South-Western Federal Taxation 2017: Individual Income Taxes

Simplicity in taxation has considerable potential advantages. However, attempts to simplify tax systems are only likely to be successful and enduring if they take account of the reasons why taxation is complex. There are strong pressures on tax systems to accommodate a range of important factors, as well as complex and changing national and international environments within which modern tax systems have to operate. This book explores the experiences of simplification in a range of countries and jurisdictions. The authors analyse a range of manifestations

of simplification, including tax systems, tax law, taxpayer communications and tax administration. They also review the longer term or more fundamental approaches to simplification, suggesting that in order to strike the optimum balance between simplicity and the aims of a tax system in terms of efficiency and equity, a range of complex environmental factors must all be taken into account. With chapters reflecting on experiences from Australia, China, Canada, Malaysia, New Zealand, Russia, South Africa, Thailand, Turkey, the UK and the US, the authors illustrate differences between jurisdictions and the changing environment in which they operate. This book addresses the crucial balance between simplicity and the other objectives of tax design and reform, and suggests that reformers of the tax system should include simplicity as one of the key evaluators of any design or reform proposal.

Getting to Zero Alcohol-Impaired Driving Fatalities

Alcohol-impaired driving is an important health and social issue as it remains a major risk to Americans' health today, surpassing deaths per year of certain cancers, HIV/AIDS, and drownings, among others, and contributing to long-term disabilities from head and spinal injuries. Progress has been made over the past decades towards reducing these trends, but that progress has been incremental and has stagnated more recently. Getting to Zero Alcohol-Impaired Driving Fatalities examines which interventions (programs, systems, and policies) are most promising to prevent injuries and death from alcohol-impaired driving, the barriers to action and approaches to overcome them, and which interventions need to be changed or adopted. This report makes broad-reaching recommendations that will serve as a blueprint for the nation to accelerate the progress in reducing alcohol-impaired driving fatalities.

The size of government is arguably the most controversial discussion in United States politics, and this issue won't fade from prominence any time soon. There must surely be a tipping point beyond which more government taxing and spending harms the economy, but where is that point? In this accessible book, best-selling authors Jeff Madrick, Jon Bakija, Lane Kenworthy, and Peter Lindert try to answer whether our government can grow any larger and examine how we can optimize growth and fair distribution.
