Invitation to Mathematics, [grade 4]

Together with B&N, DK combines the successful Selling, Negotiating, and Presenting into the latest Essential Managers title - a bind-up of these 3 titles geared to help professionals speak confidently, avoid and resolve conflict, build stronger internal and external business relationships, and create a more effective work environment. Selling The first section teaches you how to target your audience, understand your customer, and perfect your pitch. Step-by-step instructions, tips, checklists, and "Ask yourself" features show you how to use state-of-the-state skills, present your products and services, and manage resistance. Tables, illustrations, "In focus" panels, and real-life case studies explain how to help customers solve their business problems, add value to relationships, and close more deals. Negotiating This section teaches you the skills you

need to deal with suppliers, resolve internal conflicts, and conduct multiparty discussions. Step-by-step instructions, tips, checklists, and "Ask yourself" features show you how to find a strong starting position, bargain effectively, and close a deal. Tables, illustrations, "In focus" panels, and real-life case studies help you to avoid conflict, build coalitions, and persuade other people. Presenting Part three of this informative and inspiring package teaches you how to prepare, capture attention, speak confidently, and deliver your message. Step-by-step instructions, tips, checklists, and "Ask yourself" features show you how to structure your presentation, engage with your audience, and make an impact. Tables, illustrations, "In focus" panels, and real-life case studies demonstrate ways to build confidence in your message and inspire trust.

APC Understanding ICSE Mathematics - Class 10 - Avichal Publishing Company

Abstracts of Papers Presented to the American Mathematical Society

Talking math with your child is simple and even entertaining with this better approach to shapes! Written by a celebrated math educator, this innovative inquiry encourages critical thinking and sparks memorable mathematical conversations. Children and their parents answer the same question about each set of four shapes: "Which one doesn't belong?" There's no one right answer--the important thing is to have a reason why. Kids might describe the shapes as squished, smooshed,

dented, or even goofy. But when they justify their thinking, they're talking math! Winner of the Mathical Book Prize for books that inspire children to see math all around them. "This is one shape book that will both challenge readers' thinking and encourage them to think outside the box."--Kirkus Reviews, STARRED review

Mathematics of Computation

Discover how math applies to science, art, music, daily life, and moreApply what you're learning outside a textbook, and see God's handiwork in mathFocus is on multiplication, division, fractions, decimals, ratios, percentages, shapes, basic geometry, and more! Math is a real-life tool that points us to God and helps us explore His creation, yet it often comes across as dry facts and meaningless rules. Here at last is a curriculum that has a biblical worldview integrated throughout the text and problems, not just added as an afterthought. Students don't just learn how to manipulate numbers on paper, but starting with arithmetic and laying the groundwork for geometry and algebra (covered in year 2), this curriculum both firms up the foundational concepts and prepares students for upper-level math in a logical, step-by-step way that helps students understand concepts, build problem-solving skills, and see how different aspects of math connect.
