### **Annual Report**

Hospitals and nursing homes are responding to changes in the health care system by modifying staffing levels and the mix of nursing personnel. But do these changes endanger the quality of patient care? Do nursing staff suffer increased rates of injury, illness, or stress because of changing workplace demands? These questions are addressed in *Nursing Staff in Hospitals and Nursing Homes*, a thorough and authoritative look at today's health care system that also takes a long-term view of staffing needs for nursing as the nation moves into the next century. The committee draws fundamental conclusions about the evolving role of nurses in hospitals and nursing homes and presents recommendations about staffing decisions, nursing training, measurement of quality, reimbursement, and other areas. The volume also discusses work-related injuries, violence toward and abuse of nursing staffs, and stress among nursing personnel--and examines whether these problems are related to staffing levels. Included is a readable overview of the underlying trends in health care that have given rise to urgent questions about nurse staffing: population changes, budget pressures, and the introduction of new technologies. *Nursing Staff in Hospitals and Nursing Homes* provides a straightforward examination of complex and sensitive issues surrounding the role and value of nursing on our health care system.

### **Case Studies in Nursing Fundamentals**

Can women be equal to men as long as men are physically stronger? And are men, in fact, stronger? These are key questions that Colette Dowling, author of the bestselling *The Cinderella Complex*, raises in her provocative new book. The myth of female frailty, with its roots in nineteenth-century medicine and misogyny, has had a damaging effect on women's health, social status, and physical safety. It is

Dowling's controversial thesis that women succumb to societal pressures to appear weak in order to seem more "feminine." The Frailty Myth presents new evidence that girls are weaned from the use of their bodies even before they begin school. By adolescence, their strength and aerobic powers have started to decline unless the girls are exercising vigorously--and most aren't. By sixteen, they have already lost bone density and turned themselves into prime candidates for osteoporosis. They have also been deprived of motor stimulation that is essential for brain growth. Yet as breakthroughs among elite women athletes grow more and more astounding, it begins to appear that strength and physical skill--for all women--is only a matter of learning and training. Men don't have a monopoly on physical prowess; when women and men are matched in size and level of training, the strength gap closes. In some areas, women are actually equipped to outperform men, due partly to differences in body structure, and partly to the newly discovered strengthening benefits of estrogen. Drawing on extensive research in motor development, performance assessment, sports physiology, and endocrinology, Dowling presents an astonishing picture of the new physical woman. And she creates a powerful argument that true equality isn't possible until women learn how to stand up for themselves--physically.

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with

other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

First manual on Clinical Procedures developed by the faculties of NINE-PGIMER Chandigarh, who are also the subject experts. The procedures have been divided into the 6 major nursing subjects: Nursing Foundations, Medical Surgical Nursing, Mental Health Nursing, Obstetric and Gynecological Nursing, Pediatric Nursing and Community Health Nursing. The contents have been developed as per INC syllabus of undergraduate as well as postgraduate nursing and several new procedures have been added, making it the most comprehensive compendium available so far. The complete book has been developed keeping in mind the relevance of the content in the Indian context. The articulate way of writing strengthened by the use of simple language makes browsing through the book a delightful experience. All the procedures have been well illustrated with colored diagrams and real-time

photographs, explaining the various steps of procedures. The procedures have been divided into Preprocedural, Intraprocedural and Postprocedural steps along with their rationale, emphasizing the sequence and importance of every step. All procedures are substantiated with Points to Remember and Special Considerations boxes to help the students identify and remember the various aspects that need to be taken care of while performing the procedures. Suggested Readings at the end of each procedure are given to aid the students with various reference works for future reference and enhancing their knowledge.
