Nursing Older People

This publication provides a comprehensive guide to the assessment and management of foot and ankle problems in older people.

The Ethics of Caring for Older People

Focusing on the broad but practical notions of how to care for the patient, The Encyclopedia of Elder Care, a state-of-the-art resource features nearly 300 articles, written by experts in the field. Multidisciplinary by nature, all aspects of clinical care of the elderly are addressed. Coverage includes acute and chronic disease, home care including family-based care provisions, nursing home care, rehabilitation, health promotion, disease prevention, education, case management, social services, assisted living, advance directives, palliative care, and much more! Each article concludes with specialty web site listings to help direct the reader to further resources. Features new to this second edition: More extensive use of on-line resources for further information on topics Thoroughly updated entries and references Inclusion of current research in geriatrics reflecting evidence-based

practice New topics, including Assisted Living, Nursing Home Managed Care, Self-Neglect, Environmental Modifications (Home & Institution), Technology, Neuropsychological Assessment, Psychoactive Medications, Pain--Acute and Chronic Still the only reference of it kind, The Encyclopedia of Elder Care will prove to be an indispensable tool for all professionals in the field of aging, such as nurses, physicians, social workers, counselors, health administrators, and more.

Understanding the Australian Health Care System - E-Book

This book provides insight into the primary issues faced by older adults; the services and benefits available to them; and the knowledge base, techniques, and skills necessary to work effectively in a therapeutic relationship. Dr. Kampfe offers empirically and anecdotally based strategies and interventions for dealing with clients' personal concerns and describes ways counselors can advocate for older people on a systemic level. Individual and group exercises are incorporated throughout the book to enhance its practicality. Topics covered include an overview of population demographics and characteristics; counseling considerations and empowering older clients; successful aging; mental health and wellness; common medical conditions; multiple losses and transitions; financial concerns; elder abuse; veterans' issues; sensory loss; changing family dynamics; managing Social Security and Medicare; working after retirement age; retirement transitions, losses, and gains; residential options; and death and dying. *Requests

Placement Learning in Older People Nursing,A guide for students in practice,1

Nursing Practice is the essential, textbook to support you throughout your entire nursing degree, from your first year onwards. It explores all the clinical and professional issues that you need to know in one complete volume. Written in the context of the latest Nursing and Midwifery Council Standards for Pre-Registration Nursing Education and the Essential Skills Clusters, this book covers all fields of nursing: Adult, Child, Mental Health, Learning Disabilities and also Maternity care, in both acute and community settings. With full colour illustrations, and plenty of activities and user-friendly features throughout, this evidence-based text encompasses essential nursing theory and practice, providing students with information to support their success. Learning features in the book include: Hear it from the experts- tips and advice from real life nurses, patients and their carers, and student nurses Red Flags- alerting the student to potential dangers Primary Care Considerations- informs students about care issues in the community setting Fields boxes- giving further insight into other fields of nursing, making the book

relevant to all fields of nursing practice Medicines Management boxes provide key information about medicines Self-assessment and activities throughout A companion website to this title is available at www.wileynursingpractice.com Here you'll find a range of resources for both the student and the lecturer, including: Over 350 interactive multiple choice questions Flashcards Glossary Links to references and further reading Illustrations from the book Worksheets

Older People

As our understanding of aging and Alzheimer's, and the cultural changes related to these phenomena, grows so do the implications for interior design. Focus on recent innovations in care environments for the aging with a resource dedicated to this topic. This comprehensive book features: Coverage of the emerging building types of adult day care and hospice and the increased use of gardens and outdoor space in environments for the aging. Material on sustainable design and environmentally friendly building products. Design solutions that extend beyond assisted-living facilities and nursing homes as they can be easily adapted for residential use. Photographs, line drawings, and a 16-page color insert that bring the material to life. Order your copy of this book today.

Innovation: 2011 Edition

"his book presents the main results of the European research project EUROFAMCARE. It provides an overview of the current situation of family carers of older people in six European countries in relation to the availability, use and acceptability of support services. The presented findings aim at aiding policy and decision-makers to understand the critical importance of family carers now and in the coming decades to improve their situation and to encourage them in their invaluable work of caring.

Cognitive Behavior Therapy with Older Adults

This book brings together Sociologists, Computer Scientists, Applied Scientists and Engineers to explore the design, implementation and evaluation of emerging technologies for older people. It offers an innovative and comprehensive overview, not only of the rapidly developing suite of current digital technologies and platforms, but also of perennial theoretical, methodological and ethical issues. As such, it offers support for researchers and professionals who are seeking to understand and/or promote technology use among older adults. The contributions presented here offer theoretical and methodological frameworks for understanding age-based digital inequalities, participation, digital design and socio-

gerontechnology. They include ethical and practical reflections on the design and evaluation of emerging technologies for older people, as well as guidelines for ethical, participatory, professional and cross-disciplinary research and practice. In addition, they feature state-of-the-art, international empirical research on communication technologies, games, assistive technology and social media. As the first truly multidisciplinary book on technology use among ageing demographics, and intended for students, researchers, applied researchers, practitioners and professionals in a variety of fields, it will provide these readers with insights, guidelines and paradigms for practice that transcend specific technologies, and lay the groundwork for future research and new directions in innovation.

Technology for Adaptive Aging

Nursing older people is often considered the 'Cinderella' service. This ground-breaking new book seeks to rectify that, bringing discussion of elderly care to the forefront of research and critical practice. Based on the author's own ethnographic research, it explores the gap between theory (what nurses know) and practice (what nurses actually do), including: ■ key theories of older people's nursing ■ day-to-day practices on an elderly care ward ■ the essential skills of caring, nurturing and supporting ■ the importance of critical reflective practice. Researching Older People's Nursing links the realities of practice with the key principles from 'on the ward' research. It is a fascinating read for nursing students,

practitioners and researchers alike.

Aging

Issues in Nursing Research, Training, and Practice: 2012 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Nursing Research. The editors have built Issues in Nursing Research, Training, and Practice: 2012 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Nursing Research in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Nursing Research, Training, and Practice: 2012 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at http://www.ScholarlyEditions.com/.

Nursing Practice

Community Mental Health for Older People is the perfect resource for mental health workers as it discuses the ageing population, within the context of community mental health. It provides a comprehensive overview of the important issues and clinical practices that influence mental health care for older people. Written from a multidisciplinary perspective it is suitable for all health workers in community mental health teams (Aboriginal and Torres Strait Islander health workers, clinical psychologists, consumer representatives, medical practitioners, occupational therapists, registered nurses, social workers, etc) as it incorporates the use of case studies to aid in the application of evidence-based practice. Multidisciplinary approach serves to illustrate the breadth and context of mental issues for older people Chapters are topical and relevant, discussing issues such as service provision, cultural and rural issues, major disorders and interventions, as well as ethical and legal issues. Vignettes are included throughout the clinical chapters and serve to illustrate real cases derived from practice Evidence-based practice is a key element to this pivotal new text as it highlights the best method of practise, in a clear and accessible manner. Highly readable style without the bulkiness of excessive references This text will cover issues relevant to the mental health of older people within a community context in Australia and New Zealand. Issues will include population health and the clinical management of the major concerns experienced with the diverse clinical presentations by older people. The mental health care of older people is now considered a specialist area with older person's mental health services being key components of the mental health

service framework. The publication is primarily aimed at health workers in community mental health teams (registered nurses, clinical psychologists, medical practitioners, social workers, occupational therapists, Aboriginal and Torres Strait Islander health workers etc), but would incorporate those trainee health professionals involved in relevant undergraduate and postgraduate studies.

Counseling Older People

Providing a concise review of the demographic context underpinning the development of community care for older people, and a critical review of community care in post-war Britain, this textbook discuss the current data and research regarding service provision and the costs and effectiveness of such services. The author integrates available data about the use of different types of service, and considers the implications of the 1993 policy and demographic change on the provision of community care in the future, comparing data relating to Britain with that of other developed countries, especially in Europe.

Handbook of Research on Digital Information Technologies: Innovations, Methods, and Ethical Issues

A one-stop resource for core discipline practitioners who provide mental health

services to the geriatric population, Cognitive Behavior Therapy with Older Adults presents strategies for integrating cognitive behavioral therapy (CBT) skills and therapies into various healthcare settings for aging patients. Cognitive Behavior Therapy with Older Adults is divided into key two parts: CBT for common mental health problems for older adults and innovations across settings in which older adults are present. Evidence-based and provider-friendly, it emphasizes adapting CBT specifically for the aging population and its specific needs. Key features: A general introduction on aging that dispels myths and highlights the need to address mental health problems among this age group Chapters that overview epidemiology data, diagnostic criteria, assessment, and CBT approaches to treatment Case examples, including those that depict a composite of a successfully aging older adult A comprehensive resource section including handouts, note templates, and other useful tips and worksheets for practice A listing of supplemental texts, patient resources, and summary charts

Community Mental Health for Older People

The following publication offers an outline of a situation of family caregivers just before the significant changes brought about by the new legislation on social services will have occurred. That the timing is right since the publication proves that the situation of family caregivers must be substantially changed and improved. If there are any doubts regarding necessity of the new law on social

services, this publication will belong to the ones that will help to overcome such presumptions.

Issues in Nursing Research, Training, and Practice: 2012 Edition

A updated overview of Australia's health care system, addressing its core features, concepts and issues Understanding the Australian Health Care System, 2nd edition is an excellent university book for undergraduate and postgraduate students alike. Published four years after the original, this second edition has been fully revised to reflect major Australian health care reform. Its fully up-to-date content includes current governmental and legislative changes impacting Australia's health care system. Other topics addressed include quality and safety within the system, health insurance in Australia – both public and private – the PBS and integrated medicine. This outstanding medical book delves deeply into the system's theoretical framework, structure and organisation and includes comparisons with the US and UK health care systems. This new edition of Understanding the Australian Health Care System will be a valuable reference for those studying health science, health promotion, sports and exercise science, physiotherapy, human services, nursing, midwifery, medicine, paramedicine, health system management, medical radiations science and health informatics. Online student

and instructor resources Stronger focus on social determinants throughout text Addresses a wide range of health professions – now including disability professionals and social workers Current theoretical framework for healthcare reform (Tuohy 2009) Stronger focus on social determinants throughout text Addresses current position on national registration Features an excellent ancillary package on Elsevier's Evolve platform Includes three new chapters addressing: disability professionals; quality and safety; and social work Reflects major health care reform in Australia (COAG 2009) Discusses current theoretical framework for healthcare reform (Tuohy 2009) New contributors

Ageing and Technology

This comprehensive textbook addresses nursing care of the older person. As the elderly population grows, the number of nurses and other health care workers needed to look after them likewise increases. Throughout the text current trends in nursing practice are stressed, such as the increasing reluctance to keep older patients in the hospital, and the growing trend towards a team or multidisciplinary approach.

Community Care and Older People

This book showcases developments in theory, research and practice regarding sexuality and ageing, considering the differences as well as similarities between and among ageing heterosexual and LGBT older people. Identifying the questions central to future social scientific research on ageing and sexuality, it focuses on the important, emerging dimensions of sexuality and ageing: embodiment, the diversification of the ageing context and the intersections of care and sexuality. With attention to the different forms of sexualities, particularly at their intersection with gender, this volume explores the importance of spatial and relational contexts, whether individual, residential or virtual, with authors offering studies of online dating, sexuality in the context of residential care and the relationship between sexuality, legal frameworks and social policy. Interdisciplinary in scope and offering the latest research from scholars in the UK, Australasia and Africa, Ageing and Sexualities constitutes an integrated approach to the conceptual and practical challenges of understanding the interplay of ageing and sexuality in contemporary society. As such, it will appeal to scholars from a variety of disciplinary backgrounds, including sociology, cultural studies, socio-legal studies, social gerontology, psychology, medicine and health care.

Researching Older People's Nursing

Disrupt Aging

This edition captures the underlying new approach in patient centred care and thinking from a multidisciplinary perspective. It highlights the most recent ideas and experiences of policy analysts, nurses, doctors, allied health professionals and the consumer experience from both Australia and Internationally. Contemporary research compliments the vignettes of practice and in conjunction with accompanying 'video' clips serve to capture the realities of caring for older people in our society.

Supporting Family Carers of Older People in Europe

Emerging and currently available technologies offer great promise for helping older adults, even those without serious disabilities, to live healthy, comfortable, and productive lives. What technologies offer the most potential benefit? What challenges must be overcome, what problems must be solved, for this promise to be fulfilled? How can federal agencies like the National Institute on Aging best use their resources to support the translation from laboratory findings to useful, marketable products and services? Technology for Adaptive Aging is the product of a workshop that brought together distinguished experts in aging research and in technology to discuss applications of technology to communication, education and

learning, employment, health, living environments, and transportation for older adults. It includes all of the workshop papers and the report of the committee that organized the workshop. The committee report synthesizes and evaluates the points made in the workshop papers and recommends priorities for federal support of translational research in technology for older adults.

Families Caring for an Aging America

This book provides insightful sociological analyses of Japanese demography and families, paying attention not only to national average data, but also to regional variations and community level analyses. In analyzing Japanese family issues such as demographic changes, courtship and marriage, international marriage, divorce, late-life divorce, and the elderly living alone, this book emphasizes the significance of two theoretical frameworks: the dual structure and regional variations of the community network in Japan. By emphasizing the extensive cultural diversity from one region to another, this book represents a paradigm shift from former studies of Japanese families, which relied mostly on national average data. The method of analysis adopted in the study is qualitative, with a historical perspective. The book is thus an invitation to more in-depth, qualitative dialogue in the field of family sociology in Japan. This book will be of great interest not only to Asian scholars, but also to other specialists in comparative family studies around the world.

Family Carers of Older People in Europe

At least 5.6 million to 8 million--nearly one in five--older adults in America have one or more mental health and substance use conditions, which present unique challenges for their care. With the number of adults age 65 and older projected to soar from 40.3 million in 2010 to 72.1 million by 2030, the aging of America holds profound consequences for the nation. For decades, policymakers have been warned that the nation's health care workforce is ill-equipped to care for a rapidly growing and increasingly diverse population. In the specific disciplines of mental health and substance use, there have been similar warnings about serious workforce shortages, insufficient workforce diversity, and lack of basic competence and core knowledge in key areas. Following its 2008 report highlighting the urgency of expanding and strengthening the geriatric health care workforce, the IOM was asked by the Department of Health and Human Services to undertake a complementary study on the geriatric mental health and substance use workforce. The Mental Health and Substance Use Workforce for Older Adults: In Whose Hands? assesses the needs of this population and the workforce that serves it. The breadth and magnitude of inadequate workforce training and personnel shortages have grown to such proportions, says the committee, that no single approach, nor a few isolated changes in disparate federal agencies or programs, can adequately address the issue. Overcoming these challenges will require focused and coordinated action by all.

Older People

The Handbook of the Psychology of Aging has become the definitive reference source for information on the psychology of adult development and aging. The Fifth Edition provides comprehensive reviews of research on biological and social influences on behavior and age-related changes in psychological function. In addition to covering environmental influences on behavior and aging and gender differences in aging, new chapters in the Fifth Edition discuss wisdom, creativity, and technological change and the older worker. This handbook is an essential reference for researchers in adult development and gerontology and suitable as an advanced textbook for courses on the psychology of aging.

Ageing and Sexualities

Evidence synthesis is the evaluation or analysis of research evidence and opinion on a specific topic to aid in decision-making in health care. Although the science of evidence synthesis has developed most rapidly in relation to the meta-analysis of numerical data linked to theories of cause and effect, the further development of theoretical understandings and propositions of the nature of evidence, its role in health care delivery, and the facilitation of improved global health have increased rapidly since 2000. The articles appearing in this issue examine the role of

evidence synthesis in nursing and health care and are written by expert translational scientists from across the world. Three introductory articles overview evidence synthesis and its role in evidence-based health care; methods, issues, and trends in the systematic review of health care evidence; and the development of a robust evidence base for nursing. Subsequent articles explore the impact of systematic reviews on policy and practice in a variety of settings, including perioperative care, pediatrics, rehabilitation and long-term/continuing care, mental health, and public health. The final articles discuss the impact of evidence on health policy and practice and the complexities of translating evidence into policy and practice. These articles show the importance of synthesizing evidence and translating policy and practice into action in our quest to improve health care and health outcomes.

Foot Problems in Older People

Worried about your placement? Will you fit in? Will you have the right skills? What do you need to learn for practice assessments? This book will help you with all these concerns. It will tell you what to expect from the placement, what you can learn, how to link theory and practice, and how to make the most of your learning opportunities. A logical, step-by-step approach to preparing for a medical placement Helps make the most of learning opportunities Explains how to develop medical competencies, mapping specific cancer and palliative care exercises and

activities to the NMC competencies Narratives from other students describe what the placement will really be like Honest discussion of the challenges of a medical placement to help avoid problems Advice on possible approaches to situations that may arise Focus on the essential evidence base of cancer and palliative care nursing, linking theory to practice Series features: A unique guide to getting the most from clinical placements What to expect before a placement What you can expect to learn on placement How to consolidate your experience and learning Clear links and examples with NMC proficiencies Guidance on what to use as evidence for portfolios Short case studies to link theory with practice Key points reminder boxes Worried about your next placement? Will you 'fit in'? Will you have the right skills? What do you need to learn to meet practice assessments? This series will help you with all these concerns. It will tell you what to expect from each placement, what you can learn, how to link theory and practice, and how to make the most of your learning opportunities. This is the only series specifically for student nurses undertaking specific practice placements, and will give you all the information you need in a user-friendly format. Each book in the series covers a specific area of practice for a typical placement on a pre-registration nursing course. Each title provides: A unique guide to getting the most from clinical placements How to prepare for your placement What you can expect to learn during a placement Clear links to, and examples of, achieving NMC competencies Guidance on what to use as evidence for your portfolio Case studies that link theory with practice How to consolidate your experience and learn from the

placement Tips, activities, further reading suggestions and useful websites. Titles in the Placement Learning series: Surgical nursing Medical nursing Cancer and palliative care nursing Mental health nursing Community care nursing Older people nursing

Counselling Older People with Alcohol Problems

Family caregiving affects millions of Americans every day, in all walks of life. At least 17.7 million individuals in the United States are caregivers of an older adult with a health or functional limitation. The nation's family caregivers provide the lion's share of long-term care for our older adult population. They are also central to older adults' access to and receipt of health care and community-based social services. Yet the need to recognize and support caregivers is among the least appreciated challenges facing the aging U.S. population. Families Caring for an Aging America examines the prevalence and nature of family caregiving of older adults and the available evidence on the effectiveness of programs, supports, and other interventions designed to support family caregivers. This report also assesses and recommends policies to address the needs of family caregivers and to minimize the barriers that they encounter in trying to meet the needs of older adults.

Issues in Surgical Research, Techniques, and Innovation: 2011 Edition

This second edition retains the focus adopted by the first on the many issues faced by nurses working in aged care, but reflects recent changes and developments at a national level. The book draws on research undertaken by the authors and looks to the ongoing research and development necessary for quality aged care.

Diabetes in Old Age

This second edition retains the focus adopted by the first on the many issues faced by nurses working in aged care, but reflects recent changes and developments at a national level. It draws on research undertaken by the authors and looks to the ongoing research and development necessary for quality aged care. Australian authors.

Family Issues on Marriage, Divorce, and Older Adults in Japan

Aging, Health and Technology takes a problem-centered approach to examine how older adults use technology for health. It examines the many ways in which technology is being used by older adults, focusing on challenges, solutions and

perspectives of the older user. Using aging-health technology as a lens, the book examines issues of technology adoption, basic human factors, cognitive aging, mental health, aging and usability, privacy, trust and automation. Each chapter takes a case study approach to summarize lessons learned from unique examples that can be applied to similar projects, while also providing general information about older adults and technology. Discusses human factors design challenges specific to older adults Covers the wide range of health-related uses for technology—from fitness to leading a more engaged life Utilizes a case study approach for practical application Envisions what the future will hold for technology and older adults Employs a roster of interdisciplinary contributors

Leading Issues in Innovation Research

"This book provides a collection of successful designs, defined as communicative relation-building solutions, for individuals and collectives of interlocutors. It includes a longitudinal perspective of past mistakes, current trends and future opportunities, and is a must-have for beginners in the field as well as qualified professionals exploring the full potential of human interactions"--Provided by publisher.

Ageing and Digital Technology

This new edition of the popular and market-leading Diabetes in Old Age features up-to-date and comprehensive information about the key aspects of managing older people with diabetes, predominantly type 2 diabetes. With a strong evidence-based focus throughout, the entire range of issues surrounding diabetes and its many complications are covered, each with a clear focus on how they relate directly to the older patient. Varying approaches to optimizing diabetes care in the community, primary care and secondary care health care arenas are presented, and the importance of comprehensive functional assessment is emphasized. Coverage of areas unique to an ageing population of older people with diabetes such as falls management, frailty and sarcopenia, and cognitive dysfunction form a key cornerstone of the book. In every chapter, best practice points and key learning outcomes are provided, as well as published evidence bases for each major conclusion. Diabetes in Old Age, 4th edition is essential reading for diabetologists and endocrinologists, diabetes specialist nurses, primary care physicians, general physicians and geriatricians, podiatrists and dieticians with an interest in diabetes, as well as all health professionals engaged in the delivery of diabetes care to older people.

The Mental Health and Substance Use Workforce for Older Adults

Covers issues such as: developing the right innovative capabilities; how to design for strategic innovation, creativity and discovery; and moving beyond market equilibrium -- Back cover.

Perspectives and Theories of Social Innovation for Ageing Population

Presenting current research in an innovative text-reader format, Aging: Concepts and Controversies, Ninth Edition encourages students to become involved and take an informed stand on the major aging issues we face as a society. Not simply a summary of research literature, Harry R. Moody and Jennifer R. Sasser's text focuses on controversies and questions, rather than on assimilating facts or arriving at a single "correct" view about aging and older people. Drawing on their extensive expertise, the authors first provide an overview of aging in three domains: aging over the life course, health care, and the socioeconomic aspects of aging. Each section is followed by a series of edited readings, offering different perspectives from experts and specialists on that subject. New readings focus on whether current federal spending on the elderly is sustainable and fair to other groups, how older consumers are reshaping the business landscape, and the challenges of marketing and selling to customers 60 and over. More emphasis is placed on how social class and inequality earlier in life can shape our final years

and the number of older Americans living in poverty. The section on Aging and Health Care has been thoroughly updated to reflect the latest data about chronic diseases that affect the elderly, government spending on health care, and policy changes to programs like Medicaid and Medicare. The section on the Social and Economic Outlook for an Aging Society gives the most current picture of the racial and ethnic diversity of older Americans, their participation in the labor force, and their income and wealth.

Nursing Older People

This book is the British Medical Association's statement on the ethics related to care of the elderly, written and reviewed by a panel of renowned medical ethicists. As such it is an authoritative and considered reference, written in an accessible, non jargon so as to be useful for anyone charged with looking after the elderly. The book includes useful case examples so that it can be used by a range of health professionals and carers who need to know the law and ethics of looking after older people. The authors focus on practical issues such as helping older people stick to their treatment regimes, the sort of information they should be given to give valid consent, and their rights to confidentiality, as well as discussion about where they want to end their lives when it comes to that point.

Design Innovations for Aging and Alzheimer's

Issues in Surgical Research, Techniques, and Innovation: 2011 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Surgical Research, Techniques, and Innovation. The editors have built Issues in Surgical Research, Techniques, and Innovation: 2011 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Surgical Research, Techniques, and Innovation in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Surgical Research, Techniques, and Innovation: 2011 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at http://www.ScholarlyEditions.com/.

Aging, Technology and Health

Now in its fourth edition trusted textbook Older People: Issues and Innovations in Care provides a unique collection of conversations and commentaries by leading

international and local experts on a range of contemporary issues around the care of older people. Featuring six new chapters, current research and policy changes, the esteemed author team continue to highlight the importance of interdisciplinary healthcare in providing a comprehensive, person-centred approach to care. This edition encourages readers to explore care issues, innovations and change, and to utilise evidence-based practice to improve the care of older people and their families. - Editors' comments precede each chapter, providing a snapshot of the issues addressed. - Dementia care has an increased focus. New chapters include: - Caring for older people: issues for consumers - Younger people in residential aged care facilities - Health and care of older Aboriginal and Torres Strait Islander peoples - Alzheimer's dementia: neuropsychology, early diagnosis and intervention - Self-esteem, dignity and finding meaning in dementia - My journey of heartbreak: my parents and Alzheimer's disease. - Vignettes highlight innovative approaches to care that result in improved health outcomes for older people. - Key points are woven through the text to reiterate vital information relevant to nurses and aged care workers. - Reflective questions encourage critical thinking as an instrument for improving practice. - In-text references are made to video interviews available on the Evolve site. This text reflects new thinking in care; include the ideas and experiences of policy analysts, nurses, doctors, allied health professionals and the consumer experience mainly from Australia but with international contributions and be based on contemporary research. It will also point readers to 'the evidence' where it exists, and include vignettes of practice and 'video' clips where

appropriate.

Handbook of the Psychology of Aging

The United States is in the midst of a major demographic shift. In the coming decades, people aged 65 and over will make up an increasingly large percentage of the population: The ratio of people aged 65+ to people aged 20-64 will rise by 80%. This shift is happening for two reasons: people are living longer, and many couples are choosing to have fewer children and to have those children somewhat later in life. The resulting demographic shift will present the nation with economic challenges, both to absorb the costs and to leverage the benefits of an aging population. Aging and the Macroeconomy: Long-Term Implications of an Older Population presents the fundamental factors driving the aging of the U.S. population, as well as its societal implications and likely long-term macroeconomic effects in a global context. The report finds that, while population aging does not pose an insurmountable challenge to the nation, it is imperative that sensible policies are implemented soon to allow companies and households to respond. It offers four practical approaches for preparing resources to support the future consumption of households and for adapting to the new economic landscape.

Evidence-Based Review in Policy and Practice, An Issue of

Nursing Clinics,

Aging and the Macroeconomy

Alcohol misuse is becoming an increasingly significant issue for people aged 55 and over, and providing effective counselling services to this growing client group requires a unique and specialised approach. This practical guide explores the factors that differentiate older drinkers, and introduces an innovative person-centred model that will help counsellors and other healthcare professionals to give older people with alcohol problems the help and support they need. Older people with alcohol problems often have complex personal histories, and are particularly vulnerable to long-term dependency, social isolation and self-medication. This book explores the influences, patterns and triggers that affect the development and progression of alcohol dependency in this age group, and provides a detailed description of a theoretical model and therapeutic process that has proved successful in practice. Informative case studies demonstrate the approach in action and guidance is also given for working with clients with dementia or mental health problems. This book will prove an invaluable resource for counsellors and other healthcare professionals who encounter alcohol problems in their clinical practice, including clinical psychologists, social workers, occupational therapists and

community psychiatric nurses.

Nursing Older People

The booming increase of the senior population has become a social phenomenon and a challenge to our societies, and technological advances have undoubtedly contributed to improve the lives of elderly citizens in numerous aspects. In current debates on technology, however, the »human factor« is often largely ignored. The ageing individual is rather seen as a malfunctioning machine whose deficiencies must be diagnosed or as a set of limitations to be overcome by means of technological devices. This volume aims at focusing on the perspective of human beings deriving from the development and use of technology: this change of perspective - taking the human being and not technology first - may help us to become more sensitive to the ambivalences involved in the interaction between humans and technology, as well as to adapt technologies to the people that created the need for its existence, thus contributing to improve the quality of life of senior citizens.
