If a student does not meet the minimum required score set by the state, it's an indication that the student needs more academic preparation. The high school is then required to provide postsecondary preparatory instruction. All students enrolled in public high school in the state of Florida are required to take the PERT in the eleventh grade. The PERT tests students' abilities in math, reading, and writing. freshman level composition. The PERT is not timed, and each section has thirty questions. Scoring The PERT is not a test to pass or fail; it's used to determine the best academic path toward college for students. It's important for students to take the PERT seriously (even though it isn't graded) to ensure they are placed in the most appropriate classes. The PERT is scored by section in a range of 50 - 150, with "cut scores" throughout (so students will get three different scores). There are three or four tiers (depending on the section) of cut scores to determine what level students are currently at.

The definitive refutation to the argument of The Bell Curve. When published in 1981, *The Mismeasure of Man* was immediately hailed as a masterwork, the ringing answer to those who would classify people, rank them according to their supposed genetic gifts and limits. And yet the idea of innate limits—of biology as destiny—dies hard, as witness the attention devoted to *The Bell Curve*, whose arguments are here so effectively anticipated and thoroughly undermined by Stephen Jay Gould. In this edition Dr. Gould has written a substantial new introduction telling how and why he wrote the book and tracing the subsequent history of the controversy on innateness right through *The Bell Curve*. Further, he has added five essays on questions of *The Bell Curve* in particular and on race, racism, and biological determinism in general. These additions strengthen the

Social Perception and Social Reality contests the received wisdom in the field of social psychology that suggests that social perception and judgment are generally flawed, biased, and powerfully self-fulfilling. Jussim reviews a wealth of real world, survey, and experimental data collected over the last century to show that in fact, social psychological research consistently demonstrates that biases and self-fulfilling prophecies are generally weak, fragile, and fleeting. Furthermore, research in the social sciences has shown stereotypes to be accurate. Jussim overturns the received wisdom concerning social perception in several ways. He critically reviews studies that are highly cited darlings of the bias conclusion and shows how these studies demonstrate far more accuracy than bias, or are not replicable in subsequent research. Studies of equal or higher quality, which have been replicated consistently, are shown to demonstrate high accuracy, low bias, or both. The book is peppered with discussions suggesting that theoretical and political blinders have led to an odd state of affairs in which the flawed or misinterpreted bias studies receive a great deal of attention, while stronger and more replicable accuracy studies receive relatively little attention. In addition, the

author presents both personal and real world examples (such as stock market prices, sporting events, and political elections) that routinely undermine heavy-handed emphases on error and bias, but are generally indicative of high levels of rationality and accuracy. He fully embraces scientific data, even when that data yields unpopular conclusions or contests prevailing conventions or the received wisdom in psychology, in other social sciences, and in broader society.

MANKIND'S GREATEST DREAM: THE CONQUEST OF DEATH IS FINALLY REALIZED BUT IT COMES WITH A CATCH. In the near future, medical science discovers the secret to achieving immortality and eternal youth. But in order to preserve everyone's youthful vitality they must undergo an operation before passing into adulthood that locks their body in the form of a pre-adolescent eleven year old. Under the auspices of the United Nations Global Longevity Initiative led by brilliant neurosurgeon Dr. Richard Ross, the program promises a peaceful utopian society where emotionally and intellectually mature juveniles rule the world. But not everyone is happy with the new arrangement. A small but passionate group of rebels from the Garden of Eden church, led by the mercurial Calvin James, plots to overthrow the new regime and return the world to its natural order. Starting with a shocking revelation at the end of the first chapter, the idyllic setting is quickly overturned through a series of sinister schemes and escalating medical complications, where suddenly the world finds itself on the brink of imminent extinction. Building to an exciting climax, Dr. Ross and his endocrinologist girlfriend must save the one remaining adult female queen, whose mature eggs represent the final link to the continuity of the human race.
