This book examines the state of the Open and Distance Learning (ODL)-based secondary education in India. ODL-based education has been a key resource for children in India who can neither cope with nor avail of regular schooling opportunities due to economic, health and disability, or other constraints. The volume uses large-scale empirical data collected from various Indian states and a sensitive theoretical framework to study the equity, efficiency, and effectiveness of the National Institute of Open Schooling (NIOS) and the State Open School (SOS). Highlighting the roadblocks and barriers in terms of its reach, inclusion, and delivery, particularly to the marginalised, this book explores whether ODL has a potential of being a sustainable and effective option at the secondary and senior secondary level in India. Thus, it seeks to generate policy discourse around delivery mechanisms and effectiveness of ODL in developing countries. First of its kind, this comprehensive volume will be useful for scholars and researchers of education, education policy, public policy, and political studies.

This book examines the drivers of, and barriers to, participation of women in the

Asian labour market for its socio-economic development and structural transformation. Based on original comparative research and extensive fieldwork, Transformation of Women at Work in Asia highlights the commonalities as well as the diverse nature of challenges that women across Asia face in gaining access to more and better jobs. Findings show that women across the continent have contributed significantly to its spectacular growth story; yet, social norms and economic factors limit their levels of participation. The book calls for a comprehensive approach to improve opportunities for women's participation in the labour market as well as for the freedom to engage in paid employment. This will, in turn, contribute to a more inclusive growth process. It addresses important challenges faced by women workers and provides policy options for governments to promote decent work opportunities for women across social strata.
