### Report on the Global HIV/AIDS Epidemic

'Men of the Global South' focuses on the lives and roles of Third World men. This edited work uses original and wide-ranging research which significantly enlarges the field of gender and development. It is an excellent textbook for undergraduates and postgraduates in development studies.

### Law and Global Health

In the current processes of political, economic and cultural changes serious cross-border forms of organized crime receive unprecedented attention as spectacular global media events, as 'threats' of all sorts, and as priority targets of criminal policy and political agendas. Most books on 'global organized crime' focus on one particular region, topic or event, and are written from one specific theoretical and disciplinary framework. The renowned scholars who have contributed to this volume present up-to-date expertise on regions as distant and different as Russia, Colombia, the Netherlands, Israel, Peru and Britain. They tackle phenomena such as international drug trafficking, alien and women smuggling, terrorism, East European organized crime and financial crimes. They show not only how these issues are interrelated, but also the way in which they interact with social, economic and political legitimate structures. The contributors critically question the policies and strategies currently pursued. They explore different theoretical arguments from the perspective of their own disciplines, which include economics, criminology, political science and anthropology.

## **Global Political Economy**

### **Unaids Action Framework**

Human trafficking constitutes one of the most serious human rights violations of our time. However, many social work practitioners still have a poor and incomplete understanding of the experiences of children and young people who have been trafficked. In *Trafficked Young People*, the authors call for a more sophisticated, informed and better developed understanding of the range of issues facing trafficked young people. In the first work of its kind to combine an up-to-date overview of the current policy context with related theoretical concerns and practitioner experiences, Pearce, Hynes & Bovarnick demonstrate how the trafficking of children and young people should be regarded as a child protection, rather than an immigration concern. Drawing on focus group and interview research with 72 practitioners and covering the cases of 37 individuals, *Trafficked Young People* explores the way child care practitioners identify, understand and work with the problems faced by people who have been trafficked. The book looks at how practitioners interpret and use definitions of trafficking in their day to day work; at their experiences of exposing the needs of trafficked children and young people and at their efforts to find appropriate resources to meet these needs. *Trafficked Young People* will be of interest to practitioners working in support housing and social work, along with solicitors and sociologists, particularly those working within discourses of child agency, self determination and victimhood. With its emphasis on the legal and policy framework, and integrated throughout with case histories, practitioner interviews and recommendations for best practice, *Trafficked Young People* is essential reading for anyone working within a Social Policy Development context.

### **Sex, Drugs and Young People**

This candid book reveals the enormity of the commercial sex-for-sale industry in the modern era. • Provides factual information regarding a topic that is of great interest to general readers in light of recent prostitution-related scandals, prostitution stings, and serial killers of prostitutes • Includes a complete bibliography of sources used in researching the commercial sex trade industry and sexual exploitation of women and children

### **Rethinking Transnational Men**

This is the first study to systematically review the available data on MSM in Low and Medium Income Countries and model the impact of responses to MSM on overall country epidemics, using Peru, Ukraine, Kenya, and Thailand as examples.

### **The HIV Epidemic in Latin America and the Caribbean**

*Sex and World Peace* unsettles a variety of assumptions in political and security discourse, demonstrating that the security of women is a vital factor in the security of the state and its incidence of conflict and war. The authors compare micro-level

gender violence and macro-level state peacefulness in global settings, supporting their findings with detailed analyses and color maps. Harnessing an immense amount of data, they call attention to discrepancies between national laws protecting women and the enforcement of those laws, and they note the adverse effects on state security of abnormal sex ratios favoring males, the practice of polygamy, and inequitable realities in family law, among other gendered aggressions. The authors find that the treatment of women informs human interaction at all levels of society. Their research challenges conventional definitions of security and democracy and shows that the treatment of gender, played out on the world stage, informs the true clash of civilizations. In terms of resolving these injustices, the authors examine top-down and bottom-up approaches to healing wounds of violence against women, as well as ways to rectify inequalities in family law and the lack of parity in decision-making councils. Emphasizing the importance of an R2PW, or state responsibility to protect women, they mount a solid campaign against women's systemic insecurity, which effectively unravels the security of all.

### **Population Mobility and Infectious Disease**

'The book offers a thorough overview both of long-standing debates around gender and sexuality and of current issues. It nicely locates the debates within the sociological tradition, and this provides a distinctive and valuable feature. Not the least of the merits of this book is its international focus, and it will prove invaluable for students exploring the diverse pattern of sexuality and gender in an age of globalization. The authors are at the cutting edge of their subject, and so is the book.' Jeffrey Weeks, author of "Sexuality, Third Edition" and Emeritus Professor of Sociology, London South Bank University 'Finally, a book that bridges feminism and critical sex studies. Rahman and Jackson have written a smart, accessible overview of the dynamic relationship between gender and sexuality that will seriously engage an undergraduate audience. This book teaches students by raising questions and providing the intellectual resources to navigate the complex terrain of contemporary sexual and gender politics. One of the few "must-use" classroom texts I've read in a long time.' Steven Seidman, author of "The Social Construction of Sexuality," State University of New York This new introduction to the sociology of gender and sexuality offers a fresh take on the importance of these concepts in modern society. It provides an insight into our rapidly changing attitudes towards sex and our understanding of masculine and feminine identities, relating the study of gender and sexuality to wider social concerns throughout the world and presenting a comprehensive yet readable summary of recent research and theory. In an accessible and engaging style, the book demonstrates how thinking about gender and sexuality can illuminate and enliven other contemporary sociological debates about social structure, social change, and culture and identity politics. Emphasis is placed on the diversity of gendered and sexual lives in different parts of the world. The book offers detailed coverage of wide-ranging topics, from international sex tourism to celebrity culture, from gender in the work-place to new sexual lifestyles, drawing examples from everyday life. By demonstrating the links between gender and sexuality this book makes a clear case for thinking sociologically about these important and controversial aspects of human identity and behaviour. The book will be of great value to students in any discipline looking to understand the roles gender and sexuality play in our lives.

## **HIV/AIDS Symposium Issue**

Key discussions and valuable contributions on different aspects of sexual and reproductive health among young people are brought together here in one single volume.

## **The Global HIV Epidemics Among Men who Have Sex with Men**

Men Who Sell Sex is the first comprehensive international account of male prostitution and AIDS. While much is known about female prostitution and sex work, relatively little is known about men who sell sex - either to women or other men. This book brings together an authoritative collection of essays from different countries and examines sexual behaviour, the reasons men sell sex, the meanings involved, and implications for HIV prevention. The authors are all experts in their fields and individual chapters offer a compelling description of the reasons men sell sex and the pleasures and risks involved.

## **Cordite and Testosterone - Why Men Should Not Be Running the World**

Central to all our lives, work affects our status in the state, the family, and the economy. This comprehensive reader examines the myriad ways in which work—whether it is well-paid, unpaid, or underpaid—profoundly influences our roles in both the public and private spheres. Jacqueline Goodman has selected a key set of essays that examine influential arguments on such central themes as (1) the origins of the gendered division of labor; (2) historical trends and economic transformations that affect and are affected by women's position in market and non-market work; (3) the effects of occupational and job segregation by sex on status, pay, and promotion; (4) the ways in which formal and informal organizational culture shape and in turn are shaped by gender in professional and managerial positions; (5) class consciousness among wage-earning men and women; (6) the different forms of gender discrimination that women and men face in the workplace; (7) the problems working parents face and the ways in which different societies, subcultures, and genders cope; and (8) alternative approaches to improving the lives of working women and their families in the global economy. With its rich interdisciplinary perspective, this text is ideal for courses in sociology, political science, anthropology, and women's and gender studies. Contributions by: Amel Adib, Kevin Bales, Dorothy Sue Cobble, Sharon M. Collins, Ruth Schwartz Cowan, Susan Eisenberg, Ashley English, Yen Le Espiritu, Anne Fausto-Sterling, Nancy Folbre, Carla Freeman, Michele Ruth Gamburd, Jacqueline Goodman, Janet C. Gornick, Yvonne Guerrier, Luigi Guiso, Shannon Harper, Heidi Hartmann, Ariane Hegewisch, Arlie Russell Hochschild, Pierrette Hondagneu-Sotelo, Jacqueline Jones, Rosabeth Moss Kanter, Ivy Kennelly, Alice Kessler-Harris, Michael Kimmel, Eleanor Leacock, Judith Lorber, Susan E. Martin, Marcia K. Meyers, Ferdinando Monte, Martha C. Nussbaum, Jennifer Pierce, Pun Ngai, Barbara Reskin, Tracey Reynolds, Leslie Salzinger, Paola Sapienza, Joan W. Scott, Tyson Smith, Margaret Talbot, Louise A. Tilly, Christine L. Williams, Muhammad Yunus, and Luigi Zingales.

## **Global Health**

This compelling new book explores the complexities of the global child sex industry, but without falling into cliché and melodrama. Julia O'Connell Davidson draws attention to the multitude of ways in which children become implicated in the sex trade, and the devastating global political and economic inequalities that underpin their involvement. She sensitively unpicks the relationship between different aspects of the sexual exploitation of children, including trafficking, prostitution and pornography, at the same time challenging popular conceptions of childhood and sexuality. This thought-provoking book will be of interest to general readers, and to students taking a range of courses, such as gender studies and childhood studies, and courses on sexuality and globalisation.

### **Development, Sexual Rights and Global Governance**

Current Legal Issues, like its sister volume Current Legal Problems (now available in journal format), is based upon an annual colloquium held at University College London. Each year leading scholars from around the world gather to discuss the relationship between law and another discipline of thought. Each colloquium examines how the external discipline is conceived in legal thought and argument, how the law is pictured in that discipline, and analyses points of controversy in the use, and abuse, of extra-legal arguments within legal theory and practice. Law and Global Health, the sixteenth volume in the Current Legal Issues series, offers an insight into the scholarship examining the relationship between global health and the law. Covering a wide range of areas from all over the world, articles in the volume look at areas of human rights, vulnerable populations, ethical issues, legal responses and governance.

### **Trafficked Young People**

Human Rights; Risk behavior; Cost-effectiveness; Low and middle income countries; Human Immunodeficiency Virus; Epidemic; Men who have sex with men; Attributable fraction; Intervention/Prevention; Homosexuality.

### **What's Love Got to Do with It?**

We see the bloodshed, the hatred, the greed, the ruthless brutality in the world, and then we look to see who is making or letting this madness happen. We find that male excesses, not male needs - certainly not women's and children's needs - drive the world.

### **Not a Choice, Not a Job**

### **Men Who Sell Sex**

The world is becoming more transnational. This edited collection examines how the immense transnational changes in the contemporary world are being produced by and are affecting different men and masculinities. It seeks to shift debates on men, masculinities and gender relations from the strictly local and national context to much greater concern with the transnational and global. Established and rising

scholars from Asia, Australia, Europe and North America explore subjects including economies and business corporations; sexualities and the sex trade; information and communication technologies and cyberspace; migration; war, the military and militarism; politics; nationalism; and symbolism and image-making.

### **Sex and the Sexual during People's Leisure and Tourism Experiences**

International in scope, The Handbook of Global Health Communication offers a comprehensive and up-to-date analysis of the role of communication processes in global public health, development and social change Brings together 32 contributions from well-respected scholars and practitioners in the field, addressing a wide range of communication approaches in current global health programs Offers an integrated view that links communication to the strengthening of health services, the involvement of affected communities in shaping health policies and improving care, and the empowerment of citizens in making decisions about health Adopts a broad understanding of communication that goes beyond conventional divisions between informational and participatory approaches

### **Global Perspectives on Gender and Work**

The fourth edition of this popular and successful text has been systematically revised and updated to incorporate analysis of the financial crisis and the changing global order. Now in a larger format with a new two-colour text design, the book includes additional boxed exhibits and end-of-chapter further reading. Williams, Uni NSW.

### **2008 Report on the Global AIDS Epidemic**

2013 Outstanding Book Award Winner from the Division of International Criminology, American Society of Criminology Every year, thousands of Chinese women travel to Asia and the United States in order to engage in commercial sex work. In *Selling Sex Overseas*, Ko-lin Chin and James Finckenauer challenge the current sex trafficking paradigm that considers all sex workers as victims, or sexual slaves, and as unwilling participants in the world of commercial sex. Bringing to life an on-the-ground portrait of this usually hidden world, Chin and Finckenauer provide a detailed look at all of its participants: sex workers, pimps, agents, mommies, escort agency owners, brothel owners, and drivers. Ultimately, they probe the social, economic, and political organization of prostitution and sex trafficking, contradicting many of the 'moral crusaders' of the human trafficking world.

### **Men of the Global South**

### **Gender and Sexuality**

### **Selling Sex Overseas**

Sex work has been a contentious issue in a variety of ways throughout history – socially, morally, ethically, religiously and politically. Traditionally noted as one of the oldest professions in the world, sex work has commonly been demonised and is often viewed as a social disgrace. While sex work involves both providers of sexual services, most commonly women, and purchasers of sexual services, most commonly men, providers have attracted the most social commentary. Recent research shows that a limited number of studies have been conducted since 1990 concerning men who procure sexual services. This book aims to help reset this balance. In this book, Philip Birch examines the procurement of female sexual services with a focus on the personal and social aspects of men who procure such exchanges and offers insight into the demographics amongst men who purchase sexual services, alongside an analysis of the reasons why they purchase sex. This book brings together existing literature with analyses of new data to develop a multi-factor model reflecting men's procurement of sexual services and demonstrates the complexities surrounding the procurement of these sexual services in exchange for money. The book considers what contribution the understanding of the personal and social aspects of men who procure sexual services has on re-theorising the purchasing of sex in the 21st Century and will be of interest to academics and students involved in the study of criminology, criminal justice, social policy, law, sociology, sexuality and gender studies.

### **Prostitution in the Digital Age: Selling Sex from the Suite to the Street**

Annotation. Business as usual is no longer a viable response to the HIV-related risks of men who have sex with men and transgender people. Where data exist on HIV in these populations, they show that our collective responses are failing far more often than they are reaching scale or succeeding. Just as disconcerting, in many parts of the world, is the fact that few reliable data exist at all.

### **Why Men Buy Sex**

Spanning a broad trajectory, from the New Gaelic Man of post-independence Ireland to the slick urban gangsters of contemporary productions, this study traces a significant shift from idealistic images of Irish manhood to a much more diverse and gender-politically ambiguous range of male identities on the Irish screen.

### **Designing and Conducting Gender, Sex, and Health Research**

The Third Edition (formerly titled International Public Health) brings together contributions from the world's leading authorities into a single comprehensive text. It thoroughly examines the wide range of global health challenges facing low and middle income countries today and the various approaches nations adopt to deal with them. These challenges include measurement of health status, infectious and chronic diseases, injuries, nutrition, reproductive health, global environmental health and complex emergencies. This thorough revision also explores emerging health systems, their financing, and management, and the roles of nation states, international agencies, the private sector and nongovernmental organizations in promoting health. Your students will come away with a clear understanding of how

globalization is impacting on global health, and of the relationship between health and economic development.

## **Men Who Sell Sex**

Provides an overview of the global distribution of AIDS cases, looks at the societal causes of HIV infections, discusses prevention and treatment options, and describes the epidemic's effect on society.

## **Global Organized Crime**

All over the world, men as well as women exchange sex for money and other forms of reward, sometimes with other men and sometimes with women. In contrast to female prostitution, however, relatively little is known about male sex work, leaving questions unanswered about the individuals involved: their identities and self-understandings, the practices concerned, and the contexts in which they take place. This book updates the ground-breaking 1998 volume of the same name with an entirely new selection of chapters exploring health, social, political, economic and human rights issues in relation to men who sell sex. Looking at Europe, North America, Latin America and the Caribbean, Africa and the Asia-Pacific, each chapter explores questions such as: What is known about the different ways in which men exchange sex for money or other forms of reward? What are the major contexts in which sexual exchange takes place? What meanings do such practices carry for the different partners involved? What are the health and other implications of contemporary forms of male sex work? Men Who Sell Sex seeks to push the boundaries both of current personal and social understandings and the practices to which these give rise. It is an important reference work for academics and researchers interested in sex work and men's health including those working in public health, sociology, social work, anthropology, human geography and development studies.

## **Men and Masculinities in Irish Cinema**

This book addresses how sexual practices and identities are imagined and regulated through development discourses and within institutions of global governance. The underlying premise of this volume is that the global development industry plays a central role in constructing people's sexual lives, access to citizenship, and struggles for livelihood. Despite the industry's persistent insistence on viewing sexuality as basically outside the realm of economic modernization and anti-poverty programs, this volume brings to the fore heterosexual bias within macroeconomic and human rights development frameworks. The work fills an important gap in understanding how people's intimate lives are governed through heteronormative policies which typically assume that the family is based on blood or property ties rather than on alternative forms of kinship. By placing heteronormativity at the center of analysis, this anthology thus provides a much-needed discussion about the development industry's role in pathologizing sexual deviance yet also, more recently, in helping make visible a sexual rights agenda. Providing insights valuable to a range of disciplines, this book will be of particular interest to students and scholars of Development Studies, Gender Studies, and

International Relations. It will also be highly relevant to development practitioners and international human rights advocates.

## **Children in the Global Sex Trade**

Publisher description

## **Male Roles, Masculinities and Violence**

A generation ago, most people did not know how ubiquitous and grave human trafficking was. Now many people agree that the \$35.7 billion business is an appalling violation of human rights. But when confronted with prostitution, many people experience an odd disconnect because prostitution is shrouded in myths, among them the claims that "prostitution is inevitable," and "prostitution is a job or service like any other." In *Not a Choice, Not a Job*, Janice Raymond challenges both the myths and their perpetrators. Raymond demonstrates that prostitution is not sex but sexual exploitation, and that legalizing and decriminalizing the system of prostitution—as opposed to the prostituted women—promotes sex trafficking, expands the sex industry, and invites organized crime. Specifically, Raymond exposes how legalized prostitution in the Netherlands, Germany, Australia, and Nevada worsens crime and endangers women. In contrast, she reveals, when governments work to prevent the demand for prostitution by prosecuting pimps, brothels, and prostitution users—as in Norway, Sweden, and Iceland—trafficking does not increase, women are better protected, and fewer men buy sex. Raymond expands the boundaries of scholarship in women's studies, making this book indispensable to human rights advocates around the world.

## **Promoting Young People's Sexual Health**

## **Unnatural Selection**

This book provides the first resource dedicated to critically examining gender and sex in study designs, methods, and analysis in health research. In order to produce ethical, accurate, and effective research findings it is vital to integrate both sex (biological characteristics) and gender (socially constructed factors) into any health study. This book draws attention to some of the methodological complexities in this enterprise and offers ways to thoughtfully address these by drawing on empirical examples across a range of topics and disciplines.

## **The Handbook of Global Health Communication**

## **Sex and World Peace**

Sex and the sexual have for far too long been consigned to the dark corners by social scientists in general and tourism and leisure scholars in particular. *Sex and the Sexual During People's Leisure and Tourism Experiences* seeks to begin to rectify this situation by bringing the position and nature of sex and the sexual into

the light of academic debate. As such, this book is designed to highlight cross-disciplinary emerging work on sex and the sexual in leisure and tourism and provide the readers with insights into this social realm. It encompasses a broad array of sex-related issues and tourism and leisure environments from across a variety of countries. The book should appeal to researchers and students across the humanities and social sciences both for the value of the research in its own right and the ability of it to be used as a lens through which to view the position of sex and the sexual as well as tourism and leisure in today's world. Overall, it is argued that sex and the sexual should play a part in the academic discourse, especially if we wish to describe what is actually happening out there as far as tourism and leisure are concerned.

## **World Migration 2005 Costs and Benefits of International Migration**

This book explores the complex roles of mobile, transient, and displaced populations in the worldwide spread of disease. While biomedical events cause disease, social forces such as poverty and marginalization magnify them by giving them opportunities to take hold. From Katrina to Darfur, and from influenza to AIDS, an expert panel of health and social scientists brings the social context of epidemics into clear focus.

## **Men in the Global World**

This book is based on an expert group meeting entitled 'Male Roles and Masculinities in the Perspective of a Culture of Peace', which was organised by UNESCO in Oslo, Norway in 1997, the first international discussion of the connections between men and masculinity and peace and war. The group consisted of researchers, activists, policy makers and administrators and the aim of the meeting was to formulate practical suggestions for change. Chapters in the book consist of both regional case studies and social science research on the connections of traditional masculinity and patriarchy to violence and peace building. The Culture of Peace initiatives in this book show how violence is ineffective, and the book contests the views in the socialisation of boy-children that aggressiveness, violence and force are an acceptable means of expression.

## **Tommy Boys, Lesbian Men, and Ancestral Wives**

Sexual practices and drug use among the young are examined in this book, calling into question mainstream assumptions about 'adolescence'. Bringing together a range of cross-cultural and cross-national contributions, the book reveals both similarities and important differences that mark sexuality and drug use among young in different social and cultural settings. In doing so, it allows the reader to build up a clearer understanding of the challenges that must be faced in public health and education if we are to develop programs and interventions that really serve the needs of young people. The book will be of interest to professionals working with young people and is suitable for a wide range of multidisciplinary courses covering areas such as human sexuality, sex education, public health and social work.

## **International Journal of Human Development and Sustainability: Vol.4, No.2**

DIVAn ethnographic case study of sex tourism in the Dominican Republic, showing how the sex trade is linked to economic and cultural globalization./div

### **The Global HIV Epidemics Among Men who Have Sex with Men**

"Lianyungang, a booming port city, has China's most extreme gender ratio for children under four: 163 boys for every 100 girls. These numbers don't seem terribly grim, but in ten years, the skewed sex ratio will pose a colossal challenge. By the time those children reach adulthood, their generation will have twenty-four million more men than women. The prognosis for China's neighbors is no less bleak: Asia now has 163 million females "missing" from its population. Gender imbalance reaches far beyond Asia, affecting Georgia, Eastern Europe, and cities in the U.S. where there are significant immigrant populations. The world, therefore, is becoming increasingly male, and this mismatch is likely to create profound social upheaval. Historically, eras in which there have been an excess of men have produced periods of violent conflict and instability. Mara Hvistendahl has written a stunning, impeccably-researched book that does not flinch from examining not only the consequences of the misbegotten policies of sex selection but Western complicity with them"--
