David Gandy is both an icon and muse for Dolce&Gabbana--the Italian designers' masculine ideal. Originally from suburban London and a self-professed car fanatic, he got into modeling by chance through a contest. Since then, he has taken the fashion world by storm, working with top photographers and stylists. This photographic homage traces Gandy's career from early photo shoots to the acclaimed advertising campaign for the Dolce&Gabbana fragrance Light Blue, which captured the world's imagination and transformed him into a global icon of virility, sex appeal, and charm. The Light Blue campaign alone garnered over eleven million online hits, and his image has been featured in a fifty-foot poster towering over Times Square in New York. This book includes photographs by Mario Testino, Steven Klein, Giampaolo Sgura, and Mariano Vivanco, among others.

Do it yourself Serger machine repair!!! Sound like a far fetched idea? Not so, according to Reuben O. Doyle, a sewing machine repairman of 25 years and author of "Serger Repair for the Home Sewer." "In over 75% of the repair jobs I get, the home sewer/crafter could easily have handled the job if only they'd known what to look for. In about 25% of the repair jobs I go out on, the problem is such a minor one that anyone with a checklist of what to look for could fix it in seconds, but I have to charge them the same service fee as on any repair job. Of course any broken parts need to be taken to an authorized service repairman for repair or replacement, but those types of service calls are by far the minority!" Written in step by step instructional style, this book takes the serger machine owner through problem/solution scenarios allowing them to fix problems that can cause a lot of frustration for those who sew. Whether you have an older model machine, or one of the newer models, this book will help keep your general repair costs to a minimum. The home sewer can now just look up the problem in this handy guide book and follow the instructions on how to fix it. YES, it's now as easy to fix your serger machine as picking up a book!

No 1 NEW RELEASE NOV 2014. This is not a book about Singer sewing machines but Isaac Merritt Singer, the inventor of the first practical sewing machine in history and his incredible, and often haphazard story, that led to his greatest invention. The story of Isaac Merritt Singer is straight out of American folklore. Isaac ran away from a troubled home to a carnival passing through town. From living on his wits Isaac became one of the wealthiest men of his era, long before the likes of Carnegie, Ford and Rockefeller. Isaac's story is one of wars and women, when he died he was married to the most beautiful woman in Europe, 30 years his junior. In his will he named over 20 of his children, making each one rich beyond their wildest dreams. Isaac's inventions helped kick-start the growth that made America the first Super Power. His business techniques, salesmanship and entrepreneurial skill brought jobs to millions of people around the world and made Singer a household name. Isaac's story will blow your mind and may just be the best tale that has never made it to Hollywood.

The Entrepreneur's Guide to Sewn Product Manufacturing

Professor Lou Marinoff's first book drew on the wisdom of the great philosophers to solve our everyday problems, launching a movement that restored philosophy to what it once was: useful in all walks of life. Now, in *The Big Questions*, he takes the concept to the next level, applying centuries of philosophy and great literature to answer central questions of modern existence. Urging us not to accept victimhood as the by-product of modern life, Professor Marinoff uses specific case studies from his counseling practice to show how wisdom from the great thinkers can help us define our own philosophy, and thereby reclaim our sense of well-being. He asks and answers questions that go to the heart of the human condition: How do we know what is right? How can we cope with change? Why can't we all get along? And, most centrally, how can we use the centuries of wisdom that have come before us to help us answer these questions and feel at ease in the world? Accessible, entertaining, and profoundly useful, *The Big Questions* mixes wisdom from the great thinkers with specific case studies to illuminate how a shift in perspective can truly be life changing. Lou Marinoff is the author of the international hit *Plato, Not Prozac!*, which has been published in twenty languages. A professor of philosophy at the City College of New York, Marinoff is also the founding president of the American Philosophical Practitioners Association. Praise for *Plato, Not Prozac!*: 'What exactly is philosophical practice? Marinoff calls it 'therapy for the sane.' In a nutshell, it's using the 2,500-year-old tradition of philosophy to solve everyday problems, like work, relationship and family issues. It's a return to what philosophy was meant to be - a guideline for a way of life.' -Salon.Com '*Plato, Not Prozac!* looks to become the bible of the "philosophical counseling" movement.' -Philadelphia Inquirer Magazine 'The ancient think

Swetè Jesu

Pucker or Puckering is the most used (abused?) term in the garment manufacturing industry. Pick up any quality controllers report, and the first thing that will strike your eye will be "...Puckering in armhole, ...Puckering in neckline binding, ...control

Puckering in bottom hem..." the list is endless. Buying office quality controllers are as enamoured of this term as much as manufacturers abhor it. What is it that makes it so distasteful? Why does it occur? How can it be controlled? While there are numerous leaflets, documents and articles available on pucker, we have found that the majority of them lay great stress on "inherent pucker" (only material parameters). In this booklet have tried to include process parameters as well as sewing of lightweight fabrics. All said and done, the problem is so intricately interdependent that exhaustive compilation is well nigh impossible. We are sure this booklet will help manufacturers to understand the rationale behind this publication and we will consider our effort successful if enthusiastic readers regularly inform us about newer methods to tackle the problem.
