### Fm 5-34 Engineer Field Data

A “cinematic . . . page-turner and a passionate analysis of faith, memory, responsibility, and consequence.”—Molly Antopol, Fiction Writers Review  
Inspired by and structured around the chamber piece of the same title by the French composer Olivier Messiaen, *Quartet for the End of Time* is a mesmerizing story of four lives irrevocably linked in a single act of betrayal. The novel takes us on an unforgettable journey beginning during the 1930s Bonus Army riots, when World War I veteran Arthur Sinclair is falsely accused of conspiracy and then disappears. His absence will haunt his son, Douglas, as well as Alden and Sutton Kelly, the children of a powerful U.S. congressman, as they experience—each in different

ways—the dynamic political social changes that took place leading up to and during World War II. From the New Deal projects through which Douglas, newly fatherless, makes his living to Sutton’s work as a journalist, to Alden’s life as a code breaker and a spy, each character is haunted by the past and is searching for love, hope, and redemption in a world torn apart by chaos and war. Through the lives of these characters, as well as those of their lovers, friends, and enemies, the novel transports us from the Siberian Expedition of World War I to the underground world of a Soviet spy in the 1920s and 1930s, to the occultist circle of P. D. Ouspensky and London during the Blitz, to the German prison camp where Messiaen originally composed and performed his famous Quartet for the End of Time. At every turn, this rich and ambitious novel tells some of the less well-known stories of twentieth-century history with epic scope and astonishing power, revealing at every turn the ways in which history and memory tend to follow us, and in which absence has a palpable presence.

Few names in international motorsport are treated with the same reverence as Alan Jones. When he speaks, they listen. He is one of only two Australians to win the Formula One World Drivers' Championship, and the first driver to do it for the now famous Williams team. His efforts brought Formula One to Australian TV screens, and today he is the voice of Formula One on Network Ten and a board member of the Australian Grand Prix. He is also a Formula One Steward at a couple of Grands Prix a season. AJ is the son of Stan Jones, the winner of the 1959 Australian Grand Prix, and from an early age he wanted to follow in his father's

footsteps and race cars. He started with billycars in Balwyn and climbed to the top of the motorsport tree in Formula One. His career was potted with highs and lows, the latter coming mainly from a lack of financial support compared with his rivals. But when he hit the big time with Williams, he turned that into the 1980 World Championship and all the fame and fortune that brought with it. But he stopped enjoying himself, the cars were painful to drive and he didn't feel he could give it his all, so he quite at the height of his powers. He did return to F1, but he wasn't the same driver and it wasn't the same team and it didn't last. He finished his racing career in touring cars in Australia. His no-nonsense style brought him both admirers and detractors, but he always spoke as he saw it. He still does that today. There are many stories to tell from his racing career, his personal life and business. Some stories that only time allows them to be told.

At the end of 1912 Jacques Schneider announced his intention of presenting an annual trophy for an international seaplane contest. There were only twelve Schneider contests but they were major international events with the major rivals being Britain and Italy, followed by France and the US. Biplane seaplanes and flying-boats predominated the early contests and some very advanced twin-float biplanes were among the winners as late as 1925. However, it was the monoplane which was to become the symbol of Schneider Trophy, with Supermarine and

Macchi designs reaching the peak of racing seaplane performance. The final winning combination of Supermarine airframe and Rolls-Royce engine was to make a vital contribution to Britain's defence in 1940 in the form of the Rolls-Royce powered Hurricane and Spitfire. This book records the contests and, in considerable detail, the design, development and achievements of the participating aircraft; those which failed to take part; and the projects, some of which embodied very advanced ideas even if they were proved to be unrealistic.
