That Workshop Book

In *The Ethics of Educational Leadership*, the author of one of the leading texts in human resource administration presents a practical resource dealing with significant ethical issues involved in building and central office administration. In it, Ronald Rebores presents the ethical ideas and notions of 20 philosophers and psychologists applied to the practice of educational leadership. The book helps tomorrow's educational leaders evaluate the philosophical ideas of others, and use what they discover to develop their own way of approaching their leadership responsibilities.

School Law

This volume presents the results of a comprehensive study of educational leadership faculty and the departments and programs in which they work. It reports the characteristics, activities, and attitudes of educational leadership faculty members involved in universitybased educational leadership preparation programs in 2008 and provides longitudinal comparisons with data from studies conducted since 1972. The findings are compared by type of institution and with

respondents grouped by sex, race, administrative experience, type of appointment (tenureline or clinical), length of time in the professoriate, and affiliation with the University Council for Educational Administration and the National Council of Professors of Educational Administration. Findings indicate that while the number of universitybased leadership preparation programs continues to grow, the average faculty size has declined. Among major trends are an increase in female faculty members from 2% of the faculty in 1972 to 45% in 2008 and the reduction in gender differences in activities and attitudes since the mid1980s. Also, over the past few decades, there has been a significant increase in faculty occupying nontenureline positions, having administrative experience, and focusing on leadership in general in contrast to a content specialization. These and other developments have significant implications for leadership preparation programs and for knowledge production in our field.

Human Resources Administration in Education

What is a high-impact school? One which achieves higher than expected results. And how do those schools achieve those results? The principal is the critical element in determining the kind of impact the school will have on its students. This book presents specific knowledge and practical strategies for school leaders to help them reach high standards of excellence. It focuses on these five areas of action: 1. It's about the mission, not the mission statement; 2. High expectations for each and every student; 3. Building communities of learners; 4. Teachers are the silver bullet; and 5. Creating a coherent system for continuous improvement.

Educational Administration: Concepts and Practices

Practicing the Art of Leadership

School Law and the Public Schools by Nathan L. Essex gives educators and policy makers at all levels practical, easy-to-read, relevant information on the historical and contemporary legal issues affecting the organization and administration of schools in the United States. Virtually every topic of concern to today's educators is covered in a practical, easy-to-read organization and style that's accessible even to those with little or no knowledge of the legal issues affecting public schools. Revised chapters in this new Sixth Edition include recent rulings on religion in public schools, social media, Facebook and Twitter challenges, virtual charter schools, administrators' authority at bus stops, legal aspects of teachers and administrators' evaluation, teacher performance and misconduct, 504 Rehabilitation plans, the McKinney-Vento Homeless Act, violence and tragedy in U.S. schools, procedures for evaluating and responding to threats, natural disasters and school safety, proposed changes to No Child Left Behind by the White House, use of chaperones for field trips, and new application exercises at the end of each chapter.

The Basic Guide to Supervision and Instructional Leadership

This book provides a bridge from learning the theory of school administration to the practical problem solving in which school principals and other leaders engage. This book continues to be based on the research indicating linkages between educational leadership and productive schools, especially in terms of outcomes for children. It supports the understanding that formal leadership in schools is a complex, multi-faceted task that requires continual learning and that effective school leaders must be strong educators focused on the central issues of learning, teaching, and school improvement. School leaders must also be moral agents and social advocates for the children and communities they serve while working with community stakeholders to create learning communities that value and care for

others as individuals and as members of the educational community. For those aspiring to become principals or hold leadership positions.

High-Impact Leadership for High-Impact Schools

The sixth edition of "Educational Governance and Administration "provides a clear and comprehensive introduction to school finance issues and schools as political systems. Its case-based approach, descriptive studies of how schools work, and broad look at the historical, political, social contexts that make up this area of study make this book a valuable tool for every aspiring educator, policymaker, and citizen looking for an overview of the current American educational system.

"Educational Governance and Administration "examines administrative practices with a critical eye and provides a balanced overview of the development of educational administration, taking into account the roles of teachers, students, principals, and superintendents. Extensively revised, the sixth edition contains a completely updated and comprehensive discussion of policy and policy making, as well as the financial and legal challenges that school leaders face. It explores the expanding role of the government in education and leadership, how schools work as political systems, and how administrators balance local, state, and federal influences. New to This Edition Discussion of the complex and pervasive impacts of NCLB have been integrated throughout the text. New, innovative, and student-friendly pedagogical features such as data, charts, and graphs have been incorporated. Coverage of school law has been completely updated reflecting the most recent and most important court decisions and their impact. New and comprehensive information on standards-based leadership and the current controversy about administrative preparation has been added. New Chapter 7, Students Today, examines the evolving nature of today's students and evaluates contemporary research on this subject. "I have found no textbooks on the topic to be superior to this one. The authors have distilled the essence of public school governance and administration and provided it to the reader in a manner that demands his/her reflection. The content is well researched and well presented. I plan on using the text in our program next fall and look forward to the new edition." --Larry W. Brooks, Shenandoah University "This book and its earlier editions are all classic texts for use in intro courses in our field. I'm glad to see a new edition on the horizon. The addition of a recent practitioner on the writing team has vastly improved the focus of the book." --John Daresh, University of Texas, El Paso "I think that the Sergiovanni text continues to offer the best overview of how schools are governed." --Judith Zimmerman, Bowling Green State University

Building Classroom Discipline

Centered on the seven Educational Leadership Constituent Council (ELCC) Standards developed for school leaders that covers both theory and practice. Using the seven Educational Leadership Constituent Council (ELCC) Standards as an organizational tool, the revised seventh edition of *The Principal: Creative Leadership For Excellence in Schools* continues to provide future school administrators with both the necessary theory and the necessary practical skills to become effective educational leaders. At the same time, the newly updated text incorporates fresh material on modern legal issues, expanded coverage on the topic of cultural and ethnic diversity in schools, and all of the most recent research. With a focus on practical problem solving for school principals and other educational leaders, this text retains its focus on research linking educational leadership and productive schools, especially in terms of outcomes for children. Treating the principalship as a complicated and constantly evolving position that requires a constant focus on learning, instruction, and school improvement, this seventh edition text teaches readers to be moral agents, social advocates, community leaders, and caring individuals.

Legal Rights of Teachers and Students

Wealth vs. Work: How 1% Victimize 99% is about the vanishing American dream, growing inequality in America, shrinking and struggling middle class, plight of labor and unions, economic decline of the nation, and a broken and unstable world surrounding the U.S. Education is no longer the great equalizer. We are heading toward a world where inherited privilege trumps excellence and meritocracy. Carried far enough, it means the end of striving and the American dream. Few Americans realize or want to admit it. Since recorded history, workers have been victimized by the rich and super rich, treated as fungible and disposable. The early warlords and monarchs have been replaced by the “titans” of industry and “masters of the universe” on Wall Street. The slaves, peasants and serfs have been replaced by miners, factory workers, and service-sector workers. The GM model of the 1950s and 1960s (that permitted labor to become middle class) has been replaced by the Wal-Mart model—characterized by low pay and minimal benefits. By 2025, the economic output of China and India may likely each exceed the U.S. Moreover, the U.S. work force is being increasingly displaced by technology and outsourcing. But we are supposed to be the lucky ones! By historical and

geographical accident, the U.S. has been spared most of the world's poverty and misery. Today, however, the U.S. is heading towards a financial oligarchy—much worse than the aristocratic old world that our Founding Fathers feared and tried to avoid. Yes, the U.S. had a revolution, but in fact it has a new and more powerful elite because the economic pie has expanded several thousand fold since the yeoman farmers' status was compared to the plantation owner. Right now the top 1 percent in the U.S. own nearly 40 percent of the nation's wealth; moreover, their investments, capital gains and dividends are taxed at a lower rate than workers' salaries. Like all great civilizations that have declined before us, we are a nation that needs to re-examine its ideals and institutions.

Public School Law

The goal of this book is to provide comprehensive and practical knowledge of relevant legal issues that affect the administration of public schools. It will allow educators to effectively perform their duties within the boundaries of constitutional, statutory, and case law. It is also designed to be easy to understand for those with little or no legal background. Selected court cases address issues most relevant to education. It includes recent landmark court decisions in areas such as religion, student rights, student and faculty disabilities, and classroom harassment. School violence is discussed comprehensively. The book begins with an index of major legal issues related to relevant issues, allowing the reader to ascertain the legal sources of authority related to those particular topics. Educational leaders are provided with pertinent information to direct their day-to-day decisions. The primary focus is not on state law since this varies from state to state. Appendices include constitutional provisions, selected and annotated federal statutes, and an abbreviated glossary. It will enable educators to perform their legal duties and to meet the requirements of reasonableness as they move their organizations toward their goals. (Contains 279 references.) (RKJ)

Connecting Teachers, Students, and Standards

This text is written for K-12 educators and others who have little background in school law and need to know the sources of law under which educators operate. It focuses on an understanding of legal rationale and the principles that inform practice. Relevant case law, statutory law, constitutional provisions, and commentary are provided to develop a basic understanding of school law issues and the legal rationale underpinning such law. Broad legal concepts such as due process, equal protection, freedom of expression, the wall separating church and state, and reasonable search are stressed to help professional educators gain a better understanding of the legal landscape in which they operate. The case method of studying school law is emphasized. Selected cases present legal concepts in a real world context, assisting students in making the essential connection between more abstract general principles of law and their operational application in schools. This text is revised every three years to present the most current available information. But because the law changes rapidly, this text also provides students with essential skills and tools necessary for basic legal research, case citation, analyzing judicial decisions, and understanding the operations of state and federal systems of government. Lastly, but most importantly, the text is written in a clear, understandable, and interesting manner, to actively engage students in lively discussion, and debate concerning the application of the law in schools. The author provides notes and questions throughout the book to facilitate better understanding of the law and enable instructors to enrich learning through stimulating class discussions."
