The Steps from Text to Narrative Sermon Presenting biblically centered sermons in a new, creative genre Pastors and teachers are always on the lookout for new ways to expand the effectiveness of their preaching. Sermons delivered in the first-person point of view can weave the power of story and drama into the biblical teaching, making familiar—and not-so-familiar—characters and situations come to life. This book helps students and pastors understand how first-person sermons can be preached with biblical integrity. It extends Haddon Robinson's "big idea" philosophy of preaching to this new genre. J. Kent Edwards takes a practical approach as he walks readers through the steps needed for creating sermons that are faithful to the text and engaging to the listener. Examples and worksheets enable readers to apply this unique approach to one of their own sermons. The book includes a CD-ROM with a video sample of first-person narrative preaching.

These questions enable the candidates to assess their knowledge in basic sciences and their ability to apply it to clinical practice. Alongside the previously published book Single Best Answer MCQs in Anaesthesia (Volume I - Clinical Anaesthesia, ISBN 978-1-903378-75-5), this book is an ideal companion for candidates sitting postgraduate examinations in anaesthesia, intensive care medicine, and pain management. As always, the self-learning experience is greatly enhanced by the free CD-ROM containing the QBase examination software. The program can either generate these exams randomly (maintaining the same proportions of each subject as the 'pre-set' exams), or the user can select any number of questions in any subject area, to create their very own exam. However the user chooses to set an exam, they can then mark, analyse and store each attempt, and review and re-sit the same exam at a later date, comparing their scores with previous attempts. When re-sitting an exam, the user can also choose to 'shuffle' the question stems A-E, so that they cannot simply remember patterns of true and false answers. A final unique aspect of the program is that it allows the user to select how confident they are of their answer, and the program can then provide feedback on a user's 'guessing strategy'.

This requires a firm foundation of knowledge and an ability to apply this to the clinical situation. This book contains 270 multiple-choice questions allowing self-assessment of the breadth of knowledge required of the modern intensivist. The book is divided into three papers each consisting of 60 multiple true false (MTF) and 30 single best answer (SBA) questions covering areas including resuscitation, diagnosis, disease management, organ support, and ethical and legal aspects of practice. The MTF questions test factual knowledge and understanding of the evidence base underpinning intensive care medicine, while the SBA questions test the ability of the candidate to prioritise, compete options and make the best decision for the patient. Each question is peer reviewed and accompanied by concise and detailed explanatory notes with references to guide further reading. All the authors are practising intensive care physicians with firsthand experience of professional examinations in the specialty. This book will appeal to intensive care physicians approaching professional examinations worldwide, including the European Diploma, American Board and Faculty of Intensive Care Medicine examinations. ## **Final FRCA**

Another title in GMM's highly successful QBase series, this time focusing on the Final FRCA (Fellowship of the Royal College of Anaesthetists) with sets of examination papers the candidate can use to revise and practise their MCQ technique. As always, the self-learning experience is greatly enhanced by the free CD-ROM containing the QBase examination software. This powerful program allows the user to sit the pre-set exams as printed in the book, or to create their own exams using questions drawn from the total pool available on the CD-ROM. The program can either generate these exams randomly (maintaining the same proportions of each subject as the 'pre-set' exams), or the user can select any number of questions in any subject area, to create their very own exam.

## **Fundamentals of Medical Imaging**

Multiple choice questions make up an important part of the MRCP examination. ## **QBase Anaesthesia: Volume 6, MCQ Companion to Fundamentals of Anaesthesia**

Following on from the success of the first edition, Short Answer Questions and MCQs in Anaesthesia and Intensive Care has been completely rewritten to reflect the changes to the final FRCA exam from a long essay based examination to compulsory short answer questions (SAQs). This guide aims to introduce methods and systems of answering questions succinctly and accurately. Almost all of the questions have been asked in the final FRCA since 1996 and most chapters carry more detail than required to reach a pass standard. The new edition takes a question-orientated approach and provides guidance for the final exam. Given the short time allowed for answering the SAQs, previous practice, prior to sitting the examination, is essential. Each of the twelve sections has a comprehensive set of multiple choice questions (MCQ) to the same standard as those set by the Royal College of Anaesthetists. It is vital that candidates practice MCQs as well as SAQs, and the ninety multiple choice questions that follow the SAQ paper carry just as much weight as the SAQ paper. The book has been structured as topic based sections and chapters, each of which can be followed and used to enable self-testing. This book is an invaluable revision aid during preparation for the final FRCA exam and, due to the breadth of content, also forms a useful ready reference throughout anaesthetic training.

### **QBase Anaesthesia: Volume 4, MCQs for the Anaesthesia Primary**

From reviews: "Graphic Anaesthesia is a well-written, easy-to-read book, ideal for trainees studying for primary FRCA examinations. It will be an ideal companion for preparing for exams." *Ulster Medical Journal*, May 2016 "Graphic Anaesthesia is an excellent revision tool that allows trainees approaching exams to prepare in an efficient and simple format. It is a refreshing and unique resource that should be included on any essential revision reading list". *European Journal of Anaesthesiology* 2016; 33:610. "The diagrams are very clear, the explanations accurate and concise and to pack 245 items into a small reference book is no mean feat. Each diagram is drawn in just four colours to enable them to be reproduced easily from memory. This intuitive approach was an eye-opener to me and a valuable lesson in simplicity without losing any essential detail. This is something from which many educators could learn and indeed transfer that skill. This is a quality book that could be a useful investment across the spectrum of practitioners involved in anaesthesia and the teaching of anaesthesia." *Journal of Perioperative Practice* March 2017, volume 27, issue 3 "Graphic Anaesthesia is a compendium of the diagrams, graphs, equations and tables needed in anaesthetic practice. Each page covers a separate topic to aid rapid review and assimilation. The relevant illustration, equation or table is presented alongside a short description of the fundamental principles of the topic and with clinical applications where appropriate. All illustrations have been drawn using a simple colour palette to allow them to be easily reproduced in an exam setting. The book includes sections covering: physiology pharmacodynamics and kinetics physics equipment anatomy drugs clinical measurement statistics. By combining all the illustrations, equations and tables with concise, clinically relevant explanations, *Graphic Anaesthesia* is therefore: the ideal revision book for all anaesthetists in training a valuable aide-memoire for senior anaesthetists to use when teaching and examining trainees.
