## **Longman Linguistics Notes**

Stylistics, a branch of applied linguistics, is the study and interpretation of texts of all types and/or spoken language in regard to their linguistic and tonal style, where style is the particular variety of language used by different individuals and/or in different situations or settings. For example, the vernacular, or everyday language may be used among casual friends, whereas more formal

## **Stylistics - Wikipedia**

Linguistics is the scientific study of language. It involves an analysis of language form, language meaning, and language in context.. Linguistics began to be studied systematically by the Indian scholar Pānini in the 6th century BCE. Beginning around the 4th century BCE, Warring States period China also developed its own grammatical traditions. [citation needed] Aristotle laid the foundation

### **UCREL Semantic Analysis System (USAS)**

English Semantic Tagger The UCREL semantic analysis system is a framework for undertaking the automatic semantic analysis of text. The framework has been designed and used across a number of research projects and this page collects together various pointers to those projects and publications produced since 1990.
