Mount Hood, Oregon, is a beautiful, peaceful destination located about forty minutes outside Portland. It stands like a sentinel, looking over its kingdom below. In the warm months, as the sun sets, there is an alpine glow, which makes the mountain appear pink. Skiing is almost 365 days a year. That is, until a murder so appalling is discovered by a hiker and a Forest Service employee. This was not the first murder of its kind, and it won't be the last. Across the mountain, a web of murder and mystery is woven that entangles all that get too close to the . . . Trail Stalker

With the 1998 debut of its V92C, Victory Motorcycles became the New American Motorcycle. Victory's innovative, stylish heavyweight cruiser motorcycles attracted a loyal, hard-riding following, but not the market share needed to survive. This richly illustrated book covers the brand's history model-by-model and analyzes why the parent company announced in early 2017 that its Victory division would cease operation. This book also features a full reprint of the collectible first Victory history from 1998, *The Victory Motorcycle*.

This fascinating book relates all the excitement, mystery, danger, and adventure of living and traveling in Siberia. It all started back in 1991, when I received an invitation via the Gorbachev government, in conjunction with a mining company working with the Soviet Union, to visit, write about, photograph, and film what the country had to offer American tourists and hunters. This was the era of "Glasnost" and "Perestroika." Gorbachev wanted to bring in American tourists to bolster the sagging economy. That first expedition led to 22 years traveling back and forth to the former Soviet Union - now Russia - where I hung out with the KGB, met numerous dignitaries, and lived in tents and trappers' cabins in Siberia with the local natives. We were attacked by bears, wild boars, and moose! Among those traveling with me were Apollo Astronaut Jim McDivitt, who was stalked by a Russian bear, and a four-star air force general, Earl O'Loughlin, who used to fly spy plane missions over the former Soviet Union. This made for a very interesting confrontation with the KGB. During my time in Siberia, I got to know many of the native people, who relayed numerous sad and harrowing stories of encounters with giant bears. The book is jam-packed with historical perspective of what was happening at this time in Russia, including how the people lived, worked, survived, and what they thought of Americans. While framed by hunting, this book is as much about the people and the culture of Siberia. About the Author Now retired, Michigan native Denny Geurink was previously a teacher and the Midwest editor for Field & Stream magazine. He wrote a weekly newspaper outdoor column for nearly forty years. Publisher's website: <http://sbprabooks.com/DennyGeurink>

Every year around the globe, people cross paths with avalanches-some massive, some no deeper than a pizza box-often with deadly results. Avalanche expert Jill Fredston stalks these so-called freaks of nature, forecasting where and when they will strike, deliberately triggering them with explosives, teaching potential victims how to stay alive, and leading rescue efforts when tragedy strikes. Having spent decades trying to keep avalanches and people apart, Fredston brings them together unforgettably in *Snowstruck*. From a rare store of personal experience, she conveys a panorama of perspectives: a skier making what may prove his final decision, a victim buried so tightly that he can't move a finger, rescuers racing both time and weather, forecasters treading the line between reasonable risk and danger. Seamlessly interweaving these accounts, Fredston brings to life the awesome forces of nature that can turn the mountains deadly-and the equally inexorable forces of human nature that lure us time and again into treacherous terrain.
