### **Consuming Russia**

Crime Laboratory Management is the first book to address the unique operational, administrative, and political issues involved in managing a forensic laboratory. It guides managers and supervisors through essential tasks ranging from hiring and training of staff to quality control, facilities management, and public relations. Author Jami St. Clair has more than 20 years experience in forensic science and served as President of the American Society of Crime Lab Directors in 1998-1999. She and her colleagues have designed this book to be useful for supervisors at every level. With its combination of classic management theories and practical information, this unique resource will help managers ensure that their laboratories operate efficiently and survive the intense scrutiny of today's criminal justice system. It will also help students and professional with an interest in forensic science and crime laboratory operation to better understand the functions of labs and the critical role they play in handling and analyzing evidence. \* Shows how to handle a wide variety of administrative and operational issues in forensic laboratories \* Provides new and experienced managers with practical information from qualified experts \* Outlines standards and procedures to help ensure quality results from laboratory analyses

The Strategic Education Research Partnership (SERP) is a bold, ambitious plan that proposes a revolutionary program of education research and development. Its purpose is to construct a powerful knowledge base, derived from both research and practice, that will support the efforts of teachers, school administrators, colleges of education, and policy officialsâ€"with the ultimate goal of significantly improving student learning. The proposals in this book have the potential to substantially improve the knowledge base that supports teaching and learning by pursuing answers to questions at the core of teaching practices. It calls for the linking of research and development, including instructional programs, assessment tools, teacher education programs, and materials. Best of all, the book provides a solid framework for a program of research and development that will be genuinely useful to classroom teachers.

### **Ten All American Novel Aprons -- 1940s Apron Patterns with Complete Cutting and Sewing Instructions**

A swoony billionaire contemporary romance prequel to USA Today bestselling author K.A. Linde's *The Lying Season*. I'm not prepared to meet someone as sexy as Sam Rutherford on the first day of my new job. Then I find out we're sharing an office...for the next year. I can't deny that I'm intrigued by his charming Southern drawl and rugged good looks. Normally I would have jumped at the chance. But

there's only one problem. He has no idea who I am. I'm not just Lark, the cute girl at work. I'm a multibillion-dollar heiress. And I made a deal with my parents: one year away from the city and then I take over the family business. Despite everything, I want to risk it. I want to be his for a season.

### **The Cambridge Companion to Ancient Rhetoric**

Macro-engineering involves the large-scale modification and manipulation of natural systems for the benefit of mankind. The primary goals of some Earth-based macroprojects described in this book are power production, land reclamation, food production, climate change, water, transport and coastal protection. Other Earth or space projects considered here have a more futuristic ring, but our present-day technical skill makes their realization possible.

### **Midwifery and Medicine in Boston**

Written in cookbook style, this book offers many recipes to learn game design with UDK. Each recipe contains step-by-step instructions followed by analysis of what

was done in each task and other useful information. The book is designed so that you can read it chapter by chapter, or you can look at the list of recipes and refer to them in no particular order. This book is meant for game artists who are getting used to UDK but may feel the need for guidance on matters of implementation. It also targets brave beginners who are struggling to find an all in one package for getting started with UDK, and want a ready to hand reference. Level designers can use this book to gauge their understanding of the editor, check for specific problems, and discover gems they may not have come across before.

### **Talking about Films**

Plastic Madonnas, packaged holy tours, and biblical theme parks can arouse discomfort, laughter, and even revulsion in religious believers and nonbelievers alike. Scholars, too, often see the intermingling of religion and commerce as a corruption of true spirituality. Suzanne K. Kaufman challenges these assumptions in her examination of the Lourdes pilgrimage in late nineteenth-century France. *Consuming Visions* offers new ways to interpret material forms of worship, female piety, and modern commercial culture. Kaufman argues that the melding of traditional pilgrimage activities with a newly developing mass culture produced fresh expressions of popular faith. For the devout women of humble origins who flocked to the shrine, this intensely exciting commercialized worship offered unprecedented opportunities to connect with the sacred and express their faith in

God. New devotional activities at Lourdes transformed the act of pilgrimage: the train became a moving chapel, and popular entertainments such as wax museums offered vivid recreations of visionary events. Using the press and the strategies of a new advertising industry to bring a mass audience to Lourdes, Church authorities remade centuries-old practices of miraculous healing into a modern public spectacle. These innovations made Lourdes one of the most visited holy sites in Catholic Europe. Yet mass pilgrimage also created problems. The development of Lourdes, while making religious practice more democratically accessible, touched off fierce conflicts over the rituals and entertainments provided by the shrine. These conflicts between believers and secularists played out in press scandals across the European continent. By taking the shrine seriously as a site of mass culture, Kaufman not only breaks down the opposition between sacred and profane but also deepens our understanding of commercialized religion as a fundamental feature of modernity itself.

### **Life of Tom Horn**

God's Healing is for You! Have you ever wondered, "Does God want to heal me?" Like many others, you may believe that God has the power to make us better but feel uncertain whether He wants to extend this blessing to everyone. The truth is, God is our loving Father Who wants us all to be well. Yes, He does want to heal you-totally and completely. In this dynamic book, bestselling author Joyce Meyer

presents a clear, concise explanation of the basics of biblical teaching concerning God's will to heal. You'll learn: \* How to Release God's Power for You \* The Misconceptions that can Prevent Healing \* The Many Methods God Uses to Heal \* The Vital Importance of Faith and Patience. Complete with important Scriptures on healing and guidance on how to apply them to specific needs, Joyce Meyer shows you how to receive all that God has for you. Be healed in Jesus' name!

Tom Horn was a government scout, Mexican interpreter, lawman and detective. He left home at 14 and headed west where he worked on the railroad and as a stage coach driver. He learned to speak Mexican and at age 16 he was hired by the U.S. Calvary as an interpreter. On the day before his 43rd birthday he was hanged for murder. This autobiography is a personal account of his exciting life during the Indian wars in pursuit of the Apache chief, Geronimo.

### **Aunt Sass**

Jennifer Knapp's meteoric rise in the Christian music industry ended abruptly when she walked away and came out publicly as a lesbian. This is her story—of coming to Christ, of building a career, of admitting who she is, and of how her faith remained strong through it all. At the top of her career in the Christian music

industry, Jennifer Knapp quit. A few years later, she publicly revealed she is gay. A media frenzy ensued, and many of her former fans were angry with what they saw as turning her back on God. But through it all, she held on to the truth that had guided her from the beginning. In this memoir, she finally tells her story: of her troubled childhood, the love of music that pulled her through, her dramatic conversion to Christianity, her rise to stardom, her abrupt departure from Christian Contemporary Music, her years of trying to come to terms with her sexual orientation, and her return to music and Nashville in 2010, when she came out publicly for the first time. She also talks about the importance of her faith, and despite the many who claim she can no longer call herself a believer, she maintains that she is both gay and a Christian. Now an advocate for LGBT issues in the church, Jennifer has witnessed heartbreaking struggles as churches wrestle with issues of homosexuality and faith. This engrossing, inspiring memoir will help people understand her story and to believe in their own stories, whatever they may be.

One might expect that after their identification in the 19th century, all aspects of Giffen goods would have been studied by now. This appears not to be the case. This book contains the latest insights into the theory of Giffen goods. In the past, surprisingly few goods could be categorized as "Giffen." This may be because of a lack of understanding of the character of these goods. Therefore, the theories explained in this book may also produce a solid basis for further empirical research in the field. Experts throughout the world have contributed to this book, which predominantly pursues a mathematically rigorous approach. It may be used by researchers in the field of fundamental economics and in graduate-level courses in

advanced microeconomics.

### **Lobbyists, Governments and Public Trust, Volume 1**

An understanding of the interaction between light and matter on a quantum level is of fundamental interest and has many applications in optical technologies. The quantum nature of the interaction has recently attracted great attention for applications of semiconductor nanostructures in quantum information processing. Quantum optics with semiconductor nanostructures is a key guide to the theory, experimental realisation, and future potential of semiconductor nanostructures in the exploration of quantum optics. Part one provides a comprehensive overview of single quantum dot systems, beginning with a look at resonance fluorescence emission. Quantum optics with single quantum dots in photonic crystal and micro cavities are explored in detail, before part two goes on to review nanolasers with quantum dot emitters. Light-matter interaction in semiconductor nanostructures, including photon statistics and photoluminescence, is the focus of part three, whilst part four explores all-solid-state quantum optics, crystal nanobeam cavities and quantum-dot microcavity systems. Finally, part five investigates ultrafast phenomena, including femtosecond quantum optics and coherent optoelectronics with quantum dots. With its distinguished editor and international team of expert contributors, Quantum optics with semiconductor nanostructures is an essential guide for all those involved with the research, development, manufacture and use

of semiconductors nanodevices, lasers and optical components, as well as scientists, researchers and students. A key guide to the theory, experimental realisation, and future potential of semiconductor nanostructures in the exploration of quantum optics Chapters provide a comprehensive overview of single quantum dot systems, nanolasers with quantum dot emitters, and light-matter interaction in semiconductor nanostructures Explores all-solid-state quantum optics, crystal nanobeam cavities and quantum-dot microcavity systems, and investigates ultrafast phenomena

Maintaining nuclear competencies in the nuclear industry and nuclear regulatory authorities will be one of the most critical challenges in the near future. As many nuclear experts around the world are retiring, they are taking with them a substantial amount of knowledge and corporate memory. The loss of such employees who hold knowledge critical to both operations and safety poses a clear internal threat to the safe and reliable operation of nuclear facilities. This publication is intended for senior and middle level managers of nuclear industry operating organizations and provides practical information on knowledge loss risk management. The information provided in this publication is based upon actual experiences of member state operating organizations and is intended to increase awareness of the need to develop a strategic approach and action plans to address the potential loss of critical knowledge and skills; to provide processes and, in

conducting risk assessments, to determine the potential for loss of critical knowledge caused by the loss of experienced workers; and to enable nuclear organizations to utilize this knowledge to improve the skill and competence of new and existing workers. --Publisher's description.

### **Facing the Music**

Introduction and Perspectives This volume is based on the proceedings of the 7th annual symposium on the topic Neuroimmune Circuits, Infectious Diseases and Drugs of Abuse, Bethesda, Maryland, Oc- ber 7-9, 1999. This symposium, as in the

past, focused on newer knowledge concerning the relationship between the immune and nervous systems with regards to the effects of drugs of abuse and infections, including AIDS, caused by the immunodeficiency virus. Presentations discussed the brain-immune axis from the viewpoint of drugs of abuse rather than from the subject of the brain or immunity alone. The major aim of this series of conferences has been to clarify the consequences of immunomodulation induced by drugs of abuse in regards to susceptibility and pathogenesis of infectious diseases, both in man and in various animal model systems. The recreational use of drugs of abuse such as morphine, cocaine, and marijuana by large numbers of individuals in this country and around the world has continued to arouse serious concerns about the consequences of use of such drugs, especially on the normal physiological responses of an individual, including immune responses. Much of the recent data accumulated by investigators show that drugs of abuse, especially opioids and cannabinoids, markedly alter immune responses in human populations as well as in experimental animals, both in vivo and in vitro.

A collection of charming holiday tales, by the author of Mary Poppins - a timeless gift for all ages. Each of the stories in this book was written by P.L. Travers as a holiday gift, sent to her friends and family and never published. Now millions of readers and generations of film-goers will get a peek behind the curtain and see how she used her life story to inform her fiction. Whether it is Aunt Sass herself - who is partly her inspiration for Mary Poppins - or the crass ex-jockey whose life work is not at all what it appears, the characters are unforgettable. P.L. Travers wrote with a signature blend of sugar and spice; her characters, including Mary Poppins, are endearing, outsized, and cozy. The Aunt Sass Christmas Stories will delight any child - naughty or nice.

This book is compelling because the majority of it recounts Horn's own life as he struck out from home at the age of 16 and became a scout for the U.S. Calvary. He was instrumental in the capture of Geronimo, went on to become a Pinkerton Detective, U.S. Marshall, served in the Spanish-American War, and also fought in the cattle and sheep skirmishes in Wyoming. The book ends with the trial of Tom Horn for the murder of 14-year-old Willie Nickell, whose family was in the middle of the cattle and sheep skirmishes mentioned above. This section of the book is told through letters that Tom wrote as well as some personal accounts of Tom's character and information pertaining directly to the case. This edition of the book contains the 12 original illustrations, rejuvenated.

### **New Insights into the Theory of Giffen Goods**

Rhetoric thoroughly infused the world and literature of Graeco-Roman antiquity. This Companion provides a comprehensive overview of rhetorical theory and practice in that world, from Homer to early Christianity, accessible to students and non-specialists, whether within classics or from other periods and disciplines. Its basic premise is that rhetoric is less a discrete object to be grasped and mastered

than a hotly contested set of practices that include disputes over the very definition of rhetoric itself. Standard treatments of ancient oratory tend to take it too much in its own terms and to isolate it unduly from other social and cultural concerns. This volume provides an overview of the shape and scope of the problems while also identifying core themes and propositions: for example, persuasion, virtue, and public life are virtual constants. But they mix and mingle differently, and the contents designated by each of these terms can also shift.

### **Love in the Library**

Here on display in this must-have collection is the cooking artistry, gift for teaching, and relaxed, confidence-inspiring tone known so well by Nathalie Dupree's enthusiastic nationwide audience. Many of the dishes prepared on New Southern Cooking with Nathalie Dupree (the fifty-five-part television series that has aired on PBS, the Learning Channel, and Star TV) are included, and a great many more: dishes simple or elaborate, dishes for a weekday meal or a multicourse feast, dishes such as a timeless, crumbly, melt-in-the-mouth biscuit or a tantalizing Grilled Duck with Muscadine Sauce. You'll find all the old-time flavors and textures embodied in such classic delights as black-eyed peas, fried chicken with the crustiest of coatings, country ham, and peach cobbler. Here, too, is all the new lightness and flavor combinations that mark today's innovative Southern cooking—expressed in such recipes as Acadian Peppered Shrimp (made tangy with just the

right touches of basil, garlic, oregano, and cayenne), chicken breasts with stir-fried peanuts and collards, and grouper grilled over a pecan-seasoned fire. Nathalie Dupree shows us how to get that Southern aura of comfort and welcome into our meals. She draws on the many cuisines, rustic and elegant, that have profoundly influenced Southern cooking from its beginnings—including English, French, African, Spanish, and West Indian. Nathalie has provided a wonderfully wide-ranging selection of Southern recipes remarkable for their ease of preparation and perfectly tuned to the pace of our lives today. Whether you're cooking for guests or the folks at home, planning a backyard barbecue (there are twenty-two barbecue recipes alone!) or a big gala party, you'll find here an abundant supply of irresistible recipes, accompanied by charming illustrations by Karen Barbour.

This book addresses not only how lobbying can improve policymaking by providing valuable insights and data, but how it can also result in unfair advantages for vested interests if the scrutiny and standards are lax. This report reviews the experiences of Australia, Canada, Hungary, Poland, the UK, and the United States with government regulations designed to increase transparency and accountability of lobbying activities. Current approaches, models, trends, and state-of-the-art solutions are examined. This report is part of OECD's efforts to promote integrity in the public sector by mapping governance and corruption risks and setting standards for cleaner, fairer, and stronger economies.
