About the book: In the 1960s and 1970s American automakers produced millions of muscle cars: high-performance cars more adept at competition than

transportation. The baby boom generation snapped up these cars and proceeded to use them as intended, drag and street racing the cars until there was nothing left of them. No longer minimum-wage high schoolers, today's boomers enjoy more disposable income than any generation in history. And many of them are spending that income on highly collectible muscle cars. Because so few muscle cars survived the abuse of young drivers back in the day, muscle car prices have skyrocketed, with mundane muscle cars commanding six-figure prices and the most significant muscle cars surpassing the million-dollar mark. Respected muscle car expert Colin Comer and top photographer David Newhardt tell the story of each of these rarest of rare cars in *Million-Dollar Muscle Cars*, the only book dedicated to these top-flight cars. ### **Once Upon a Distant Journey**

The more modern culture shines its light on sex, the longer the shadow it casts. This shadow is commercialism, pornography and shame. This approach to sexuality distorts it to create performance pressure, increasing numbers of sexual 'dysfunctions' and a fundamental disconnect from ourselves and others. Yet sexuality is one of the most important paths to happiness, simply because it requires us to engage all the other aspects of ourselves. To have deeply satisfying sex we must engage the mind, the body and our feelings. Real Sex will show you how almost everything that our society has tried to teach you about your sexuality is misleading or simply wrong. Real Sex is a journey into the heart of your sexual self; a way of creating meaningful and fulfilling intimacy. It sets out seven keys that will teach you how to love and accept your mind, body, feelings, desires and sexuality at a deeper level, leaving behind feelings of guilt, insecurity and shame. Real Sex offers a new, integrated idea of sexuality that holds a positive perspective of the sexual beings that we are; longing for intimacy and aliveness that we know deep down makes our lives meaningful.

Here is the most comprehensive guide to the restoration, renovation, and development history of all V-twins (1965-2000) from the company that author Mick Walker confidently--perhaps controversially--describes as "Italy's most glorious marque." An invaluable guide to the many engineering re-designs, technical modifications, and re-styling exercises carried out on the V-twin Moto Guzzi over years. This volume is packed with technical data unavailable from any other single source, from Ing. Giulio Carcano's 1965 V7--a sensation at the 39th International Milan Show--to the V11SS 6-speed gearbox. And in between? More than 50 models, heavyweights and middleweights, custom cruisers and off-roaders, engine and gearbox stripdown, electrics, fuel injection analysis, model recognition, model years, performance kits--even specialized workshop tools. Nothing is overlooked in the quest for your perfect Guzzi.

### **The New Illustrated Encyclopedia of Motorcycles**

There are many ways of designing a motorcycle, but it takes a great deal of artistic sensitivity to create a legend from only two cylinders. That is exactly what Moto Guzzi, the prestige manufacturer in Mandello del Lario, has done. Active in motorcycle construction since 1920, particularly in the years after 1945 it created motorcycles that made history, especially those with the powerful V-twin engine installed lengthwise in the chassis. For forty years the V-twin four-stroke engine has been the Italian company's flagship. The fine Italians, Le Mans, and California types, and the small 125s, 250s and 350s are described here with accuracy and detail. This comprehensive volume describes all models and technical details. As is the style of the authors, they also provide background information about the company and the industry. It is not all about machines and horsepower, but also the people who put their stamp on the operations: not only a treat for fans of serious technical information, but a gripping story as well.

The Complete Book of BMW Motorcycles offers a thorough year-by-year guide to every production machine ever built by Germany's leading motorcycle manufacturer. Technical specs are provided for each model. This comprehensive review covers all of BMW's bike families: The side-valve machines from the early years The early overhead-valve performance bikes The modern Airheads and Oilheads The four-cylinder and six-cylinder touring bikes The early pushrod singles The modern overhead-cam singles The latest parallel twins, and inline-four cylinder sport bikes Among them, you'll find all the classic bikes—pre-

World War II BMWs like the R5 that defined performance in that era; the military R12 that carried the Wehrmacht as it blitzkrieged its way across Europe; the Earles-forked R69S that offered the perfect platform for mounting a Steib sidecar; the R90S café racer; the K1 “flying brick”; and the GS (Gelände Sport) series that launched a dual-sport revolution right up to today’s world-class S100RR and retro-inspired R nine T. Abby Steele hadn't seen the inside of her own apartment in over three years. Life on the road kept her busy and building the business took all of her focus. Steel Journeys was a company she had founded all on her own. She wanted other women to experience what she had seen, felt, heard, smelled, and tasted. That was the dream-to form a women's motorcycle touring company, and to take it global. Three years was a long time to be away, but home was just a concept. It couldn't be defined by the four walls of any structure. Home was her saddle. Home was the wind in her face and the vibration under her seat. Home might be a Harley, a BMW, a Triumph, a Honda. Home was whatever bike fit the terrain. Home was the road. Abby was part riding instructor, part tour guide and part life coach. She cared about the women on her tours, and they respected her for it. It took a lot of miles to work through the hurts of her past, but finally she had built a life she could be proud of - until an unexpected visitor threatens to bring all the blocks tumbling down. Join Abby on the road to Patagonia, and reconnect with your own inner adventurer!

As you travel Africa, you will find the way of ubuntu – the universal bond that connects all of humanity as one. At the age of twenty-eight, while sitting in a friend’s backyard in the remote mining township of Jabiru, Heather Ellis has a light-bulb moment: she is going to ride a motorcycle across Africa. The idea just feels right – no matter that she’s never done any long-distance motorcycle travelling before, and has never even set foot on the African continent. Twelve months later, Heather unloads her Yamaha TT600 at the docks in Durban, South Africa, and her adventure begins. Her travels take her to the dizzying heights of Mt Kilimanjaro and the Rwenzori Mountains, to the deserts of northern Kenya where she is befriended by armed bandits and rescued by Turkana fishermen, to a stand-off with four Ugandan men intent on harm, and to a voyage on a ‘floating village’ on the mighty Zaire River. Everywhere she goes Heather is aided by locals and travellers alike, who take her into their homes and hearts, helping her to truly understand the spirit of ubuntu – a Bantu word meaning ‘I am because you are’. Ubuntu is the extraordinary story of a young woman who, alone and against all odds, rode a motorcycle to some of the world’s most remote, beautiful and dangerous places.
