's tragic misunderstanding of childhood and tracing its consequences for today's parents and educators, the author points to the radically new paradigm of childhood development offered by Rudolf Steiner and embodied in Waldorf education. Parents, teachers, and child psychologists will find a wealth of insight concerning such diverse subjects as the nature of play, the causes of ADHD, computers as teachers, and the power that love and imagination will have in the education of the Millennial Child.
