Canadian Aviation

Roger Reave's grew up a poor farm boy in Georgia and went from making 'Moon Shine' to becoming one of the most prolific smugglers of the 20th century. He covered six continents, transporting twenty ton ship loads of hash, tons of cocaine, and completed more than one hundred sorties across the U.S border with plane loads of marijuana. His friends and associates spanned the globe. From Medellin Cartel kingpins Jorge Ochoa and Pablo Escobar; to "Mr Nice" Howard Marks, and the infamous Barry Seal who was Rogers close friend and employee. He escaped from prison on five seperate occasions; was shot down in both Mexico and Colombia, and tortured almost to death in a Mexican prison. Yet, there is a sparkle in his eye and a smile on his face as he tells of these adventures. And you've probably never heard of him Till now

Fundamentals of International Aviation

This book is a charming, personable chronicle of half a century of progress of fly fishing, and is an account of the great fun they had on the way.

The Moment of Truth

International aviation is a massive and complex industry that is crucial to our global economy and way of life. Fundamentals of International Aviation, designed for the next generation of aviation professionals, flips the traditional approach to aviation education. Instead of focusing on one career in one country, it has been designed to introduce the aviation industry on a global scale with a broad view of all the interconnected professional groups. Therefore, this is an appropriate introductory book for any aviation career (including aviation regulators, maintenance engineers, pilots, flight attendants, airline managers, dispatchers, air traffic controllers, and airport managers among many others). Each chapter of this text introduces a different cross-section of the industry, from air law to operations, security to remotely-piloted aircraft (drones).

A variety of learning tools are built into each section, including case studies that describe an aviation accident related to the content of each chapter. This book provides a foundation of aviation industry awareness that will support the next generation as they choose a career path that best aligns with their interests and ambitions. It also offers current professionals an enriched understanding of the practices and challenges between the many interconnected professional groups that make up the rich fabric of international aviation. Online slides and a test bank are available as an eResource for this book, which can be found at www.routledge.com/9781138708976.
