This remarkable anthology introduces the short fiction of fourteen writers, major figures in the literary movements of three generations, who represent a range of class, ethnic, age, and political perspectives. It is filled with "unexpected gems", writes Scarlet Cheng in *Belles Lettres*, including Lin Hai-yin's story of a woman suffering under a feudal system that dominated Old China; Chiang Hsiao-yun's optimistic solutions to problems of the elderly in the rapidly changing Taiwan of the 1980; and in between, a dozen richly diverse stories of aristocrats, comrades, wifes, concubines, children, mothers, sexuality, rape, female initiation, and the tensions between traditional and modern life. "This is not western feminism with an Asian accent", says *Bloomsbury Review*, "but a description of one culture's reality The woman protagonists survive both despite and because of their existence in a changing Taiwan." This book includes biographical headnotes, an introduction that addresses the literary movements represented, and an extensive bibliography.

A Wrinkle in Time is the winner of the 1963 Newbery Medal. It was a dark and stormy night—Meg Murry, her small brother Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit down for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. A Wrinkle in Time, winner of the Newbery Medal in 1963, is the

story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys in high school). They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem.
