#1 NEW YORK TIMES BESTSELLER • NOW A MAJOR MOTION PICTURE STARRING MICHAEL B. JORDAN AND JAMIE FOXX • A powerful true story about the potential for mercy to redeem us, and a clarion call to fix our broken system of justice—from one of the most brilliant and influential lawyers of our time. “[Bryan Stevenson’s] dedication to fighting for justice and equality has inspired me and many others and made a lasting impact on our country.”—John Legend NAMED ONE OF THE MOST INFLUENTIAL BOOKS OF THE DECADE BY CNN • Named One of the Best Books of the Year by The New York Times • The Washington Post • The Boston Globe • The Seattle Times • Esquire • Time Bryan Stevenson was a young lawyer when he founded the Equal Justice Initiative, a legal practice dedicated to defending those most desperate and in need: the poor, the wrongly condemned, and women and children trapped in the farthest reaches of our criminal justice system. One of his first cases was that of Walter McMillian, a young man who was sentenced to die for a notorious murder he insisted he didn’t commit. The case drew Bryan into a tangle of conspiracy, political machination, and legal brinkmanship—and transformed his understanding of mercy and justice forever. Just Mercy is at once an unforgettable account of an idealistic, gifted young lawyer’s coming of age, a moving window into the lives of those he has defended, and an inspiring argument for compassion in the pursuit of true justice. Winner of the Carnegie Medal for Excellence in Nonfiction • Winner of the NAACP Image Award for Nonfiction • Winner of a Books for a Better Life Award • Finalist for the Los Angeles Times Book Prize • Finalist for the Kirkus Reviews Prize • An American Library Association Notable Book “Every bit as moving as To Kill a Mockingbird, and in some ways more so . . . a searing indictment of American criminal justice and a stirring testament to the salvation that fighting for the vulnerable sometimes yields.”—David Cole, The New York Review of Books “Searing, moving . . . Bryan Stevenson may, indeed, be America’s Mandela.”—Nicholas Kristof, The New York Times “You don’t have to read too long to start cheering for this man. . . . The message of this book . . . is that evil can be overcome, a difference can be made. Just Mercy will make you upset and it will make you hopeful.”—Ted Conover, The New York Times Book Review “Inspiring . . . a work of style, substance and clarity .

. . . Stevenson is not only a great lawyer, he's also a gifted writer and storyteller."—The Washington Post "As deeply moving, poignant and powerful a book as has been, and maybe ever can be, written about the death penalty."—The Financial Times "Brilliant."—The Philadelphia Inquirer

For fans of *Unbroken*, *Left for Dead* is the incredible story of a boy inspired by *Jaws* to help bring closure to the survivors and their families of the World War II sinking of the USS *Indianapolis*. Just after midnight on July 30, 1945, the USS *Indianapolis* was torpedoed by a Japanese submarine. The ship sank in 14 minutes. More than 1,000 men were thrown into shark-infested waters. Those who survived the fiery sinking—some injured, many without life jackets—struggled to stay afloat in shark-infested waters as they waited for rescue. But the United States Navy did not even know they were missing. The Navy needed a scapegoat for this disaster. So it court-martialed the captain for "hazarding" his ship. The survivors of the *Indianapolis* knew that their captain was not to blame. For 50 years they worked to clear his name, even after his untimely death. But the navy would not budge—until an 11-year-old boy named Hunter Scott entered the picture. His history fair project on the *Indianapolis* soon became a crusade to restore the captain's good name and the honor of the men who served under him. Praise for *Left for Dead*: Christopher Award Winner An ALA-YALSA Best Nonfiction for Young Adults Book "Compelling, dreadful, and amazing."—VOYA "This exciting, life-affirming book about war heroics and justice . . . proves without question the impact one student can have on history."—Booklist "Well written and well documented ... this excellent presentation fills a void in most World War II collections"—School Library Journal "Young readers . . . will no doubt be inspired by the youth's tenacity—and by the valor of those who served on the *Indianapolis*."—The Horn Book From the Trade Paperback edition.

You'll get through this. It won't be painless. It won't be quick. But God will use this mess for good. Don't be foolish or naïve. But don't despair either. With God's help, you'll get through this. You fear you won't make it through. We all do. We fear that the depression will never lift, the yelling will never stop, the pain will never leave. In the pits, surrounded by steep walls and aching reminders, we wonder: Will this gray sky ever brighten? This load ever lighten? In *You'll Get Through This*, pastor and New York Times best-selling author, Max Lucado offers sweet assurance. "Deliverance is to the Bible what jazz music is to Mardi Gras: bold, brassy, and everywhere." Max reminds readers God doesn't promise that getting through trials will be quick or painless. It wasn't for Joseph--tossed in a pit by his brothers, sold into slavery, wrongfully imprisoned, forgotten and dismissed--but his Old Testament story is in the Bible for this reason: to teach us to trust God to trump evil. With the compassion of a pastor, the heart of a storyteller, and the joy of one

who has seen what God can do, Max explores the story of Joseph and the truth of Genesis 50:20. What Satan intends for evil, God redeems for good.

Biology

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

How do we hear from God and discern His will when it's time to make big decisions? Terry Looper shares a four-step process for doing just that - a process he has learned and refined over thirty years as a Christian entrepreneur and founder of a multi-billion dollar company. At just thirty-six years old, Terry Looper was a successful Christian businessman who thought he had it all—until managing all he had led to a devastating burnout. Wealthy beyond his wildest dreams but miserable beyond belief, Terry experienced a radical transformation when he discovered how to align himself with God's will in the years following his crash and burn. Sacred Pace is a four-step process that helps Christians in all walks of life learn how to slow down their decision-making under the guidance of the Holy Spirit, sift through their surface desires and sinful patterns in order to receive clear, peace-filled answers from the Lord, gain the confident assurance that God's answers are His way of fulfilling the true desires he has placed in their hearts, and grow closer to the One who loves them most and knows them best. This book is not another example of name-it-and-claim-it materialism in disguise. Instead, it walks readers through the sometimes-painful process of "dying to self" in their decisions, both big and small, so that they desire God's will more than their own.

Biology 12

Bernard Rosner's FUNDAMENTALS OF BIostatISTICS is a practical introduction to the methods, techniques, and computation of statistics with human subjects. It prepares students for their future courses and careers by introducing the statistical methods most often used in medical literature. Rosner minimizes the amount of mathematical formulation (algebra-based) while still giving complete explanations

of all the important concepts. As in previous editions, a major strength of this book is that every new concept is developed systematically through completely worked out examples from current medical research problems. Most methods are illustrated with specific instructions as to implementation using software either from SAS, Stata, R, Excel or Minitab.
